

**CITY OF HOUSTON**

**HOUSTON PUBLIC WORKS**  
**HOUSTON WATER DIVISION**

**EXECUTIVE SUMMARY**

**See following pages.**

## **EXECUTIVE SUMMARY**

### **Site Background and Environmental Setting**

The Site consists of approximately 11.08 acres of grass-covered land within one (1) land parcel owned by Aga Khan Foundation U.S.A. (AKF-USA), with its local entity known as Imara Houston. The Site is to be developed into the Ismaili Center Houston (ICH), which will consist of an educational/cultural outreach building with landscaped grounds and below-ground parking. The Site is located in a high-rent district in downtown Houston and is surrounded by mixed-use, multi-family residential and commercial properties, a cemetery, and a public park between the Site and Buffalo Bayou, the major drainage feature within the City. Various studies conducted by Intertek PSI (PSI) in 2019 before the initiation of Wild Associates LLC's (WA) TCEQ Affected Property Assessment Report (APAR) indicated environmental risks associated with a former Houston Lighting & Power facility, former underground storage tanks, and a former rail spur.

The APAR was submitted to TCEQ on July 13, 2021. In a July 22, 2021 letter (attached), TCEQ requested that more soil sampling be conducted to evaluate metals and that more groundwater monitoring wells be installed. WA conducted the requested work and submitted APAR Addendum #1 on September 30, 2021. In an October 25, 2021 letter (attached), TCEQ requested additional wells to delineate off-site, impacted groundwater. WA conducted the requested work and submitted APAR Addendum #2 on June 30, 2022. In a July 22, 2022 letter (attached), TCEQ stated that (1) the impacted groundwater plume had been delineated, (2) TCEQ understands that AKF intends to develop a Response Action Plan that addresses soils with COCs above the Total-Soil-Combined PCLs using physical controls, and (3) the APAR cannot be approved until the MSD is approved by the City of Houston.

### **Exposure Pathway and Potential Receptor Summary**

Preliminary to defining the extent of impact at the Site, an evaluation of potential receptors and exposure pathways was completed. The procedure eliminated ecological receptors and eliminated all exposure pathways except soils and groundwater.

The complete or reasonably expected to be complete pathways are Total-Soil-Combined, soil leaching to groundwater, and groundwater ingestion. The objective of this Municipal Setting Designation (MSD) application is to remove groundwater as a medium of concern for continual monitoring or remediation. Since groundwater will no longer be an exposure pathway of concern under this scenario, the soil leaching to groundwater pathway will not be a concern under Site development plans, leaving only the Total-Soil-Combined pathway for development of TCEQ critical Protective Concentration Levels (PCL). The data gathered for the APAR indicate that VOCs, TPH, and metals are COCs for soil and groundwater and are confined to the southern half of the Site within the footprint of the former HL&P facility. Groundwater VOCs have migrated off site to the east and west, but the potential for contact with humans is negligible, and the groundwater plume has been delineated. No utilities or sensitive ecological receptors have been impacted.

## **Assessment Results**

The assessment indicated the following:

1. The Site has two tiers, i.e., the southern, upper tier is elevated about 10 ft above the northern, lower tier, as demarcated by an abrupt grade change near the center of the Site. The Groundwater Bearing Unit (GWB) is contaminated with VOCs and arsenic above TCEQ Tier 1 Residential PCLs for established Chemicals of Concern (COC) in the upper tier of the Site beneath the footprints of the former HL&P facility and the Ismaili Center Houston. No non-aqueous phase liquids were encountered. The GWBU plume is stable and is being monitored biannually until the APAR and MSD application are approved; TCEQ has given tentative approval to the APAR, subject to the City approving this MSD application. The northern, southern, eastern, and western extents of the plume that define the Protective Concentration Exceedance Zone (PCLE) have been delineated. The dominant direction of flow is to the north and north-northwest toward Buffalo Bayou about 1,200 ft away, but there are lateral components to the east and west. The plume is expected to decrease through natural attenuation.
2. Certain metals and TPH exceed their respective soil leaching to groundwater Tier 1 Res PCLs. TPH exceeds the soil leaching to groundwater Tier 1 Res PCL in a former UST area where soils were excavated for a UST location survey conducted during a prior study; side and bottom samples indicated levels lower than Tier 1 Res PCLs, but the excavated soils were placed back into the excavation and are currently under construction fill material but will be paved over as an engineering control barrier for the future Response Action Plan. Metals and TPH PCLs are proposed for elimination as critical PCLs due to the proposed elimination of the GWBU as a pathway via the City's MSD program. Under this scenario, only metals exceeding the Total-Soil-Combined critical Tier 1 PCLs would remain as critical PCLs.
3. Certain metals exceed Total-Soil-Combined Tier 1 PCLs in very isolated areas of the Site, and their specific sources are unknown but could relate to fill material around the former rail spur and debris left from the demolition of the HL&P facility sometime between 2006 and 2008. The metals define the Total-Soil-Combined critical PCLs in the upper 5 ft considered surface soils in a Commercial/Industrial setting. The ongoing construction of the ICH building has removed much of the impacted soils; any remaining impacted soils will be included in a future Response Action Plan and Response Action Completion Report submitted to TCEQ.

Mr. Abdul Javery  
Imara Houston, Inc.  
1700 First Colony Blvd.  
Sugar Land, Texas 77098

Re: Comments and Request for Information  
*Affected Property Assessment Report*, dated July 13, 2021  
Ismaili Center Houston Site  
2323 Allen Parkway, Houston, Harris County  
T No. 3626, RN101891372, CN601032311

Dear Mr. Javery:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the above-referenced Affected Property Assessment Report (APAR). Please see the comments and request for information below. The comments do not require a response. Please submit an APAR addendum, addressing the information requested, within 60 days from the date of this letter.

### Comments

1. The TCEQ concurs that the critical protective concentration level (PCL) for metals in soils is the <sup>TotSoil</sup><sub>Combo</sub> pathway. This is based on that there were no metals, other than arsenic, that exceeded a PCL in groundwater. The concentrations for arsenic in groundwater samples shown on the chemicals of concern (COCs) concentration figures and COCs concentrations summary tables are low enough to be naturally occurring. However, a much higher concentration of arsenic (0.61 mg/l) is shown on Table 5A. That concentration, if correct, would very likely not be naturally occurring.
2. Considering the size of the site and that lead, arsenic, and barium were reported with elevated concentrations at select locations, more sample locations are needed.
3. The only volatile organic chemical (VOC) to exceed the <sup>GW</sup><sub>Soil<sub>Ing</sub></sub> PCL in soils was 1,1,2,2-tetrachloroethane at sample location SB-11. Since that chemical was not detected in the groundwater samples, the concentration does not exceed the critical PCL (<sup>TotSoil</sup><sub>Combo</sub>).

### Request for Information

4. Per item 1 above, please clarify if the 0.61 mg/l concentration is correct.
5. Please delineate lead and arsenic in the vicinity of sample location EB-9 o-1 where they were reported with concentrations substantially above the critical PCL. At each new

P.O. Box 13087 • Austin, Texas 78711-3087 • 512-239-1000 • tceq.texas.gov

Mr. Avery  
Page 2  
July 22, 2021  
T No. 3626

sample location, samples should be collected from 0-1 and 1-2 feet below ground surface (bgs) and analyzed for arsenic and lead.

6. Per item 2 above, please complete more borings in locations that will provide adequate coverage of the site. At each boring location, please collect a soil sample from 0-1 and 1-2 feet bgs and analyze the samples for arsenic, barium, and lead.
7. Please install monitor wells approximately 100 feet north and south of MW-3 and near the property line to delineate VOCs. Please also install a well near MW-3 near the property line to determine if affected groundwater extends off-site.
8. Please install a monitor well south of MW-4 approximately 100 feet from MW-4 and near the property line to delineate VOCs. Please also install a well near MW-4 near the property line to determine if affected groundwater extends off-site.

Questions concerning this letter should be directed to me at (512) 239-2378. When responding by mail, please submit one paper copy and one electronic copy (on USB or disc) of all correspondence and reports to the TCEQ Remediation Division at Mail Code MC-127. An additional copy should be submitted in electronic format to the local TCEQ Region Office. The information in the reference block should be included in all submittals. Note that the electronic and hard copies should be identical, complete copies. A Correspondence ID Form (TCEQ Form 20428) must accompany each document submitted to the Remediation Division and should be affixed to the front of your submittal. The Correspondence ID Form helps ensure that your documents are identified correctly and are routed to the applicable program for a timely response.

Sincerely,

Mike Duffin, Ph.D., P.G.

October 25, 2021

Mr. Abdul Javery  
Imara Houston, Inc.  
1700 First Colony Blvd.  
Sugar Land, Texas 77098

Re: Partial Approval with Comments and Request for Information  
*Affected Property Assessment Report Addendum*, dated September 30, 2021  
Ismaili Center Houston Site  
2323 Allen Parkway, Houston, Harris County  
T No. 3626, RN101891372, CN601032311

Dear Mr. Javery:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the above-referenced Affected Property Assessment Report (APAR) addendum. Please see the request for information below. The comments do not require a response. Please submit a second APAR addendum that addresses off-site groundwater within 60 days from the date of this letter.

### Comments

1. All request for information items given in the TCEQ's letter, dated July 22, 2021, have been adequately addressed.
2. A deed notice establishing commercial/industrial (C/I) land use will be required if C/I protective concentration levels will be used.
3. The information provided does not support that the on-site affected groundwater is due to an off-site source.
4. The information provided is not sufficient to demonstrate that the source for the affected groundwater at the site is located off-site.

### Request for Information

5. Please delineate the affected groundwater off-site in the vicinity of MW-10 and MW-12. Please gain off-site access and install a well approximately 100 feet west of MW-10 and approximately 100 feet east of MW-12, sample the groundwater, and analyze the samples for volatile organic chemicals (VOCs). If the VOC concentrations in the off-site wells are substantially higher than those on-site, the TCEQ will likely conclude that the on-site

Mr. Avery  
Page 2  
October 25, 2021  
T No. 3626

affected groundwater is from an off-site source. However, if those conditions do not exist, then additional off-site delineation wells may be required.

Questions concerning this letter should be directed to me at (512) 239-2378. When responding by mail, please submit one electronic copy (on USB or disc) of all correspondence and reports to the TCEQ Remediation Division at Mail Code MC-127. An additional copy should be submitted in electronic format to the local TCEQ Region Office. The information in the reference block should be included in all submittals. Note that the electronic and hard copies should be identical, complete copies. A Correspondence ID Form (TCEQ Form 20428) must accompany each document submitted to the Remediation Division and should be affixed to the front of your submittal. The Correspondence ID Form helps ensure that your documents are identified correctly and are routed to the applicable program for a timely response.

Sincerely,

Mike Duffin, Ph.D., P.G.

Re: Comments and Request for Information  
*Requested Information – APAR Addendum #2*, dated June 30, 2021  
Ismaili Center Houston Site  
2323 Allen Parkway, Houston, Harris County  
T No. 3626, RN101891372, CN601032311

Dear Mr. Javery:

The Texas Commission on Environmental Quality (TCEQ) has reviewed the above-referenced Affected Property Assessment Report (APAR) Addendum. Please see the request for information below. The comments do not require a response.

### Comments

1. In its October 25, 2022 letter, the TCEQ requested that affected groundwater be delineated off-site in the vicinity of MW-10 and MW-12.
2. Two monitor wells (MW-15 and MW-16) were installed in April 2022 off-site to establish delineation. For various reasons, the wells were installed at a substantial distance (approximately 600 feet) away from the site.
3. The chemicals of concern detected in the groundwater sample collected from MW-15 were some of the same chlorinated aliphatic hydrocarbons (CAHs) as those on-site. The concentrations for the CAHs were below the protective concentration levels (PCLs). The single chemical detected in the groundwater sample collected from MW-16 [p-isopropyl toluene (IT)] was reported at an estimated concentration below the PCL. IT is not present in on-site groundwater.
4. The TCEQ concurs that groundwater is delineated off-site.
5. The TCEQ understands that Imara Houston (Imara) intends to submit a Response Action Plan and propose to address the soils with COC concentrations above  $\text{Soil}_{\text{Comb}}^{\text{Tot}}$  PCLs using building/parking garage concrete foundation as a physical control. Imara intends to address affected groundwater, both on-site and off-site, using a Municipal Settings Designation (MSD).

T No. 3626

6. The TCEQ cannot approve the APAR until the MSD is approved by the COH.

### **Request for Information**

7. Please provide a status update on October 1, 2022 concerning the proposed MSD.
8. Please complete semi-annual groundwater monitoring until a decision is made by the COH on the MSD application.

Questions concerning this letter should be directed to me [Michael.Duffin@tceq.texas.gov](mailto:Michael.Duffin@tceq.texas.gov). When responding by mail, please submit one electronic copy (on USB or disc) of all correspondence and reports to the TCEQ Remediation Division at Mail Code MC-127. ## **Appendix A**

**Provide a legal description of the boundaries of the designated property, including metes and bounds, and a copy of the deed for the property. A professional surveyor currently registered with the Texas Board of Professional Surveying must certify that all property descriptions with metes and bounds are accurate.**

The following documents are included in this Appendix A:

- Site Survey Plat
- Site Special Warranty Deed

STATE OF TEXAS  
COUNTY OF HARRIS

We, AMERITON PROPERTIES INCORPORATED, a Maryland corporation, represented herein by Jeffrey A. Jones, its President and Leslie S. Hamilton, its Administrative Assistant and ARTHUR GARFIELD ROBINSON AND MARIE LAVERNE ROBINSON REVOCABLE TRUST represented herein by Marie LaVerne Robinson. Its President and Charles E. Robinson, its Assistant, herinafter referred to as Owners of the 11.31 acre tract described in the above and foregoing map of VILLAGE AT ALLEN PARKWAY SEC. 1, do hereby make and establish said subdivision and development plan of said property according to all lines, dedications, restrictions and notations on said maps or plats and hereby dedicate to the use of the public forever, all streets (except those streets designated as private streets, or permanent access easements), alleys, parks, water courses, drains, easements and public places shown thereon for the purposes and considerations therein expressed, and do hereby bind ourselves, our heirs, successors and assigns to warrant and forever defend the title on the land so dedicated.

FURTHER, Owners have dedicated and by these presents do dedicate to the use of the public for public utility purposes forever unobstructed aerial easements. The aerial easements shall extend horizontally an additional eleven feet, six inches (11' 6") for ten feet (10' 0") perimeter ground easements or seven feet, six inches (7' 6") for fourteen feet (14' 0") perimeter ground easements or five feet (5' 0") for sixteen feet (16' 0") perimeter ground easements, from a plane sixteen feet (16' 0") above ground level upward, located adjacent to and adjoining said public utility easements that are designed with aerial easements (U.E. or A.E.) as indicated and depicted, herein, whereby the aerial easement totals thirty one feet, six inches (21' 6") in width.

FURTHER, Owners have dedicated and by these presents do dedicate to the use of the public for public utility purposes forever unobstructed aerial easements. The aerial easements shall extend horizontally an additional ten feet (10' 0") for ten feet (10' 0") back-to-back ground easements, or eight feet (8' 0") for fourteen feet (14' 0") back-to-back ground easements or seven feet (7' 0") for sixteen feet (16' 0") back-to-back ground easements, from a plane sixteen feet (16' 0") above ground level upward, located adjacent to both sides and adjoining said public utility easements that are designed with aerial easements (U.E. or A.E.) as indicated and depicted herein, whereby the aerial easement totals thirty feet (30' 0") in width.

FURTHER, Owners do hereby covenant and agree that all of the property within the boundaries of this plat is hereby restricted to prevent the drainage of any septic tanks into any public or private street, permanent access easement, road or alley or any drainage ditch, either directly or indirectly.

FURTHER, Owners do hereby dedicate to the public a strip of land fifteen (15) feet wide on each side of the center line of any and all baysous, creeks, gullies, ravines, draws, sloughs, or other natural drainage courses located in said plat, as easements for drainage purposes, giving the City of Houston, Harris County, or any other governmental agency, the right to enter upon said easement at any and all times for the purpose of construction and maintenance of drainage facilities and structures.

FURTHER, Owners do hereby covenant and agree that all of the property within the boundaries of this plot and adjacent to any drainage easement, ditch, gully, creek or natural drainage way shall hereby be restricted to keep such drainage ways and easements clear of fences, buildings, planting and other obstructions to the operations and maintenance of the drainage facility and that such abutting property shall not be permitted to drain directly into this easement except by means of an approved drainage structure.

FURTHER, Owners hereby certify that this replat does not attempt to alter, amend, or remove any covenants or restrictions; we further certify that no portion of the preceding plat was limited by deed restriction to residential use for not more than two (2) residential units per lot.

IN TESTIMONY WHEREOF, the AMERITON PROPERTIES INCORPORATED, a Maryland corporation, has caused these presents to be signed by Jeffrey A. Jones, its President, therunto authorized, attested by its Administrative Assistant Leslie S. Hamilton, this 18th day of October, 2004.

### SPECIAL WARRANTY DEED

STATE OF TEXAS §  
KNOW ALL PERSONS BY THESE PRESENTS THAT:  
COUNTY OF HARRIS §

AMERITON PROPERTIES INCORPORATED, a Maryland corporation ("Grantor"), for and in consideration of the sum of Ten Dollars (\$10.00) paid to Grantor and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, has GRANTED, BARGAINED, SOLD, and CONVEYED and by these presents does hereby GRANT, BARGAIN, SELL and CONVEY unto AGA KHAN FOUNDATION U.S.A., a District of Columbia non-profit corporation ("Grantee"), whose mailing address is 1825 K Street, NW, Suite 901, Washington, D.C. 20006, the real property described in Exhibit A attached hereto, including the buildings and improvements located thereon and all appurtenances of the above-described real property, including (i) easements or rights-of-way relating thereto and (ii) without warranty, all right, title, and interest, if any, of Grantor in and to licenses, development rights, air rights, water rights, wastewater, fresh water, storm sewer or other utilities capacity or service commitments and allocations, offsite surface water retention commitments and allocations acquired by Grantor or any predecessor owner to serve such real property and any credits for any related capital recovery charges paid therefor by Grantor or any predecessor owner of such real property (whether constituting real or personal property), utility or other special tax district receivables and other rights to reimbursement in respect of such real property or any onsite or offsite improvements to it; and, without warranty, all right, title, and interest, if any, of Grantor in and to the land lying within any street, alley or roadway adjoining the real property described above or any vacated or hereafter vacated street, alley or roadway adjoining said real property (collectively, the "Property").

This conveyance is made and accepted subject to those matters set forth in Exhibit B attached hereto, but only to the extent that the same are validly existing and affect the Property (the "Permitted Exceptions").

TO HAVE AND TO HOLD the Property, subject to the Permitted Exceptions, unto Grantee and its successors and assigns forever; and, subject to the Permitted Exceptions, Grantor does hereby bind itself and its successors and assigns to warrant and forever defend the Property unto Grantee and its successors and assigns against every person whomsoever lawfully claiming or to claim the same or any part thereof, by, through or under Grantor, but not otherwise.

Ad valorem taxes with respect to the Property for the current year have been prorated as of the dated hereof. By acceptance of this deed, Grantee assumes and agrees to pay and indemnifies and agrees to hold Grantor harmless from and against all ad valorem taxes relating to the Property, for the current and all subsequent years, and for the current year and/or prior years arising out of a change in usage or ownership of the Property by Grantee on or after the

date hereof (including, without limitation, any rollback or other additional taxes payable under the terms of Section 23.46 or Section 23.55 of the Texas Tax Code, as amended, or similar laws); provided, however, that Grantor agrees to pay and indemnifies and agrees to hold Grantee harmless from and against any additional ad valorem taxes relating to the current year and/or prior years arising out of a change in usage or ownership of the Property by Grantor prior to the date hereof (including, without limitation, any rollback or other additional taxes payable under the terms of Section 23.46 or Section 23.55 of the Texas Tax Code, as amended, or similar laws).

*[Remainder of Page Intentionally Left Blank]*

IN WITNESS WHEREOF, this Special Warranty Deed has been executed by Grantor to be effective as of the date set forth below.

DATE: Aug 25, 2006

VILLAGE AT ALLEN PARKWAY  
11.08 ACRES

JUNE 28, 2006  
JOB NO. SCM16-T2  
PAGE 1 OF 3

DESCRIPTION OF A 11.08 ACRE TRACT OF LAND SITUATED  
IN THE JOHN AUSTIN SURVEY, ABSTRACT NO. 1  
CITY OF HOUSTON, HARRIS COUNTY, TEXAS

BEING a 11.08 acre tract of land in the John Austin Survey, A-1, City of Houston, Harris County, Texas, and being all of the remainder of a called 11.31 acre tract of land described as Unrestricted Reserve "A" of Village at Allen Parkway Section 1, a subdivision of record under Film Code No. 572259 of the Harris County Map Records (H.C.M.R.), said 11.08 acre tract of land being more particularly described by metes and bounds as follows:

Bearing Orientation is based on the Texas State Plane Coordinate System (South Central Zone) NAD83. All distances given in the following description are surface values and may be converted to grid values by dividing by the combined adjustment factor of 1.0001062213.

**BEGINNING** at a 5/8-inch iron rod with cap stamped "BROWN & GAY" found for the southeast corner of said Unrestricted Reserve "A" and being in the northern right-of-way line of West Dallas Avenue (60-foot width);

THENCE, S  $86^{\circ}46'14''$  W, a distance of 382.54 feet along the said northern right-of-way line to a 5/8-inch iron rod with cap stamped BROWN & GAY set for a southerly cutback corner, from which a found 5/8-inch iron rod with cap stamped H.L.&P. bears S  $85^{\circ}55'$  W, 1.30 feet;

THENCE, N  $48^{\circ}14'56''$  W, a distance of 21.22 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for the northerly cutback corner and being in the eastern right-of-way line of Montrose Boulevard (width varies) as per City of Houston Drawing # 14266 and the plat recorded under Film Code No. 572259 of the H.C.M.R.;

THENCE, along the eastern right-of-way of said Montrose Boulevard and the west lines of the herein described tract the following ten (10) courses:

N  $03^{\circ}14'56''$  W, a distance of 70.02 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for the point of curvature of a curve to the left;

In a northwesterly direction, 94.48 feet along the arc of said curve to the left having a radius of 774.44 feet, a central angle of  $06^{\circ}59'23''$  and whose chord bears N  $11^{\circ}47'16''$  W, 94.42 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for the point of reverse curvature;

In a northwesterly direction, 14.14 feet along the arc of a curve to the right having a radius of 789.47 feet, a central angle of  $01^{\circ}01'34''$  and whose chord bears N  $14^{\circ}43'48''$  W, 14.14 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for the end of said curve;

N  $03^{\circ}14'56''$  W, a distance of 897.43 feet to a point for corner at the edge of an existing building;

VILLAGE AT ALLEN PARKWAY

PAGE 2 OF 3

S 86°45'04" W, a distance of 10.00 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for corner;

N 03°14'56" W, a distance of 154.30 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for corner;

N 86°45'04" E, a distance of 10.00 feet to a point for corner at the edge of an existing building;

N 03°14'56" W, a distance of 24.64 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for the point of curvature of a curve to the right;

In a northeasterly direction, 85.79 feet along the arc of said curve to the right having a radius of 483.50 feet, a central angle of 10°10'01" and whose chord bears N 01°50'04" E, 85.68 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY set for the point of compound curvature of a curve to the right;

In a northeasterly direction, 30.74 feet along the arc of said curve to the right having a radius of 25.00 feet, a central angle of 70°27'30" and whose chord bears N 41°46'00" E, 28.84 feet a 5/8-inch iron rod with cap stamped BROWN & GAY set for the most northerly northwest corner of the herein described tract and being in the southern right-of-way line of Allen Parkway (width varies) as described in Volume 736, Page 380 and Volume 1951, Page 535 of the Harris County Deed Records (H.C.D.R.);

THENCE, along said southern right-of-way and the north line of the herein described tract 279.19 feet along the arc of a curve to the right having a radius of 729.39 feet, a central angle of 21°55'52" and whose chord bears S 89°49'05" E, 277.49 feet to a 5/8-inch iron rod with cap stamped BROWN & GAY found for the northeast corner of the herein described tract and the northwest corner of a called 7.353 acre tract being ZOM HOUSTON, a subdivision of record under Film Code No. 560006 of the H.C.M.R.;

THENCE, S 02°23'45" E, along the line common to said Unrestricted Reserve "A" and said 7.353 acre tract 706.61 feet to a 5/8-inch iron rod with cap stamped "BROWN & GAY" found for the southwest corner of said 7.353 acre tract and being an interior ell corner of said Unrestricted Reserve "A";

THENCE, N 86°57'14" E, a distance of 40.02 feet to a 5/8-inch iron rod with cap stamped "BROWN & GAY" set for an exterior ell corner of said Unrestricted Reserve "A";

THENCE, S 02°22'06" E, a distance of 50.00 feet to a 5/8-inch iron rod with cap stamped "BROWN & GAY" set for an interior ell corner of said Unrestricted Reserve "A";

THENCE, N 86°57'14" E, a distance of 84.73 feet to a 5/8-inch iron rod with cap stamped "BROWN & GAY" set for the most easterly northeast corner of said Unrestricted Reserve "A" and the northwest corner of West Dallas Place, a subdivision of record under Film Code No. 398128 of the H.C.M.R.;

Revised 08/23/06

**EXHIBIT B**

(Permitted Exceptions)

1. Standby fees, taxes and assessments by any taxing authority for the year 2006, and subsequent years; and subsequent taxes and assessments by any taxing authority for prior years due to change in land usage or ownership by Grantee on or after the date hereof.
2. Restrictive covenants contained in the map filed for record in Film Code No. 572259 of the Map Records of Harris County, Texas.
3. A sidewalk and utility easement granted to the City of Houston by instrument filed for record under County Clerk's File No. K262840 of the Official Public Records of Real Property of Harris County, Texas.
4. Storm sewer easement granted to the City of Houston, as located and defined by instrument recorded in Volume 786, Page 606 of the Map Records of Harris County, Texas, and as reflected by the map filed for record in Film Code No. 572259 of the Map Records of Harris County, Texas.
5. Building set back line twenty-five (25) feet in width along the north property line, as reflected by the map filed for record in Film Code No. 572259 of the Map Records of Harris County, Texas.
6. Encroachment of building into the building set back line described in item 5 above.
7. Building set back line twenty-five (25) feet in width along the portion of the property dedicated for the widening of Montrose Blvd., as reflected by the map filed for record in Film Code No. 572259 of the Map Records of Harris County, Texas.
8. Encroachment of three buildings into the building set back line described in item 7 above.
9. Building set back line fifteen (15) feet in width along the south property line, as reflected by the map filed for record in Film Code No. 572259 of the Map Records of Harris County, Texas.
10. Improvements extend over the area dedicated for the widening of Montrose Blvd., as shown on the map filed for record in Film Code No. 572259 of the Map Records of Harris County, Texas.
11. An easement five (5) feet in width along the most Easterly line of the subject property together with an unobstructed aerial easement ten (10) feet wide, from a plane twenty (20) feet above the ground upward located adjacent to said five (5) foot wide easement as reserved by Centerpoint Energy Houston Electric, LLC, a Texas limited liability company, as set forth in instrument recorded under Harris County Clerk's File No. X849841 and as reflected by the map filed for record in Film Code No. 572259 of the Map Records of Harris County, Texas.

12. 10' sanitary sewer easement off the easterly side of the property, Volume 2429, Page 376  
Deed Records of Harris County, Texas.
13. Encroachment of chain link fence into Montrose Blvd. along the west side of the property.
14. All oil, gas and other minerals, the royalties, bonuses, rentals and all other rights in connection with the same are excepted herefrom as reserved in deed filed for record under County Clerk's File No. P609474 of the Official Public Records of Real Property of Harris County, Texas.

## Appendix B

### A description of the current use and, to the extent known, the anticipated use(s) of the designated property and properties within 500 feet of the boundary of the designated property.

The Site originally consisted of approximately 11.08 acres of grass-covered land within one (1) land parcel owned by Aga Khan Foundation U.S.A. (AKF-USA). The Site is being developed into the Ismaili Center Houston (ICH), which will consist of an educational/cultural outreach building with landscaped grounds and below-ground parking. The Site is located in a high-rent district in downtown Houston and is surrounded by mixed-use, multi-family residential and commercial properties within 500 ft to the east, west and, south; a cemetery directly to the east; and a public park directly to the north between the Site and Buffalo Bayou, the major drainage feature within the City. With the exception to the multi-family properties immediately to the east, the properties to north, south, and west are separated from the Site with public streets.

Before acquisition by AKF, the Site was owned and operated by various commercial and/or industrial entities. As stated by PSI in their April 30, 2019 Phase I ESA report:

The site was developed by 1925 with multiple dwelling structures on the southeastern portion and Smith Brothers Concrete Mixing & Asphalt MFG. By the early 1950s, the Houston Lighting & Power Co. [HL&P] occupied the southwestern portion, multiple dwelling structures occupied the southeastern portion and Sears - Roebuck& Co. occupied the northern portion. Houston Lighting & Power Co. was noted with a "filling station" and repair shop on the western boundary of the site. By the late 1960s, the southern portion remains occupied by Houston Lighting & Power Co. with the dwelling structures now demolished and occupied with parking areas. The northern portion of the site was occupied by the Robinson Public Warehouse Co. in the late 1960s. These structures remained relatively unchanged with similar activities conducted until the early 2000s. By 2008, all structures were demolished and the site was noted as grass-covered land.

PSI also noted a rail spur along the eastern boundary of the Site and stated that the HL&P facility had been assigned a Solid Waste Registration number by the Texas Commission on Environmental Quality (TCEQ). TCEQ granted HL&P closure with No Further Action with respect to monitoring or remediation of hazardous materials, indicating that TCEQ considered the Site closed for further regulatory action. PSI noted the following ASTM-defined recognized environmental conditions:

Although granted Final concurrence by the TCEQ, the decades of fuel tank usage, repair facilities and unknown housekeeping practices of prior occupants, the historical activities at the site are considered a REC. This assessment has revealed the following evidence of RECs in connection with the subject property.

- Railroad spur identified on the eastern portion of the site, from the early 1920s until the mid-1990s.
- Prior PCB storage associated with the Houston Lighting & Power, located on the site from the early 1950s until the early 2000s.

- Identification of two (2) 250-gallon USTs "filled in place" and listed as installed in 1952 until approximately 1989.

The RECs discovered by PSI served as the basis for the rationale for conducting the TCEQ APAR.

## **Appendix C**

**A site map showing:**

- a. The location of the designated property.**
- b. The topography of the designated property as indicated on publicly available sources, which must note the watershed including the nearest surface water body and whether the designated property is located in a floodplain or floodway, as those terms are defined in Chapter 19 of the Code of Ordinances.**
- c. The detected area of groundwater contamination.**
- d. The location of all soil sampling locations and all groundwater monitoring wells.**
- e. Groundwater gradients, to the extent known, and direction of groundwater flow.**
- f. The ingestion protective concentration level exceedance zone for each contaminant of concern, to the extent known.**
- g. Depth to groundwater for each affected zone.**

Attached appendices retain their APAR designation, if applicable. Otherwise, Appendix C denotes MSD specific appendices.

**Table 5D – Groundwater Measurement Summary**

The groundwater monitoring program resulted in 16 wells that were sampled at least twice but for the majority at least four times over quarterly events. Where wells have been sampled less than four times, it is because they have become dry through construction dewatering or through inaccessibility caused by construction work. The off-site wells have been sampled twice, and all

remaining on-site wells will be monitored along with off-site wells semiannually per TCEQ instructions. A summary of the status of the wells is presented as follows:

MW-1: destroyed or covered with construction materials

MW-2: Plugged & Abandoned (P&A'd)

MW-3: P&A'd

MW-4: destroyed or covered with construction materials

MW-5: destroyed or covered with construction materials

MW-6: dry from construction dewatering

MW-7: P&A'd

MW-8: P&A'd

MW-9: P&A'd

MW-10: dry from construction dewatering

MW-11: accessible but inaccessible on more recent events due to construction work; dewatering impacts unknown.

MW-12: P&A'd

MW-13: P&A'd

MW-14: P&A'd

MW-15: off-site well

MW-16: off-site well

Legend:

20.52 – 10/12/2021

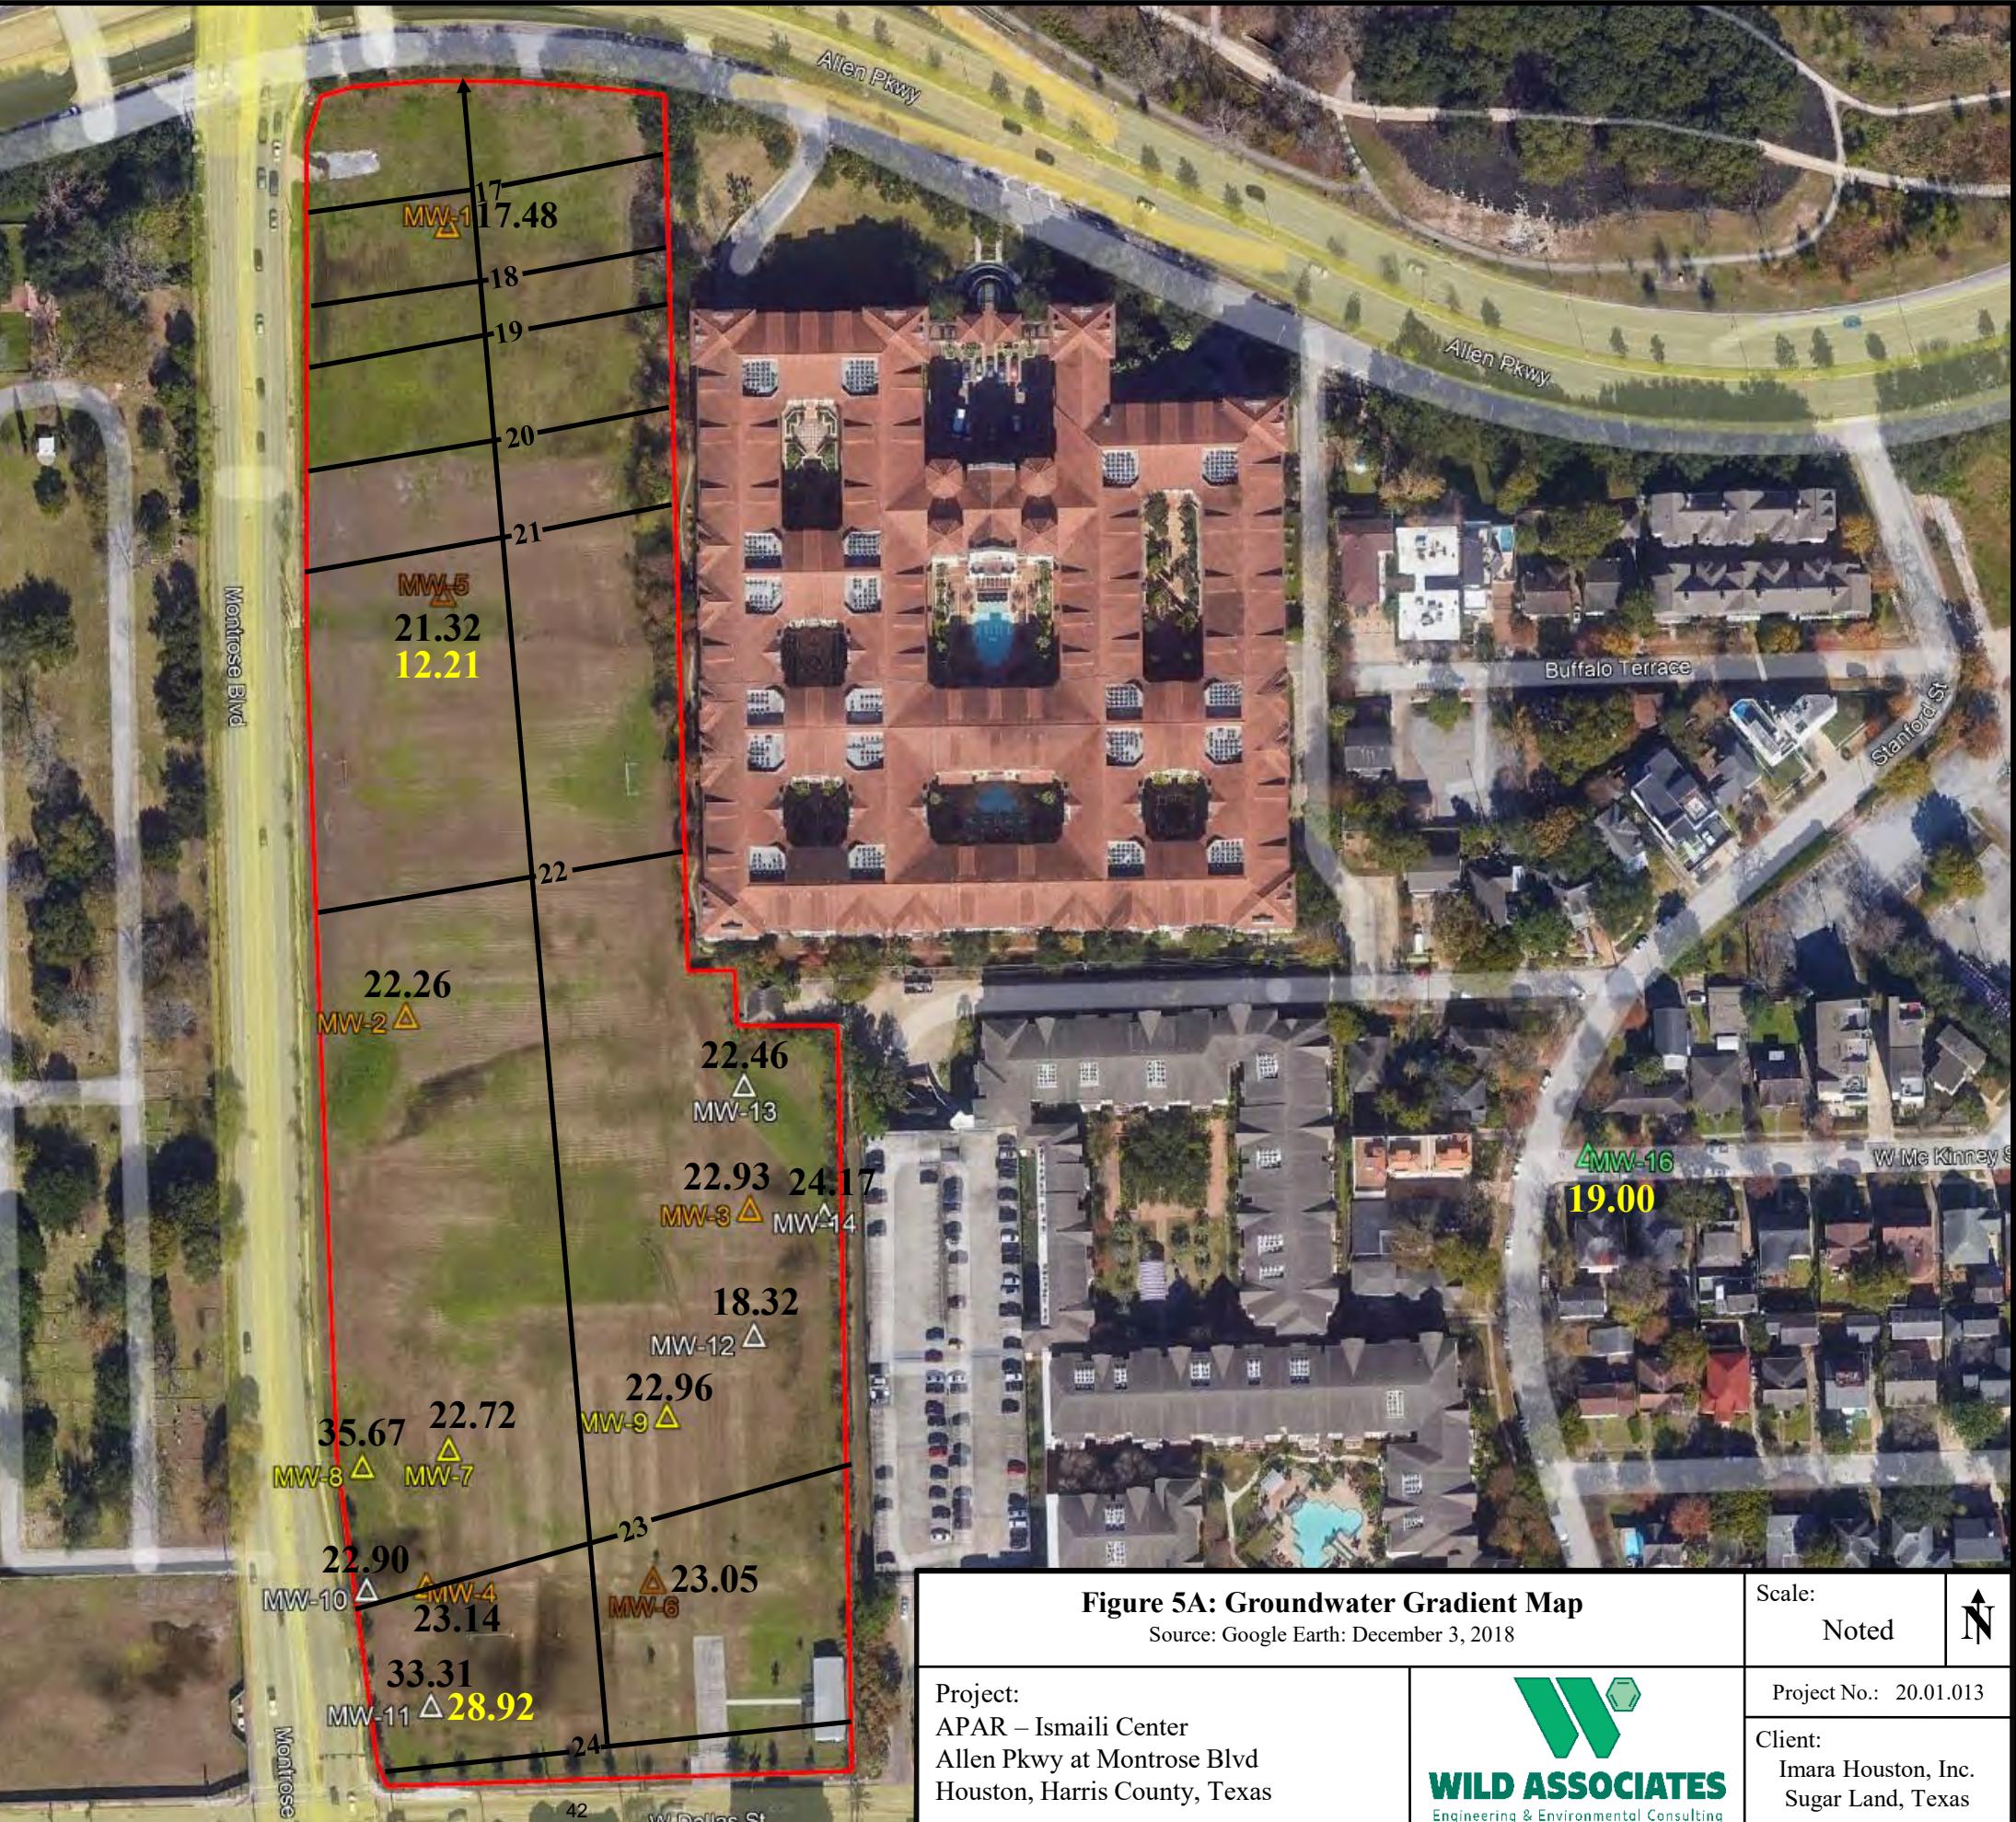

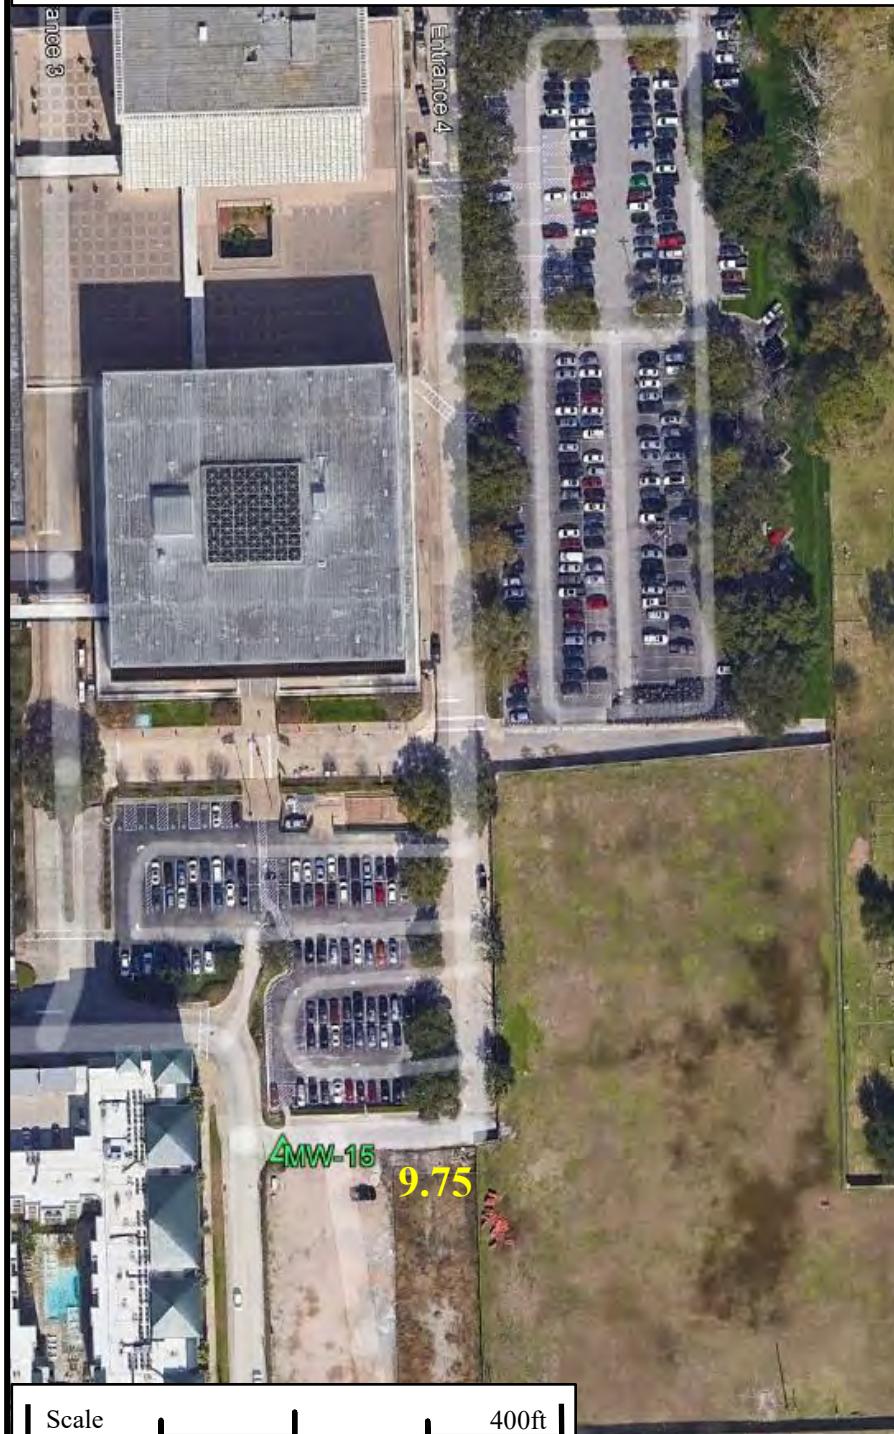

20.63 – 5/6/2022

\*Groundwater elevations expressed in ft above mean sea level.

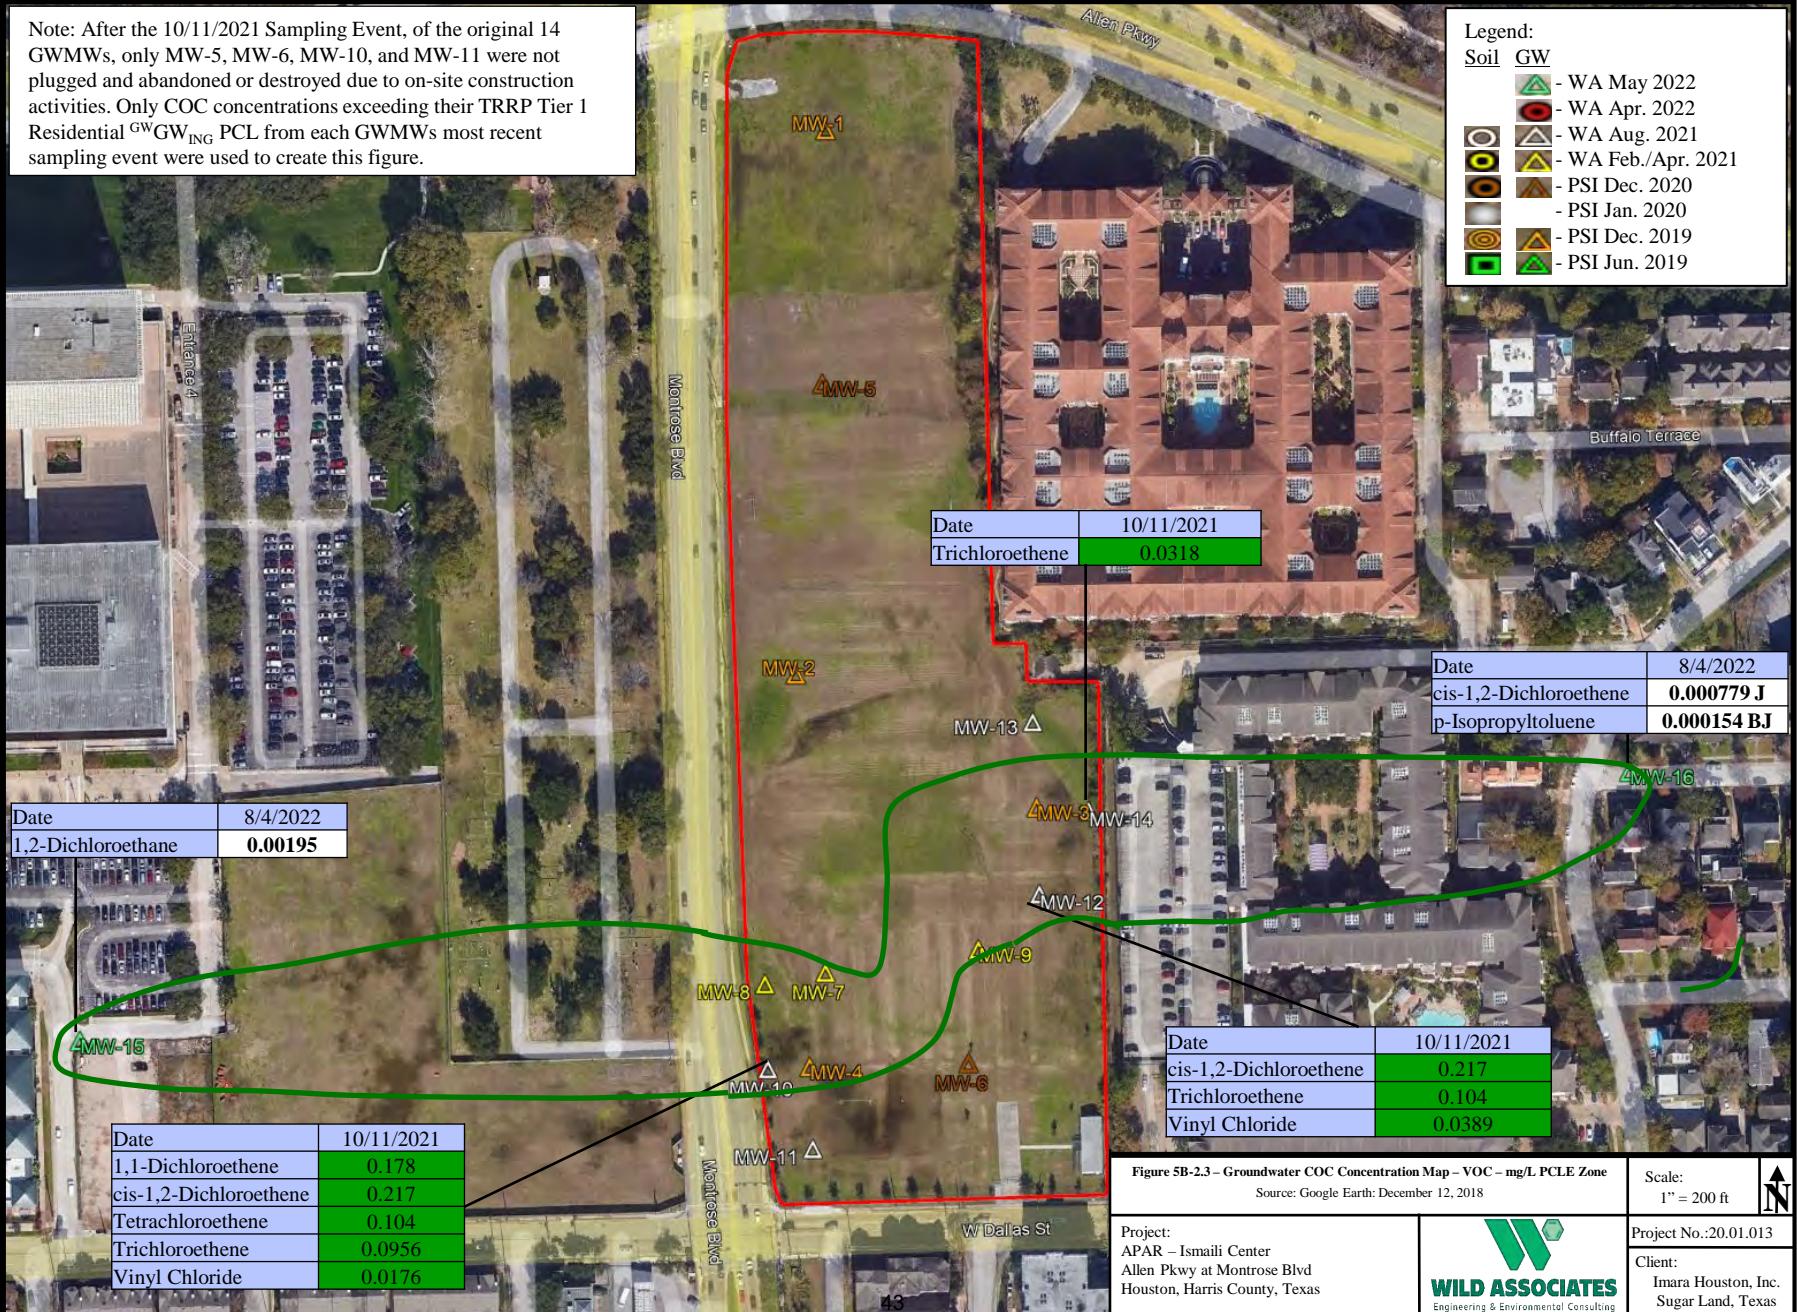

\*Groundwater gradient map based off of the last sampling event that included the original 14 on-site MWs (10/12/2021).

Note- MW-8, MW-11, and MW-12 readings from 10/11/2021 not used for gradient due to interference from on-site dewatering.

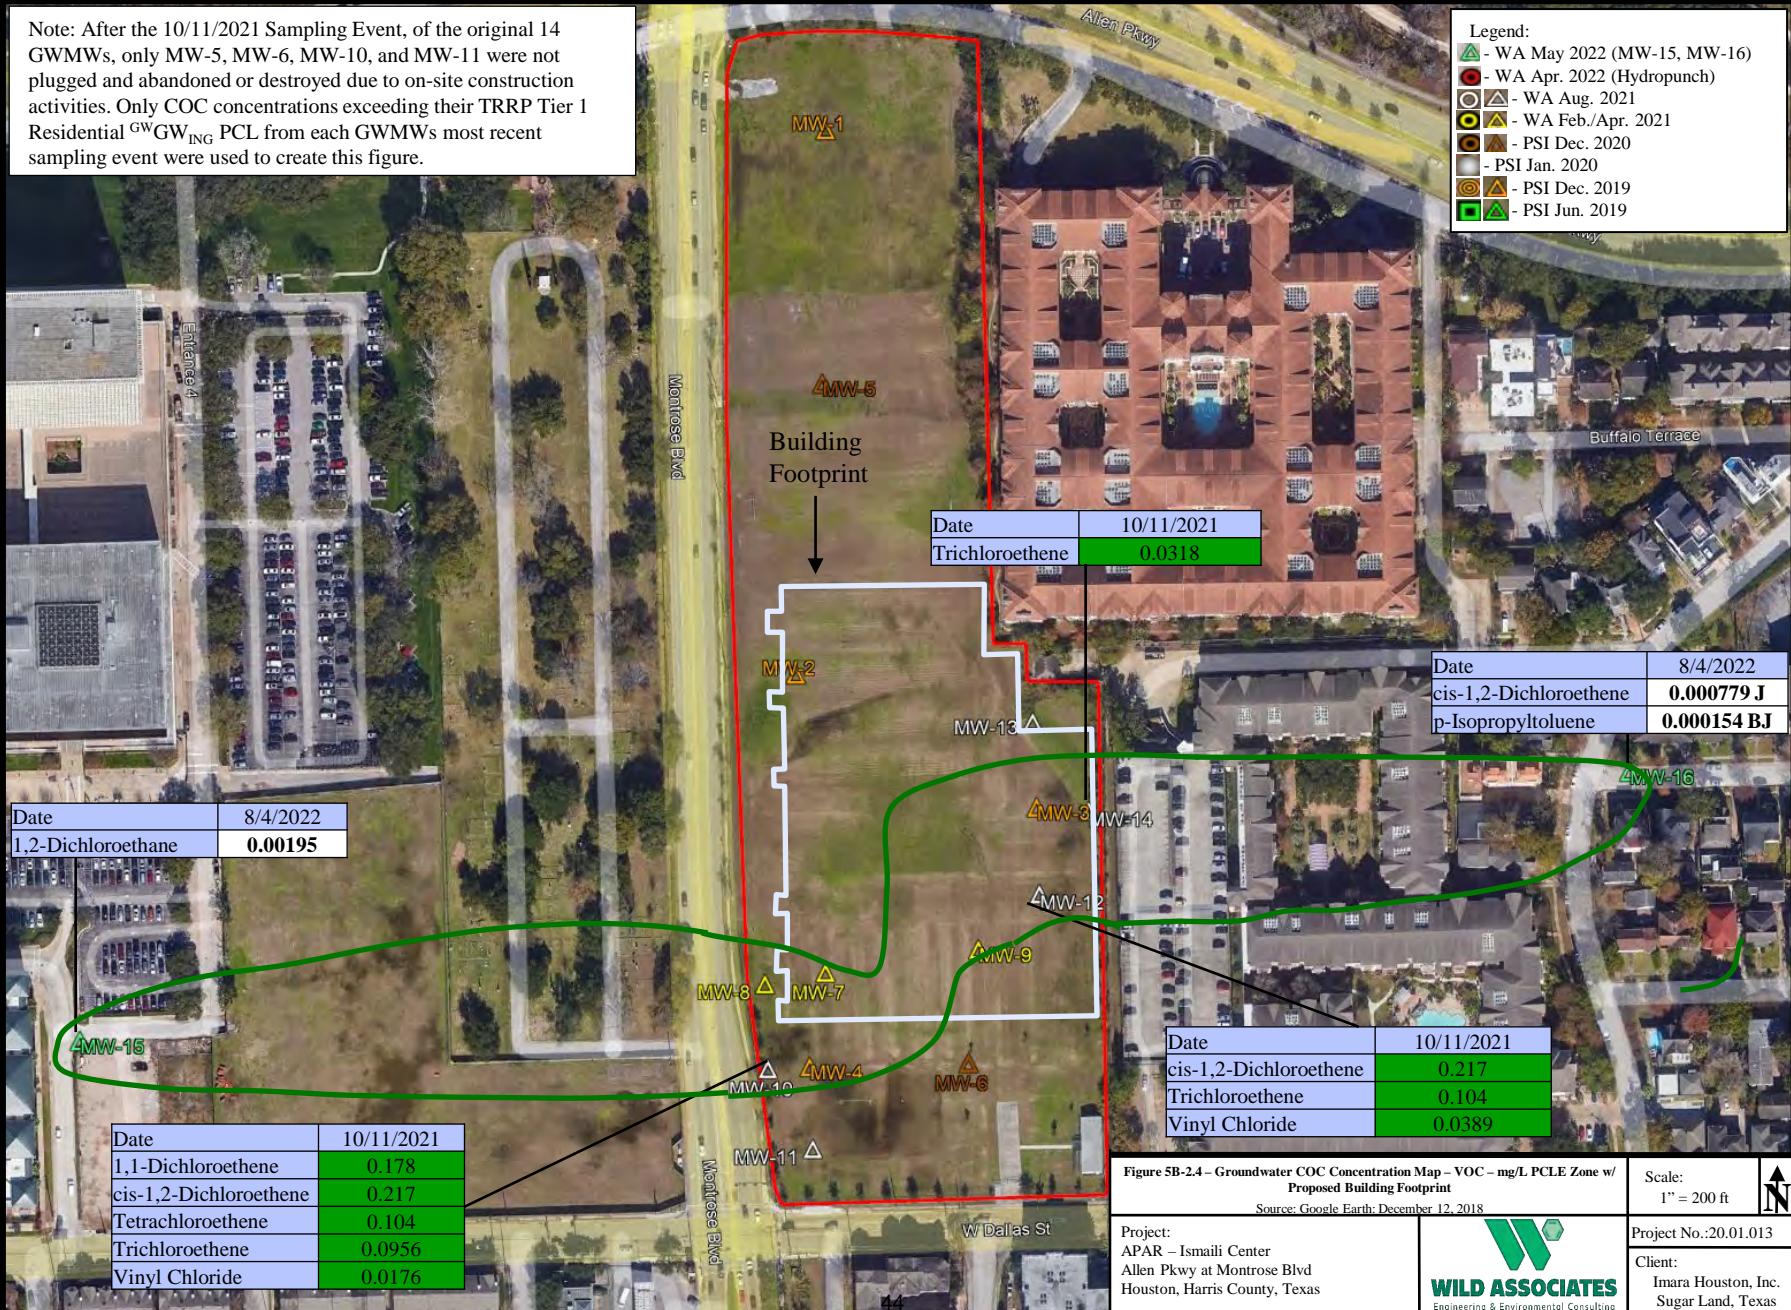

Note- 5/6/2022 is the most recent sampling event with on-site and off-site groundwater readings. This sampling event is not used for gradient due to interference from on-site dewatering activities, lack of MWs due to P&A of majority of MWs, and distance of MW-15 and MW-16 from the Site.

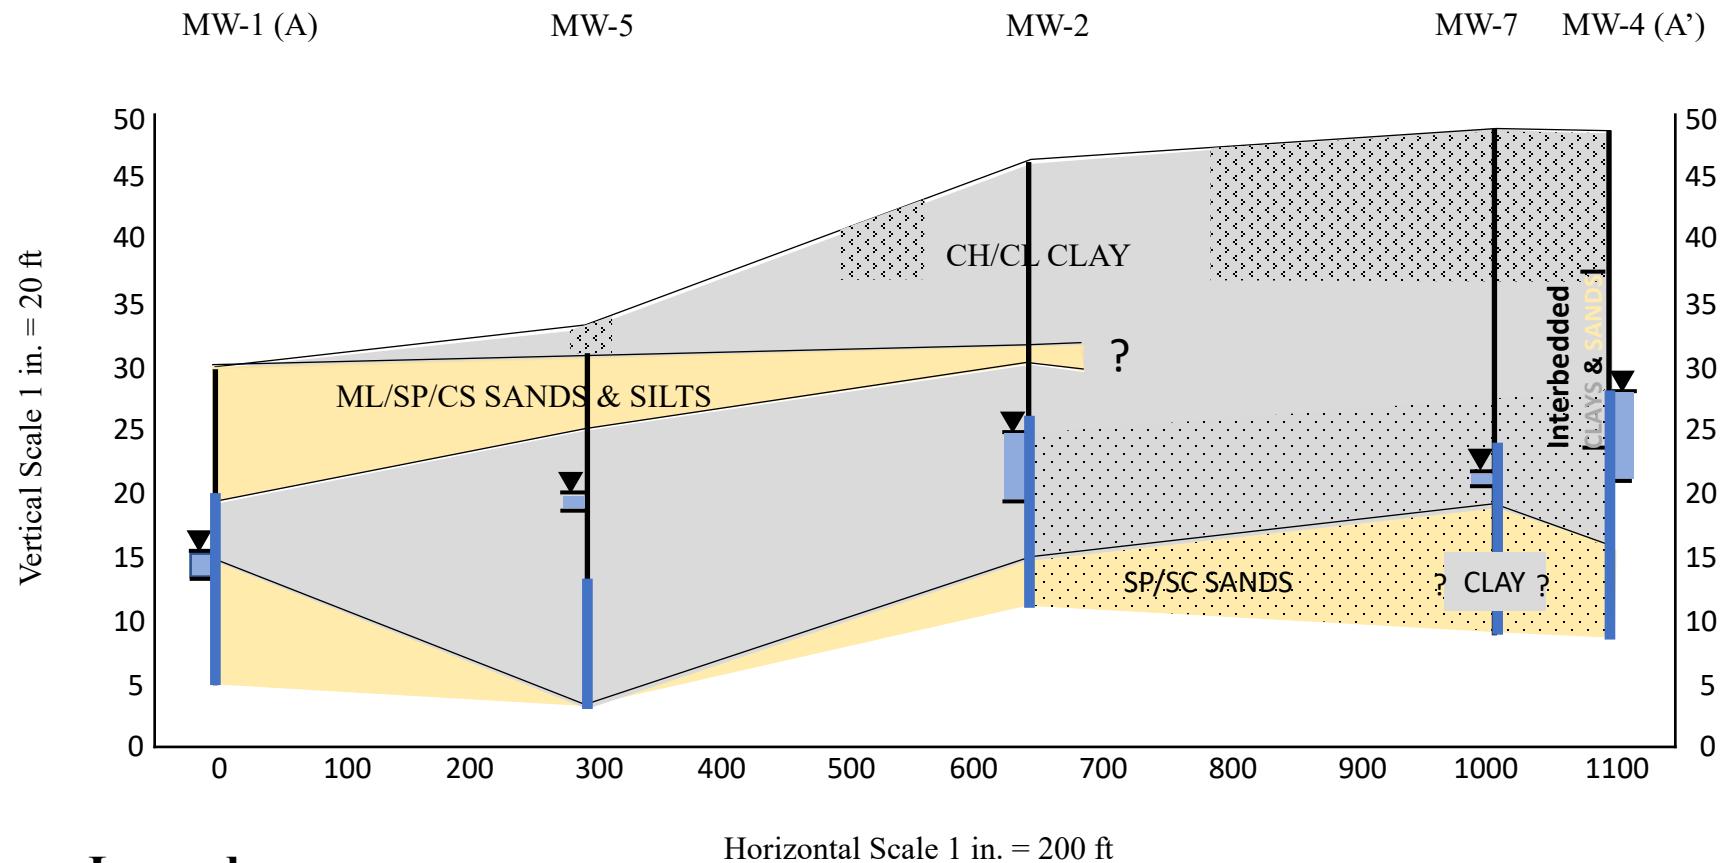

Note: After the 10/11/2021 Sampling Event, of the original 14 GWMWs, only MW-5, MW-6, MW-10, and MW-11 were not plugged and abandoned or destroyed due to on-site construction activities. Only COC concentrations exceeding their TRRP Tier 1 Residential GW PCL from each GWMWs most recent sampling event were used to create this figure.

Note: After the 10/11/2021 Sampling Event, of the original 14 GWMWs, only MW-5, MW-6, MW-10, and MW-11 were not plugged and abandoned or destroyed due to on-site construction activities. Only COC concentrations exceeding their TRRP Tier 1 Residential GWING PCL from each GWMWs most recent sampling event were used to create this figure.

\*Elevations relative to MSL (NAVD 88)

TOC=Top of Casing

GWBU=Groundwater Bearing Unit

MSL=Mean Sea Level

N/A=Not Available

P&A=Plugged & Abandoned

D/M=Destroyed or Missing

## **Appendix D**

**Provide for each contaminant of concern within the designated groundwater:**

- a. A description of the ingestion protective concentration level exceedance zone and the non-ingestion protective concentration level exceedance zone, including a specification of the horizontal area and the minimum and maximum depth belowground surface.**
- b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.**
- c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water).**

Based on data from nine (9) groundwater monitoring events in December 2019, January 2020, December 2020, March 2021, April 2021, August 2021, October 2021, May 2022, and August 2022, arsenic (ranging from 0.0103 to 0.0261 milligrams per liter [mg/L]) and chlorinated VOCs (1,1-dichloroethene [0.00793 to 0.222 mg/L]; cis-1,2-dichloroethene [0.0728 to 0.28 mg/L]; tetrachloroethene [0.00536 to 0.177 mg/L]; trichloroethene [0.00549 to 0.145 mg/L]; and vinyl chloride [0.0025 to 0.0389 mg/L]) exceed their TRRP Tier 1 Residential <sup>GW</sup>GW<sub>ING</sub> PCL (ingestion PCL), which is the critical Residential PCL without an MSD in place.

The TRRP Tier 1 Residential <sup>GW</sup>GW<sub>ING</sub> PCLs for the applicable COCs are 0.01 mg/L for arsenic, 0.007 mg/L for 1,1-dichloroethene, 0.07 mg/L for cis-1,2-dichloroethene, 0.005 mg/L for tetrachloroethene, 0.005 mg/L for trichloroethene, and 0.002 mg/L for vinyl chloride. All CoC concentrations, except arsenic, fall well below their TRRP Tier 1 Residential <sup>AIR</sup>GW<sub>INH-V</sub> PCL (non-ingestion PCL) of 220 mg/L for 1,1-dichloroethene, 160 mg/L for cis-1,2-dichloroethene, 64 mg/L for tetrachloroethene, 3.1 mg/L for trichloroethene, and 0.49 mg/L for vinyl chloride. Arsenic does not have an applicable <sup>AIR</sup>GW<sub>INH-V</sub> PCL. However, Dr. Mike Duffin (TCEQ July 2021 letter in Executive Summary attachments) considers the arsenic levels low enough to be naturally occurring and not requiring further delineation or consideration as a COC.

The chlorinated VOC COCs are confined to the upper tier in the southern half of the Site associated with the footprints of the former HL&P facility and rail spur. The affected groundwater-bearing unit (GWBU) underlies the footprint of the future ICH building and subgrade garage and extends west and east off-site. The well point pumping program will alter the gradient and amplify flow toward the excavation. The horizontal extent of the ingestion protective concentration level exceedance zone is depicted in Appendix C-f.

Chlorinated VOCs are denser than water, but the detected concentrations are within their solubility limits, indicating they would migrate in all directions in the dissolved phase. The impacted GWBU consists of interbedded layers of saturated clayey sand and sandy clay extending from approximately 14 ft to 35 ft bgs. The GWBU is depicted in Appendix C-g.

## **Appendix E**

**A table displaying the following information for each contaminant of concern, to the extent known:**

- a. The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/kg for soils and mg/L for groundwater.**
- b. The critical protective concentration level without the municipal setting designation, highlighting any exceedances.**

Cumulative data tables displaying the concentration levels of COCs in soil and groundwater (including maximum concentration levels), the ingestion PCLs, the non-ingestion PCLs, and the critical PCLs with and without the MSD, highlighting any exceedances are provided in the below attached Tables:

- Table 4D-1 – Metals
- Table 4D-2 – VOC
- Table 4D-3 – SVOC
- Table 4D-4 – TPH
- Table 4D-5 – PCB
  
- Table 5D-1 – Metals
- Table 5D-2 – VOC
- Table 5D-3 – SVOC
- Table 5D-4 – TPH
- Table 5D-5 – PCB

Attached appendices retain their APAR designation, if applicable. Otherwise, Appendix E denotes MSD specific appendices.

30 Acres PCL

Highlighted Values Exceed Texas-Specific, Site-Specific, PCL Limits, and have not been Screened Out

Bold values indicate lab detection

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level

per TRRP-14 Note 4, pg. 9 (Jan. 2019).

\*Metal screened out as a COC and is not highlighted for an exceedence of a critical PCL

\*\*Indicates COC ND results adjusted to half the SQL for purposes of comparison to T1 PCL.

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

O1 - The analyte failed the method required serial dilution test and/or subsequent post-spike criteria.

These failures indicate matrix interference.

V - The sample concentration is too high to evaluate accurate spike recoveries.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed Texas-Specific, Site-Specific, PCL Limits, and have not been Screened Out

Bold values indicate lab detection

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level

per TRRP-14 Note 4, pg. 9 (Jan. 2019).

\*Metal screened out as a COC and is not highlighted for an exceedance of a critical PCL

\*\*Indicates COC ND results adjusted to half the SQL for purposes of comparison to T1 PCL.

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

O1 - The analyte failed the method required serial dilution test and/or subsequent post-spike criteria.

These failures indicate matrix interference.

V - The sample concentration is too high to evaluate accurate spike recoveries.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed Texas-Specific, Site-Specific, PCL Limits, and have not been Screened Out

Bold values indicate lab detection

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level

per TRRP-14 Note 4, pg. 9 (Jan. 2019).

\*Metal screened out as a COC and is not highlighted for an exceedence of a critical PCL

\*\*Indicates COC ND results adjusted to half the SQL for purposes of comparison to T1 PCL.

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

O1 - The analyte failed the method required serial dilution test and/or subsequent post-spike criteria.

These failures indicate matrix interference.

V - The sample concentration is too high to evaluate accurate spike recoveries.

30 Acres PCL

Highlighted Values Exceed Texas-Specific, Site-Specific, PCL Limits, and have not been Screened Out

Bold values indicate lab detection

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level

per TRRP-14 Note 4, pg. 9 (Jan. 2019).

\*Metal screened out as a COC and is not highlighted for an exceedance of a critical PCL

\*\*Indicates COC ND results adjusted to half the SQL for purposes of comparison to T1 PCL.

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

O1 - The analyte failed the method required serial dilution test and/or subsequent post-spike criteria.

These failures indicate matrix interference.

V - The sample concentration is too high to evaluate accurate spike recoveries.

30 Acres PCL

Highlighted Values Exceed Texas-Specific, Site-Specific, PCL Limits, and have not been Screened Out

Bold values indicate lab detection

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level

per TRRP-14 Note 4, pg. 9 (Jan. 2019).

\*Metal screened out as a COC and is not highlighted for an exceedence of a critical PCL

\*\*Indicates COC ND results adjusted to half the SQL for purposes of comparison to T1 PCL.

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

O1 - The analyte failed the method required serial dilution test and/or subsequent post-spike criteria.

These failures indicate matrix interference.

V - The sample concentration is too high to evaluate accurate spike recoveries.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed Texas-Specific, Site-Specific, PCL Limits, and have not been Screened Out

Bold values indicate lab detection

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level

per TRRP-14 Note 4, pg. 9 (Jan. 2019).

\*Metal screened out as a COC and is not highlighted for an exceedence of a critical PCL

\*\*Indicates COC ND results adjusted to half the SQL for purposes of comparison to T1 PCL.

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

O1 - The analyte failed the method required serial dilution test and/or subsequent post-spike criteria.

These failures indicate matrix interference.

V - The sample concentration is too high to evaluate accurate spike recoveries.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed State-Specific, Site-Specific, and PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per TRRP-14 Note 4, pg. 9 (Jan. 2019).

B - The same analyte is found in the associated blank.

J - The identification of the analyte is acceptable; the reported value is an estimate.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed State-Specific, Site-Specific, and PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per TRRP-14 Note 4, pg. 9 (Jan. 2019).

B - The same analyte is found in the associated blank.

J - The identification of the analyte is acceptable; the reported value is an estimate.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed State-Specific, Site-Specific, and PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per TRRP-14 Note 4, pg. 9 (Jan. 2019).

B - The same analyte is found in the associated blank.

J - The identification of the analyte is acceptable; the reported value is an estimate.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed State-Specific, Site-Specific, and PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per TRRP-14 Note 4, pg. 9 (Jan. 2019).

B - The same analyte is found in the associated blank.

J - The identification of the analyte is acceptable; the reported value is an estimate.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per TRRP-14 Note 4, pg. 9 (Jan. 2019).

J - The identification of the analyte is acceptable; the reported value is an estimate.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per TRRP-14 Note 4, pg. 9 (Jan. 2019).

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

30 Acres PCL

Highlighted Values Exceed PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per

TRRP-14 Note 4, pg. 9 (Jan. 2019).

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

J4 - The associated batch QC was outside the established quality control range for accuracy.

B - The same analyte is found in the associated blank.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per

TRRP-14 Note 4, pg. 9 (Jan. 2019).

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

J4 - The associated batch QC was outside the established quality control range for accuracy.

B - The same analyte is found in the associated blank.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per

TRRP-14 Note 4, pg. 9 (Jan. 2019).

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

J4 - The associated batch QC was outside the established quality control range for accuracy.

B - The same analyte is found in the associated blank.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

30 Acres PCL

Highlighted Values Exceed PCL Limit

NT - Not Tested

Non-detected result that exceeds PCL. Treated as residential assessment level per

TRRP-14 Note 4, pg. 9 (Jan. 2019).

J - The identification of the analyte is acceptable; the reported value is an estimate.

J3 - The associated batch QC was outside the established quality control range for precision.

J4 - The associated batch QC was outside the established quality control range for accuracy.

B - The same analyte is found in the associated blank.

Maximum Concentration Level of Chemical of Concern Exceeding PCL

## Appendix F

**If the plume extends beyond the limits of property owners listed in this application, list the owners of the additional property beneath which the plume(s) extend(s), and a summary of interactions with those property owners about the plume(s) and this MSD application. Please Note: You are not required under this item to notify affected property owners, only to provide a summary of who affected property owners are, and if there have been any communications. "No contact" can be an acceptable answer.**

The groundwater plume extends west beneath the City of Houston right-of-way (Montrose Boulevard) and east towards Stanford Street as depicted in Appendix C-f; however, no impacts are present across Jackson Street or Ruiz Street from the Site. The groundwater plume does not extend beneath any additional properties. The list of property owners where the plume extends is presented below. The property owners have not been notified about the APAR findings or this MSD application.

The City of Houston is an affected property owner. The extent of the groundwater plume and its relation to the City of Houston right of ways have been discussed with the City's MSD division through prior conversations and emails.

## **Appendix G**

**A statement as to whether the source of the plume has been removed, the plume of contamination is stable (i.e. no change) or contracting, and the plume is delineated, with the basis for that statement. Please include historical sampling data.**

### **The source of the groundwater plume has been removed.**

The presumed sources for the contamination at the Site are:

- A former rail spur located along the eastern Site boundary running from the northern boundary to the southern boundary. Metals were identified as COCs for the APAR and may have had their source as the rail spur.
- PCB transformers at the HL&P facility (SWR 32594). PCBs were not identified as a COC for the APAR.
- Spent solvents at the HL&P facility. Chlorinated VOCs were identified as COCs for the APAR.
- Two 250-gallon underground storage tanks (USTs) described as “filled in place.” TPH was identified as a COC for the APAR.

The USTs, rail spur, and HL&P facility no longer exist. The Subject Site was a grass field at the beginning of assessment activities and is currently undergoing construction for the Ismaili Center. The TCEQ Central Registry database identified SWR 32594 to seven (7) waste management units; however, only one (1) unit was constructed (WMU 001) that may have potentially managed chlorinated hydrocarbon waste materials. This WMU and SWR were closed out by TCEQ on November 21, 2005.

### **The plume contamination is stable.**

Based on data from nine (9) groundwater monitoring events in December 2019, January 2020, December 2020, March 2021, April 2021, August 2021, October 2021, May 2022, and August 2022, the plume is maintaining a stable band extending east/west in the southern portion of the Subject Site. The impacted groundwater zone on the Site has been reduced via removal of soils in the GWBU for the below-ground parking garage, such that COC loadings to the system have been reduced. This is to say that the source materials that originally impacted soils and groundwater have been largely removed.

### **The plume is delineated.**

The 1,1-dichloroethene, cis-1,2-dichloroethene, tetrachloroethene, trichloroethene, and vinyl chloride concentrations in monitoring wells to the north (MW-1, MW-2, MW-5, and MW-13), east (MW-16), south (MW-6 and MW-11), and west (MW-15) were all non-detect or below their respective <sup>GW</sup>GW<sub>ING</sub> PCLs. The plume extent and delineation are depicted in Appendix C-f, and summarized sampling data tables are attached in Appendix E. Mike Duffin with TCEQ concurs that the plume has been delineated in the attached TCEQ letter, dated July 22, 2022 (Executive Summary attachment).

## **Appendix H**

**A statement as to whether contamination on and off the designated property without a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.**

Based on data from nine (9) groundwater monitoring events in December 2019, January 2020, December 2020, March 2021, April 2021, August 2021, October 2021, May 2022, and August 2022, arsenic (ranging from 0.0103 to 0.0261 milligrams per liter [mg/L]) and chlorinated VOCs (1,1-dichloroethene [0.00793 to 0.222 mg/L]; cis-1,2-dichloroethene [0.0728 to 0.28 mg/L]; tetrachloroethene [0.00536 to 0.177 mg/L]; trichloroethene [0.00549 to 0.145 mg/L]; and vinyl chloride [0.0025 to 0.0389 mg/L]) exceed their TRRP Tier 1 Residential <sup>GW</sup>GW<sub>ING</sub> PCL (ingestion PCL), which is the critical Residential PCL without an MSD in place.
