City of Houston
Municipal Setting Designations (MSD) – Sampling Requirements after MSD Approval Executive Order 1-72 (EO 1-72)
Acknowledgement Form

ExxonMobil Environmental and Property Solutions **("MSD Applicant")** has filed or is filing an application for a City of Houston Municipal Setting Designation (MSD). The MSD Applicant acknowledges and understands that such MSD application, whether previously filed or being filed at this time, was not approved prior to June 5, 2023, and is therefore subject to **City of Houston Executive Order 1-72 ("EO 1-72") - "MUNICIPAL SETTING DESIGNATIONS – Sampling Requirements after MSD Approval", effective as of June 5, 2023** (copy attached)**.**

In accordance with the Code of Ordinance of the City of Houston, Texas, Article XIII ("Municipal Setting Designations), Sec. 47-762d)(24) and EO 1-72, the MSD Applicant acknowledges and agrees to abide by the requirements established in EO 1-72 as set forth below:

1. On and after June 5, 2023 (the effective date of **EO 1-72**), an MSD Applicant whose MSD application is approved ("**Approved MSD Applicant**") is subject to the following additional requirements:
    a. An Approved MSD Applicant shall continue to conduct sampling in accordance with a TCEQ, EPA, or comparable remediation program that is effective at the time an MSD application is approved by the City.
2. An Approved MSD Applicant shall notify the City within 30 days after receiving notice that the sampling required by a TCEQ or EPA or comparable remediation program is discontinued or terminated within the first four years after the date of approval of an MSD.

3. If sampling is discontinued, as identified above, an **Approved MSD Applicant will thereafter be subject to the sampling requirements set forth below**:

    a. If the site of the approved MSD is not subject to any continuing sampling requirements under a TCEQ, EPA, or comparable remediation program, then an Approved MSD Applicant shall conduct and report to the City and TCEQ the results of sampling for COCs identified during the MSD application process on the following schedule:

        i. Four years after the date of MSD approval by the TCEQ, and

        ii. Seven years after the date of MSD approval by the TCEQ.

    b. An Approved MSD Applicant shall comply with any additional response action(s) required by TCEQ, EPA, or a comparable remediation program that is based on or arises because of the sampling conducted pursuant to subparagraph 3.a. above.

Fill out all information below and submit this form with your application packet.

Municipal Setting Designation
Application Instructions

Pre-Application Meeting: While a pre-application meeting is not mandatory, it is strongly encouraged to discuss the specific details of the site. Please note: the City of Houston will not support a Municipal Settings Designation (MSD) application unless a Professional Geologist (P.G.) or Professional Engineer (P.E.) has certified that the groundwater plume is stable or decreasing, fully delineated, and the source has been removed. This statement should be supported with historical groundwater monitoring data showing the plume as stable or declining, and fully delineated.

Please contact Antoinette Warr at 832-394-8965, Antoinette.Warr@houstontx.gov to schedule a pre-application meeting. Meetings will be held at 1002 Washington, Houston, TX 77002

Application Form: For the application to be complete please submit the following:

1) One (2) hard copy of the application (the well logs are not necessary for the hard copies but should be included in the electronic copy). Please separate the application appendices with divider sheets that are tabbed.
2) A completed Acknowledgement form must be included in packet.
3) An electronic portable digital file of the application including all supporting material **(SharePoint preferred)**
4) An electronic Excel file with mailing addresses for water well owners and property owners. (Templates can be found on the MSD website, https://www.houstonpublicworks.org/municipal-settings-designation)

The MSD application process is governed by Chapter 47, Article XIII of the City of Houston's Code of Ordinances (ordinance number 2007-959 and amended by ordinance number 2010-556). Failure to use this application form may result in denial of the application.

Please note, the City ordinance requires the Professional Engineer (P.E.) or Professional Geologist (P.G.) who signed the application, or someone that is familiar with the application, and the applicant or their legal representative (attorney) to be present at public meeting and public hearing. Failure of the required parties in attendance at the public meeting and public hearing will result in having to schedule a new meeting or hearing.

The application should be clear, complete, concise, correct, contain only relevant information and be organized to facilitate analysis. Supporting documentation should be submitted as a separate appendix to the application, as noted (Label "Appendix") for each numbered item.

Submittal: Submit the application form and all supporting information, along with an application fee of $3,000.00 (payable to City of Houston) to the address below. The applicant must pay for the cost of advertising (approximately $500 per advertisement add for public meeting) and the cost of producing and mailing notices, (approximately $6.50 per certified mail and $1.50 per first-class mail), and any applicable venue costs (costs vary by location). Mailings are done through the U.S. Post Office's Click2Mail system. Applicant will set up a (Joint) Click2Mail account giving COH access to username and password. At the time of mail outs, the applicant will pay by credit card directly to the U. S. Post Office's Click2Mail for processing and mailing the notices. The applicant will provide receipt of payment to COH.

ITEM	COH Use Only
Executive Summary	
1. Provide a legal description of the boundaries of the designated property, including metes and bounds, and a **copy of the deed** for the property. A professional surveyor currently registered with the Texas Board of Professional Surveying must certify that all property descriptions with metes and bounds are accurate. ***Label "Appendix A"***	
2. A description of the current use and, to the extent known, the anticipated use(s) of the designated property and properties within 500 feet of the boundary of the designated property. ***Label "Appendix B"***	
3. A site map showing. **Label & address each separately, i.e., a, b, c, d, e, f, g** a. The location of the designated property. b. The topography of the designated property as indicated on publicly available sources, which must note the watershed including the nearest surface water body and whether the designated property is located in a floodplain or floodway, as those terms are defined in Chapter 19 of the Code of Ordinances. c. The detected area of groundwater contamination. d. The location of all soil sampling locations and all groundwater monitoring wells. e. Groundwater gradients, to the extent known, and direction of groundwater flow. f. The ingestion protective concentration level exceedence zone for each contaminant of concern, to the extent known. g. Depth to groundwater for each affected zone. ***Label "Appendix C"***	
4. List each contaminant of concern within the designated groundwater then describe: a. A description of the ingestion protective concentration level exceedence zone and the non-ingestion protective concentration level exceedence zone, including a specification of the horizontal area and the minimum and maximum depth below ground surface. b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units. c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water). ***Label "Appendix D"***	
5. A table and **graph** displaying the following information for each contaminant of concern, to the extent known: a. The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/kg for soils and mg/L for groundwater. b. The critical protective concentration level without the municipal setting designation, highlighting any exceedences. ***Label "Appendix E"***	

ITEM	COH Use Only
6. If the plume extends beyond the limits of property owners listed in this application, list the owners of the additional property beneath which the plume(s) extend(s), and a summary of interactions with those property owners about the plume(s) and this MSD application. Please Note: You are not required under this item to notify affected property owners, only to provide a summary of who affected property owners are, and if there have been any communications. "No contact" can be an acceptable answer. ***Label "Appendix F"***	
A statement that the plume of contamination is stable (i.e., no change) or contracting and delineated, with the basis for that statement. **Please include historical sampling data and Graph.** ***Label "Appendix G"***	
7. A statement as to whether contamination on and off the designated property without a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement. ***Label "Appendix H"***	
8. A statement as to whether contamination on and off the designated property with a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement. ***Label "Appendix I"***	
Identification and discussion of the points of origin of the contamination, to the extent known. Please list the Potentially Responsible Party (PRP), if unknown, state unknown. (**applications without the PRP listed will be deemed incomplete**) ***Label "Appendix J"***	
9. Environmental regulatory actions, litigation, and plume identification. **Label & address each separately, i.e., a, b, c, d** a. A description of any environmental regulatory actions that have been taken within the past five years in connection with the designated property, to the extent known. b. A description of any litigation that has taken place within the past five years in connection with the designated property, to the extent known. c. A statement as to whether there are any other remediation activities by the applicant, or any other party or agency, which are not listed in the application. *d.* A statement as to which contamination plume and groundwater zone the applicant is including in the MSD. ***Label "Appendix K"***	
10. A listing of all existing state or EPA registrations, permits, and identification numbers that applies to the designated property. ***Label "Appendix L"***	

ITEM	COH Use Only
Provide evidence that the designated property is currently or has previously been under the oversight of the TCEQ or the United States Environmental Protection Agency, as required by the Texas Health & Safety Code § 361.8065(c)(2)(A), and a description of the status of the designated property in the program (the program application number is sufficient evidence). Also, include the state or federal cleanup project manager's name. Please note, the City of Houston does not accept (consider?) sites enrolled in the Innocent Owner/Operator Program due to the lack of state/federal oversight. ***Label "Appendix M"***	
11. A summary of any environmental site assessment reports filed with TCEQ regarding any site investigations or response actions that are planned, ongoing or completed related to the designated property. ***Label "Appendix N"***	
A statement as to whether any public drinking water supply system exists that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and property within one-half mile of the designated property and the identity of each supply system. Please include a map of available water lines within one-half mile found at https://geogimsprod.houstontx.gov/html5viewer/index.html?viewer=geolin-public. ***Label "Appendix O"***	
12. The name and address of each owner or operator of a water well registered or permitted by the state or the Houston-Galveston Subsidence District that is located within five miles of the boundary of the designated property, along with a map showing the location of each well and, to the extent known, a notation of whether each well is used for potable water. Well logs must be included in the electronic copy of the application but should not be included in the hard copies. (An accompanying electronic excel file with mailing information should be included with your application.) **Add Super Neighborhoods & council members in the district to the mailing list.** ***Label "Appendix P"***	
13. The name and address of each retail public utility, as defined in section 13.002 of the Texas Water Code that owns or operates a groundwater supply well within five miles of the boundary of the designated property. ***Label "Appendix Q"***	
14. A listing of each municipality, other than the city of Houston, with a corporate limit within one-half mile of the boundary of the designated property. ***Label "Appendix R"***	
15. A listing of each municipality, other than the city of Houston, that owns or operates a groundwater supply well within five miles of the boundary of the designated property. ***Label "Appendix S"***	
16. A listing of owners of real property within 2,500 ft. of the boundary of the designated property as indicated by the most recent appraisal district records. Please Note: This requirement may include real property outside the City of Houston. Be sure to include **ALL** properties in the 2,500 ft. boundary. (An accompanying electronic excel file with mailing information should be included with your application.) ***Label "Appendix T"***	

ITEM	COH Use Only
17. Form U-2012-01 **signed and sealed** by a licensed professional engineer or licensed professional geoscientist authorized to practice in the State of Texas with expertise in environmental remediation. (Form U-2012-01 can be found at https://www.houstonpublicworks.org/municipal-settings-designation under the "Forms" section on the homepage.) Signing and sealing Form U-2012-01 certifies: a. The contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not [do exceed] OR [do not exceed] a non-ingestion protective concentration level on property beyond the boundaries of the designated property. (select the appropriate statement) b. All requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size. ***Label "Appendix U"***	
18. If the licensed professional engineer or licensed professional geoscientist determines that contaminants of concern from sources on the designated property are migrating from or through the designated property more likely than not do exceed a non-ingestion protective concentration level on property beyond the boundary of the designated property, then the applicant must: a. Specify the name and address of the owner of each property. b. Send a copy of the application to the owner of the property with the notice of the public meeting. c. Provide documentation that the designated property has been included in a state or federal program that requires that the entire non-ingestion protective concentration level exceedence zone be addressed to the satisfaction of the agency administering the program, along with documentation of the estimated time period in which it is to be addressed. An example of such a program is the Texas Voluntary Cleanup Program (section 361.501 of the Texas Health and Safety Code, as may be amended from time to time). d. Provide documentation upon completion of the state or federal program showing that the non-ingestion protective concentration level exceedences have been addressed to the satisfaction of the agency administering the program. ***Label "Appendix V"***	
19. Form W-2012-01 **certified/signed** by the applicant and any authorized representatives of the applicant(s) listed in the application. (Form W-2012-01 is attached to the end of this application and can also be found at https://www.houstonpublicworks.org/municipal-settings-designation under the "Forms" section on the homepage.) ***Label "Appendix W"***	
20. Form X-2012-01 **signed** by the property owner or authorized agent (if an authorized agent, you must provide the legal authorization instrument). (Form W-2012-01 is attached to the end of this application and can also be found at https://www.houstonpublicworks.org/municipal-settings-designation under the "Forms" section on the homepage. ***Label "Appendix X"***	
21. A pdf file of the application, Excel spreadsheet of water well owners and property owners for mailing notices, and the pdf file of the well log report. ***Label "Appendix Y"***	

EXECUTIVE SUMMARY

EXECUTIVE SUMMARY

This MSD application is submitted for the designated property (Site) at 205 and 215 W. Greens Road, Houston, Texas 77067 on behalf of ExxonMobil, the former property owner who retains environmental liability for the property. Documents submitted to the TCEQ identify this property as 217 W. Greens Rd., but they are the same property. This application is also submitted with the concurrence of the landowner, Greens Crossroads, LLC. Groundwater contamination at the Site is the result of a tetrachloroethylene (PCE) release of unknown quantity between 1989 and 1995 by a dry cleaner tenant at 215 W. Greens Road, Clenet Cleaners. The property is currently being used as retail commercial, and its current owner is Greens Crossroads, LLC. The Site is bordered to the east by industrial use property for the bulk storage of petroleum products along the I-45 southbound frontage. The Site is bordered to the south by city-owned property that is currently City of Houston Fire Station 84. The remaining property in the immediate vicinity consists predominantly of commercial, office, and industrial properties along the I-45 freeway and W. Greens Road.

Chemicals of concern (COCs) in groundwater include PCE and its daughter products/degradation byproducts: trichloroethylene (TCE), cis-1,2-dichloroethylene (cis-1,2-DCE), trans-1,2-dichloroethylene (trans-1,2-DCE), 1,1-dichloroethylene (1,1-DCE), and vinyl chloride (VC). This class of chemicals is generally referred to as chlorinated ethenes or chlorinated hydrocarbons. No non-aqueous phase liquid (NAPL) has been observed at the Site during groundwater monitoring, which has been ongoing since 1996.

The designated property has been in a regulatory program since the discovery of groundwater contamination in 1996. It was entered into the Texas Commission on Environmental Quality (TCEQ) Industrial and Hazardous Waste (IHW) Corrective Action Program on November 22, 2002. Its assigned Solid Waste Registration (SWR) ID No. 84495, and its TCEQ Corrective Action Program Project Manager is Mike Duffin. The applicable program rules are Texas Risk Reduction Program (TRRP) rules.

ExxonMobil and its consultants have completed several active remediation measures at the designated property from 1996 to 2003. The first of these was a single-well groundwater recovery and treatment system that ran from 1996 until 2000. After the system's shutdown, two potassium permanganate ($KMnO_4$) injections were completed as in-situ chemical oxidation measures – these injections occurred in October 2000 and May 2001. In January and July 2008, two pilot tests of injected zero valent iron (ZVI) reagent were completed near MW-1 and MW-8S, respectively. This technology removes mass via in-situ chemical reduction of chlorinated ethenes. In 2013, a full-scale implementation of a ZVI and slow-release carbon reagent remedy was completed. This permeable reactive barrier (PRB) was placed via injection through closely-spaced hollow stem auger borings, and it appears that the passive effects of the barrier (enhancement of native microbial attenuation processes) are still ongoing.

In addition to the active remedies deployed at the designated property, there is credible evidence of natural attenuation processes in Site groundwater. The primary line of evidence is a measurable decrease in PCE concentrations coupled with observed increases in the daughter products of PCE. Additionally, secondary lines of evidence, such as total organic carbon concentrations and the presence of dissolved gases (methane, ethane, and ethene) were

evaluated during a three-phase monitored natural attenuation (MNA) demonstration completed between 1998 and 2000.

Routine groundwater monitoring has been ongoing since 1996 and serves as evidence for plume stability at the designated property. Additionally, the dissolved-phase chlorinated ethene plume has been delineated to residential ingestion-based protective concentration levels (PCLs) since October 2016. The PCLE zone for all constituents is contained entirely within the Site, therefore it appears that no groundwater contamination impacts any of the neighboring properties. Careful analysis of the time-series groundwater monitoring data also suggests that PCE concentrations have been declining since 1996, and that the areal extent of the plume (including degradation products) has been stable or contracting since 2012.

As of the most recent groundwater monitoring event completed in November 2023, natural attenuation processes continue to occur and the plume remains stable.

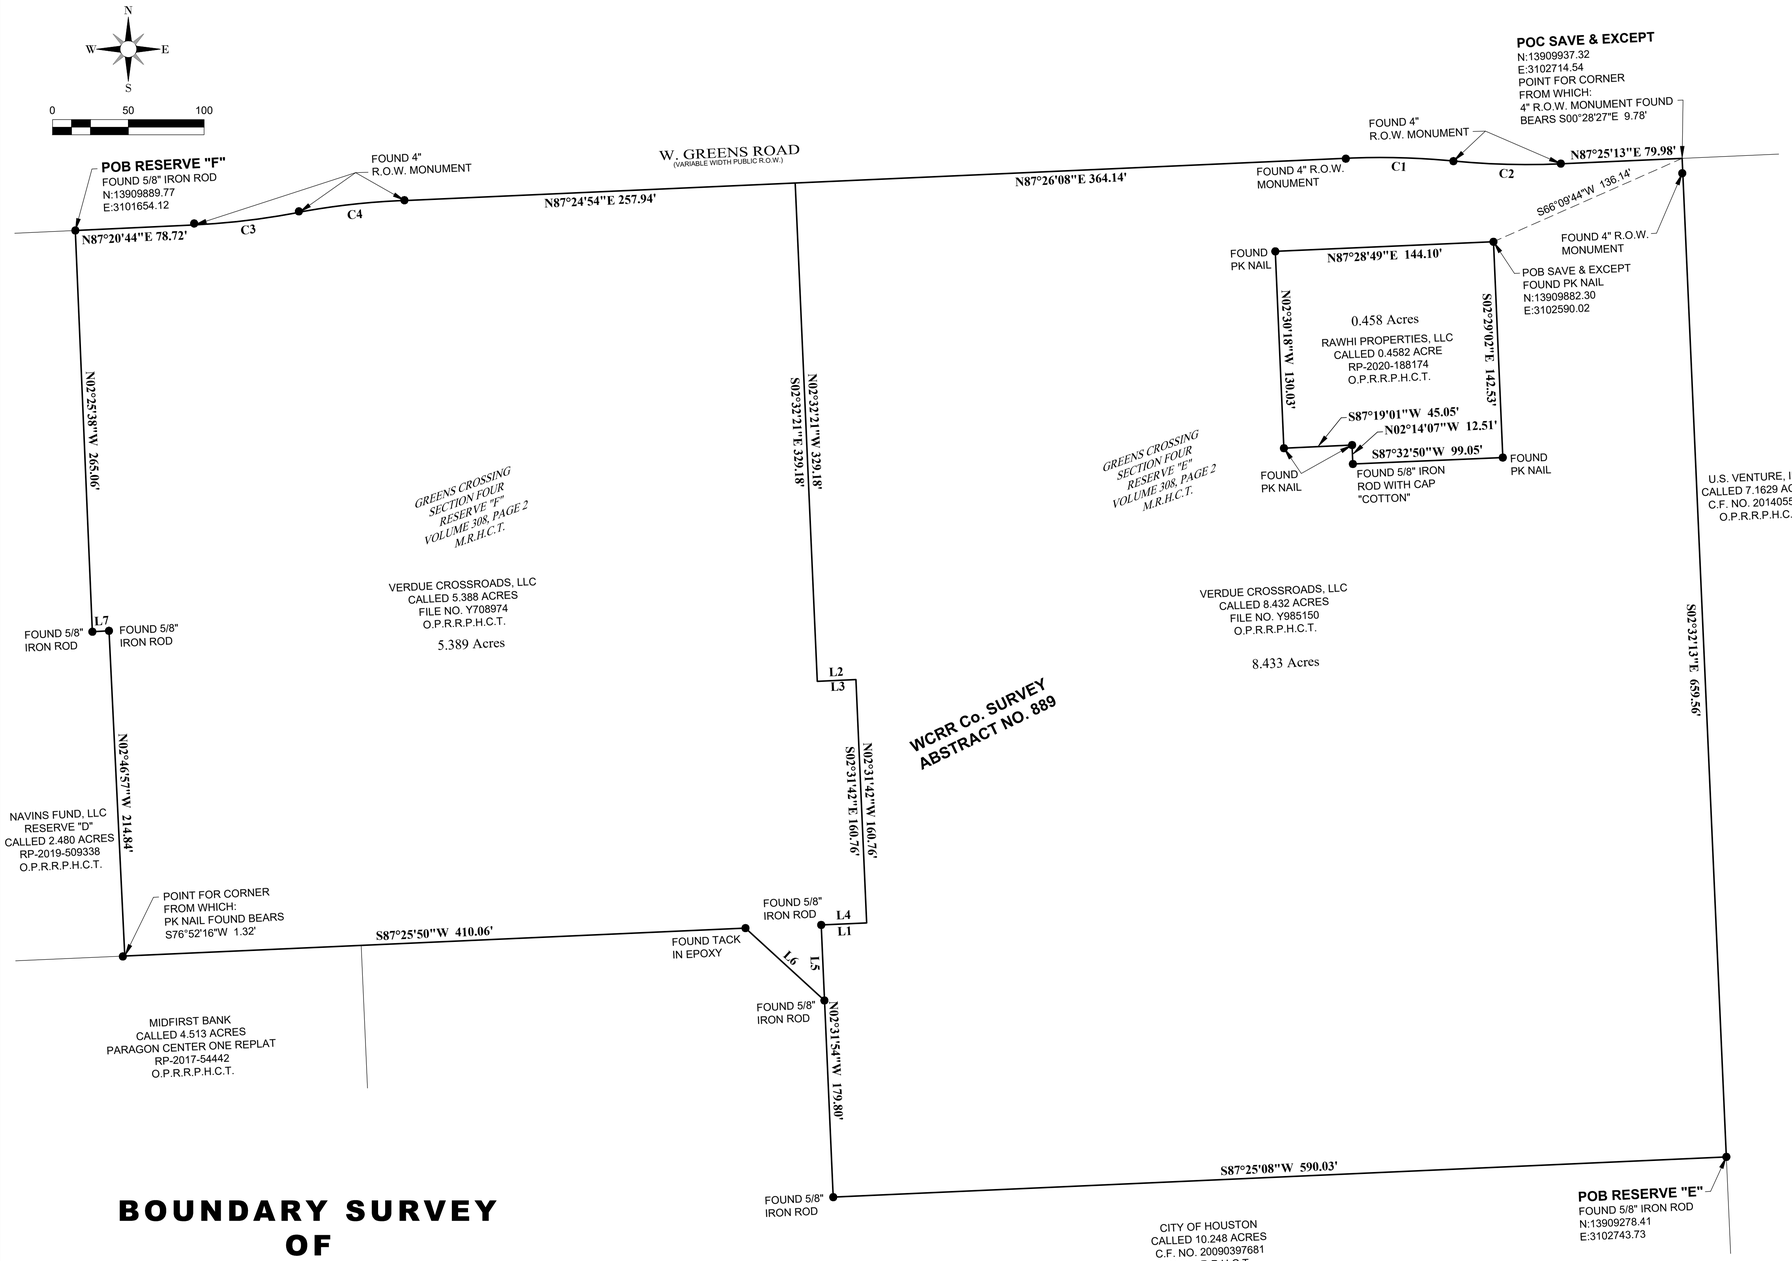

In summary, the designated property meets all of the eligibility criteria for MSD in the City of Houston:

- The plume is stable (i.e. no change) or decreasing in areal extent – the groundwater monitoring data suggests that COC concentrations are stable to decreasing and that the plume's areal extent has decreased by approximately 50% since December 2012;
- The plume is delineated to the $^{GW}GW_{Ing}$ PCL, and has been since October 2016;
- The Site has been enrolled in a state corrective action program since 1996, and its current program is TCEQ Industrial and Hazardous Waste (IHW) Corrective Action Program;
- The Site has been thoroughly investigated with sufficient data – investigation and groundwater monitoring has been ongoing since 1996;
- The source of contamination has been removed – the dry cleaner is no longer operational and several active and passive mass removal measures have been deployed at the Site.

APPENDIX A

Provide a legal description of the boundaries of the designated property, including metes and bounds, and copy of the deed for the property. A professional surveyor currently registered with the Texas Board of Professional Surveying must certify that all property descriptions with metes and bounds are accurate.

LJA Surveying, Inc., a professional land surveyor, was contracted to perform a survey of the property boundaries. A copy of the provided survey plat with legal description, including metes and bounds, and deed of record, is attached.

GREENS CROSSING SECTION FOUR RESTRICTED RESERVE "E"

BEING 8.433 acres of land consisting of that certain Verdure Crossroads, LLC (called 8.432 acres of land) recorded in Clerk's File No. Y985150 of the Official Public Records for Real Property in Harris County, Texas, out of the W.C.R.R Co. Survey, Abstract No. 889, Harris County, Texas, and being part of Restricted Reserve "E" of Greens Crossing Section Four as shown in Volume 308, Page 2 of the Harris County Map Records and part of a called 8.890 acre tract in the Warranty Deed recorded under Clerk's File No. G819152 said Official Public Records, said 8.433 acres of land being more fully described as follows:

BEGINNING at a 5/8" iron rod found marking the most Eastern Northeast corner of that certain called 10.248 acre tract conveyed to the City of Houston in Clerk's File No. 20090397681 of said Official Public Records, same being a point in the West line of that certain called 7.1629 acre tract conveyed to U.S. Venture, Inc. in Clerks File No. 2014055499 of said Official Public Records, and the Southeast corner of the herein described tract of land;

THENCE South 87 deg. 25 min. 08 sec. West along and with a North line of the said 10.248 acre tract a distance of 590.03 feet to a 5/8" iron rod found marking an interior corner of the said 10.248 acre tract, and the Southwest corner of the herein described tract of land;

THENCE North 02 deg. 31 min. 54 sec. West along and with the said 10.248 acre tract a distance of 128.82 feet passing a 5/8" iron rod found marking an angle point of the said 10.248 acre tract, same being the Southeast corner of that certain called 5.338 acre tract conveyed to Verdure Crossroads, LLC in Clerk's File No.Y708974 of the said Official Public Records and continuing a total distance of 179.80 feet to a 5/8" iron rod marking an angle point in East line of said 5.338 acre tract and an angle point in the West line of the herein described tract of land;

THENCE along and with the East line of the said 5.338 acre tract and the West line of the herein described tract of land the following courses and distances;

North 87 deg. 25 min. 13 sec. East a distance of 30.00 feet to an angle point for corner;

APPENDIX B

A description of the current use, and, to the extent known, the anticipated use(s), of the designated property and properties within 500 feet of the boundary of the designated property.

The designated property (the Site) consists of an approximately 13.82-acre tract of land located at 205 and 215 W. Greens Rd., Houston, Harris County, Texas. Another address of 217 W Greens Rd. was used when submitting documents to the TCEQ, but it is the same property. The Site is improved with an approximately 144,940 square foot retail shopping center. The Site is bordered by commercial properties to the north. The Site is bordered to the east by industrial use property for the bulk storage of petroleum products. The Site is bordered to the south by city-owned property that is currently City of Houston Fire Station 84. The Site is bordered to the west by more commercial retail property. Office properties are located to the southwest and northwest of the Site. The general Site vicinity consists predominantly of commercial, office, and industrial properties along the I-45 freeway. There are no known changes in planned future use of the Site and/or the properties in the vicinity of the Site. Underground public utilities are located within City of Houston rights-of-way (ROWs) to the north (storm sewer and water main) and south of the Site (sanitary sewer).

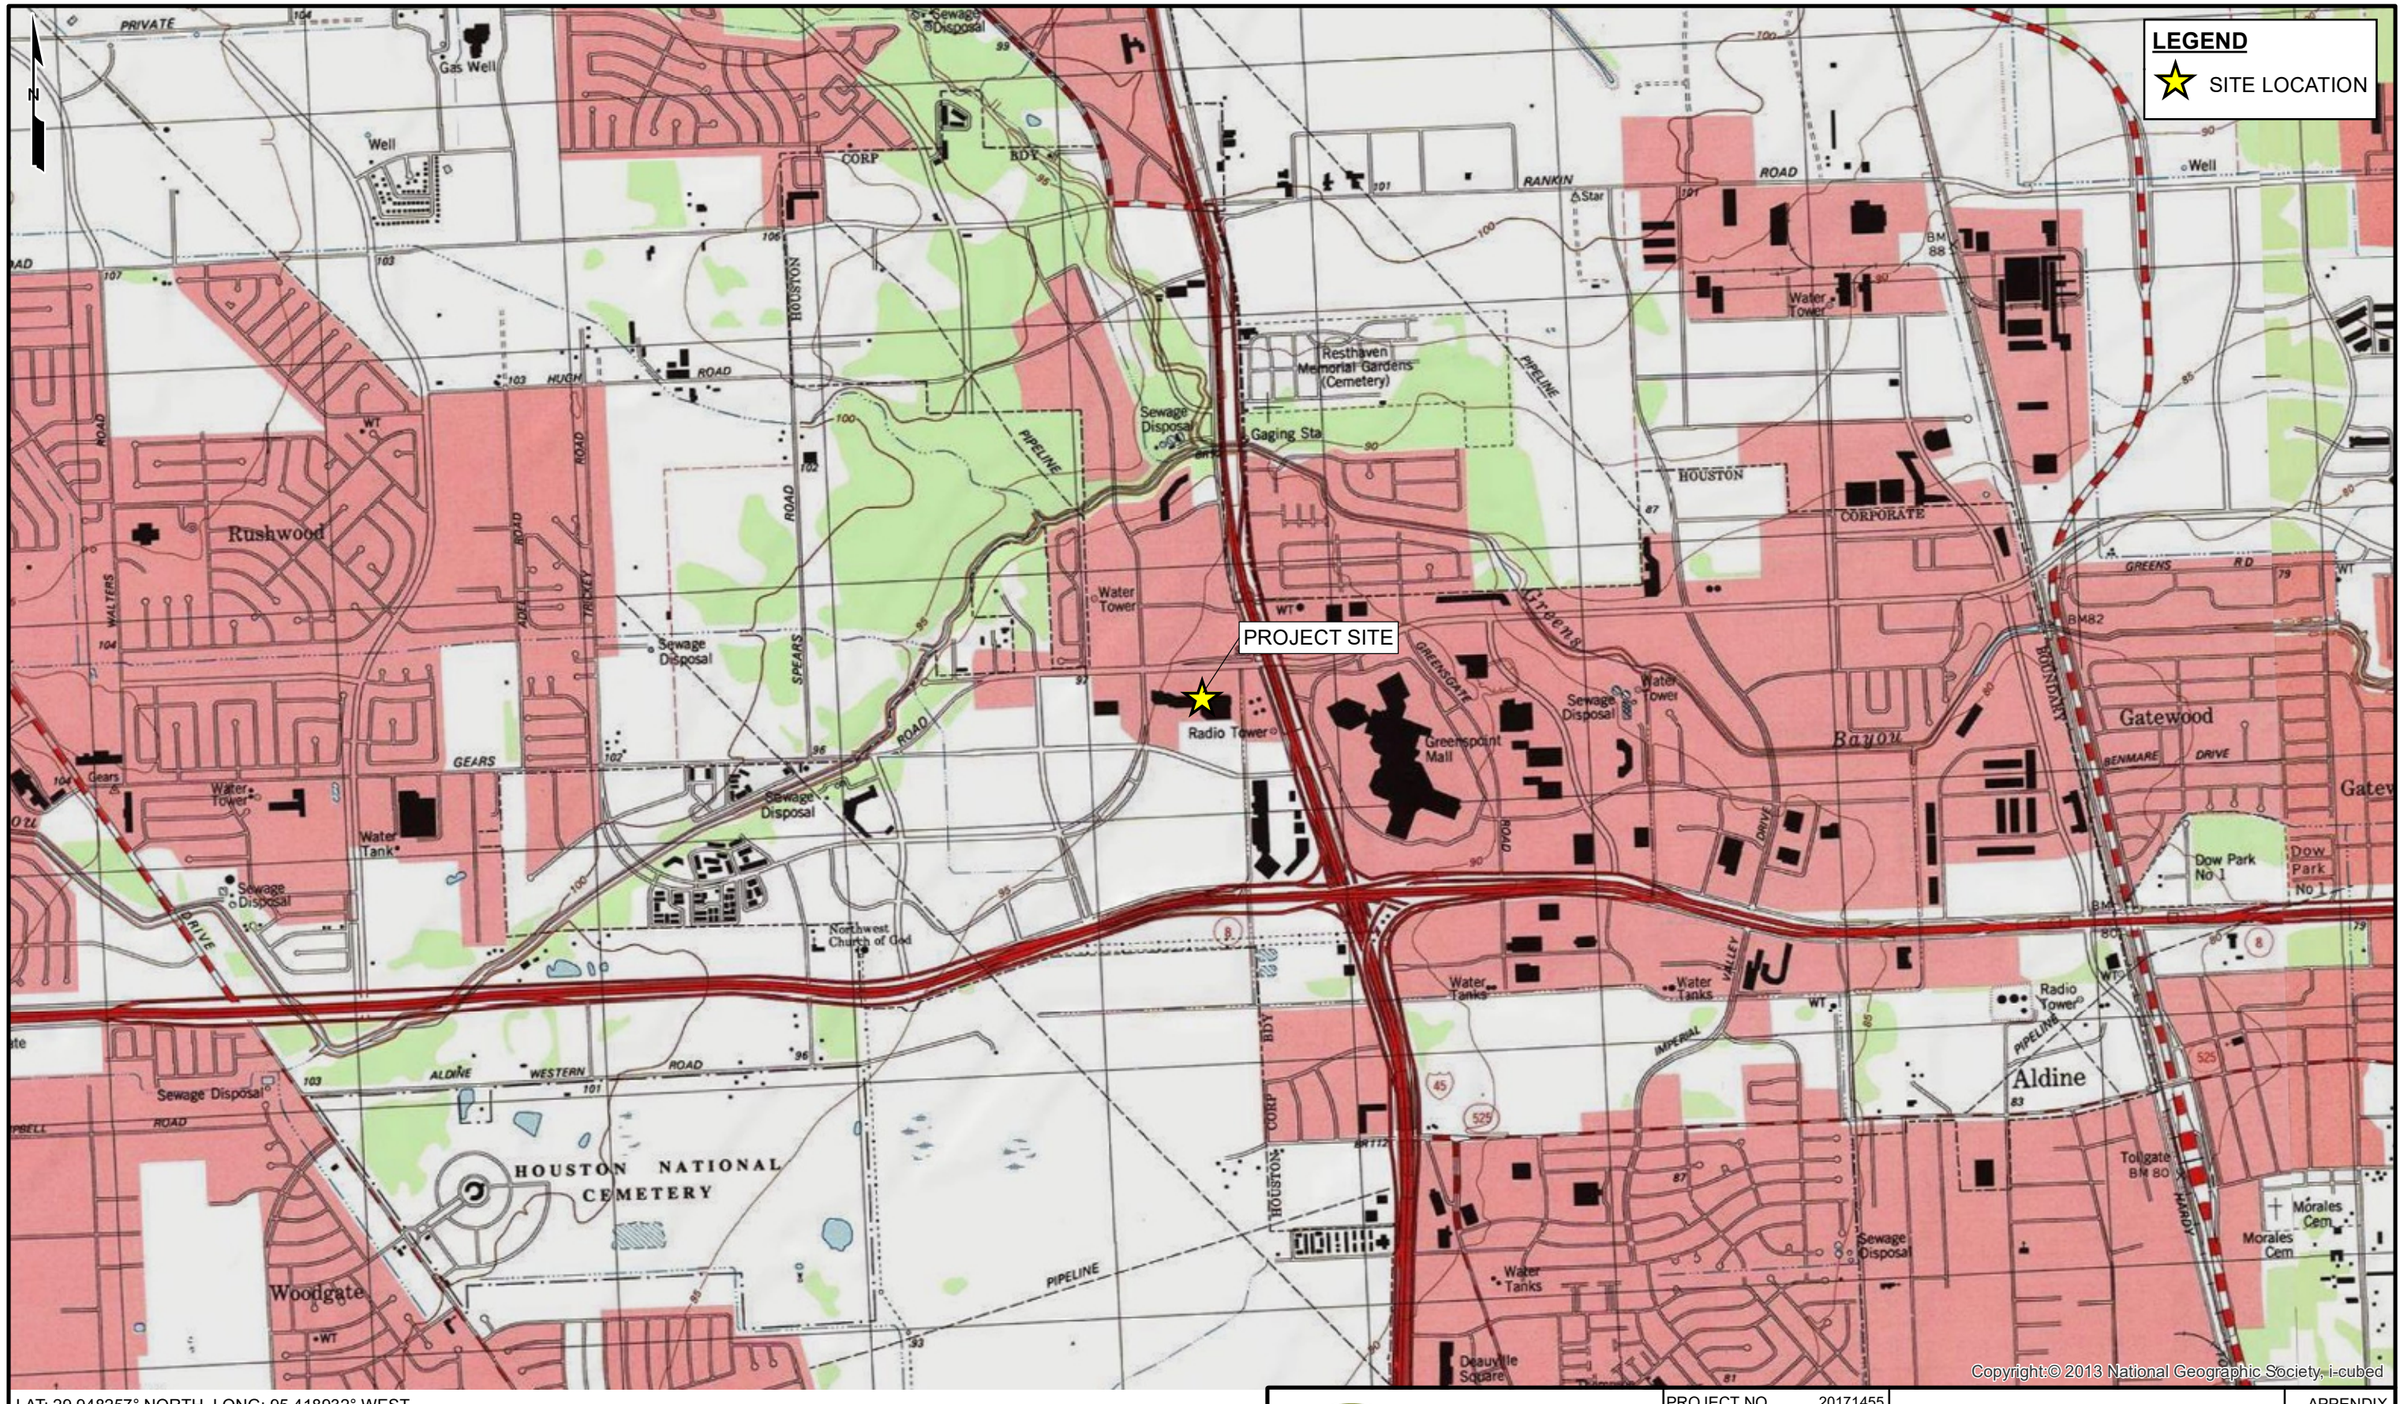

APPENDIX C

A site map(s) showing. ***Label and address each separately, i.e., a, b, c, d, e, f, g***

a. *The location of the designated property.*
b. *The topography of the designated property as indicated on publicly available sources, which must note the watershed including the nearest surface water body and whether the designated property is located in a floodplain or floodway, as those terms are defined in Chapter 19 of the Code of Ordinances.*
c. *The detected area of groundwater contamination.*
d. *The location of all soil sampling locations and all groundwater monitoring wells.*
e. *Groundwater gradients, to the extent known, and direction of groundwater flow.*
f. *The ingestion protective concentration level exceedance zone for each contaminant of concern, to the extent known.*
g. *Depth to groundwater for each affected zone.*

APPENDIX D

List each contaminant of concern within the designated groundwater then describe:

a. *A description of the ingestion protective concentration level exceedance zone and the non-ingestion protective concentration level exceedance zone, including a specification of the horizontal area and the minimum and maximum depth below ground surface.*
b. *The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.*
c. *Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water).*

The primary contaminant of concern (COC) associated with this site is tetrachloroethylene (PCE) from former dry cleaner operations. Based on environmental investigations at the designated property, chlorinated ethenes (including tetrachloroethylene (PCE) and associated degradation products: trichloroethylene, cis- and trans-1,2-dichloroethylene, 1,1-dichloroethylene, and vinyl chloride) have been identified in the shallow groundwater bearing unit (GWBU) at concentrations which exceed the current ingestion-based PCL ($^{GW}GW_{Ing}$). The presence of the degradation products is a positive indicator that degradation/attenuation of the PCE and daughter products (e.g., trichloroethylene) is occurring.

Tetrachloroethylene (PCE), trichloroethylene (TCE), cis-1,2-dichloroethylene (cis-1,2-DCE), 1,1-dichloroethylene (1,1-DCE), and vinyl chloride (VC) were detected at concentrations above the residential groundwater ingestion protective concentration level (PCL) during the most recent sampling events between December 2019, December 2020, and January 2022. However, as of 2022, and 2023 COC concentrations in groundwater do not exceed non-ingestion PCLs ($^{Air}GW_{Inh\text{-}V}$). No COCs have been identified in Site soil at concentrations which exceed the TCEQ TRRP protective concentration levels ($^{Tot}SOIL_{Comb}$ or $^{Air}SOIL_{Inh\text{-}V}$).

Table D-1 lists each COC, the ingestion and non-ingestion PCLE zone, vertical and horizontal extent, and geochemical properties is provided on the following page.

[1] Maximum concentration shown is either from the most recent sampling in 2023 or is the maximum from Dec 2019, to be conservative; 2019 was the most recent groundwater monitoring event that included sitewide monitoring wells. The groundwater monitoring program was modified in 2020 to focus primarily on the perimeter wells to monitor the plume extent/stability.

[2] For vinyl chloride, the maximum detection in groundwater from the 2019-2023 groundwater monitoring events was 1.1 mg/L at MW-8D in 2021. However, in 2023, the vinyl chloride concentration at MW-8D was 0.0019 mg/L. The maximum concentration of vinyl chloride detected in Site groundwater in November 2023 was 0.033 mg/L.

[3] Groundwater ingestion PCLE zone remains consistent since original MSD application was submitted in 2020 (with 2019 groundwater data), current groundwater monitoring program does not include all monitoring wells, only wells associated with the Response Action Plan with a Plume Management Zone.

A table and graph displaying the following information for each contaminant of concern, to the extent known:

a. *The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/kg for soils and mg/L for groundwater.*
b. *The critical protective concentration level without the municipal setting designation, highlighting any exceedances.*

Groundwater

COCs (PCE, TCE, cis-1,2-DCE, 1,1-DCE, and VC) were detected at concentrations exceeding their respective TRRP $^{GW}GW_{ing}$ Tier 1 PCLs during the most recent sampling events between December 2019 and November 2023. Based on the proposed response actions, institutional controls such as this MSD will be used to eliminate the groundwater ingestion exposure pathway at the designated property. **Table E-1** presents the maximum concentrations of each COC from the December 2019 through November 2023 groundwater monitoring period at the designated property. Reference **Appendix G-5** for graphs for each COC.

APPENDIX F

If the plume extends beyond the limits of property owners listed in this application, list the property owners of the additional property beneath which the plume(s) extend(s), and a summary of interactions with those property owners about the plume(s) and this MSD application. Please Note: You are not required under this item to notify affected property owners, only to provide a summary of who affected property owners are, and if there have been any communications. "No contact" can be an acceptable answer

Not Applicable, the plume does not extend off-site onto properties owned by another property owner. The plume has been stable to shrinking in areal extent due to natural attenuation processes and previous remediation activities (pump and treat, permanganate injection, zero valent iron, etc.).

APPENDIX G

A statement that the plume of contamination is stable (i.e., no change) or contracting and delineated, with the basis for that statement. Please include historical sampling data and Graph.

Source Removal Discussion

According to the APAR submitted to the TCEQ in 2003, the contaminants reported in groundwater at the designated property appear to have originated from dry cleaning activity at the Site. The release (of unknown quantity) was discovered during a Phase I Environmental Site Assessment (ESA) completed for a potential buyer of the designated property. The tenant operator, Clenet Cleaners, occupied the property from 1989 until the mid-1990s. No further dry cleaning activity has taken place since the mid-1990s, and as a result, no further chlorinated ethene contamination has occurred since. In addition to the cessation of dry cleaning operations and removal dry cleaning equipment, several groundwater remediation approaches have been used to remove contaminant mass. From July 1996 until July 2000, groundwater extraction and treatment (a single recovery well with an air stripper, mechanical filtration, granular activated carbon polishing, and a reinjection well) was the primary means of COC mass removal. In July 2000, groundwater recovery was terminated, and potassium permanganate ($KMnO_4$) injection was used for in-situ oxidation of the COCs. Two injection events occurred in October 2000 and May 2001, and performance monitoring was completed to assess the treatment's effectiveness. In January and July 2008, two pilot tests of injected zero valent iron (ZVI) reagent were completed near MW-1 and MW-8S, respectively. This technology removes mass via in-situ chemical reduction of chlorinated ethenes. In 2013, a full-scale implementation of a ZVI and slow-release carbon reagent remedy was completed. This permeable reactive barrier (PRB) was placed via injection through closely-spaced hollow stem auger borings. Since then, routine groundwater monitoring has been performed. Natural attenuation processes are apparent from the results of those groundwater sampling events; specifically the decrease in concentrations of the primary contaminant, PCE, and increases in the concentrations of degradation (a.k.a., daughter) products of PCE (TCE, cis-1,2-DCE, and VC).

Plume Delineation Discussion

The chlorinated ethene plume at the Site has been delineated to residential, ingestion-based PCLs ($^{GW}GW_{Ing}$) since October 2016; and as of the most recent groundwater monitoring event completed in November 2023 it remains delineated to the residential assessment level.

In 2020, at TCEQ's request, an additional monitoring well was installed to the northwest of the PCLE zone to confirm the hydrogeologic interpretation in this area. The groundwater sampling results from MW-17 in 2020 confirmed that COCs were not detected at this location, thus validating the Site delineation.

Plume Stability Discussion

Based on the historical groundwater monitoring that has been performed from 1996 to the present, it can be concluded that the plume in the groundwater bearing unit (GWBU) underlying the designated property is stable to decreasing. This GWBU is also referred to as the Upper

Transmissive Zone (UTZ) in submittals to the TCEQ. The areal extent of the protective concentration level exceedance (PCLE) zone in the UTZ has decreased since groundwater monitoring began in 1996. ***Appendix G-1*** shows the PCLE zone for all COCs in groundwater decreasing from approximately 2.44 acres in December 2012 to 1.27 acres in December 2019; an overall 47.9% decrease in total area. The plume extent has remained stable from December 2019 to January 2022 (most recent groundwater monitoring event.) Also worth noting, the primary COC, tetrachloroethylene (PCE), defined the extent of the PCLE zone in December 2012, however, vinyl chloride (VC), a degradation byproduct of PCE, defined the extent of the PCLE zone in December 2019-January 2022 – credible evidence of natural attenuation processes in Site groundwater. ***Appendix G-2*** shows the PCLE zone for PCE only over time. This figure shows that the PCLE area for PCE (the actual compound that was released from the dry cleaner) decreases from 2.44 acres in December 2012 to 0.22 acres in December 2019, an overall 90.9% decrease in total area. The December 2020 and November 2023 groundwater monitoring results are similar to December 2019 results and confirm that degradation processes are continuing to occur, and the plume has remained stable.

Complete Analytical Data Summaries

Appendix G-3 and ***Appendix G-4*** are tables summarizing historical soil and groundwater concentrations, respectively. All exceedances shown in ***Appendix G-3*** are for the 0.5-acre residential soil PCL, but no results exceed the $^{Tot}SOIL_{Comb}$ or $^{Air}SOIL_{Inh\text{-}V}$ screening criteria, therefore no soil exceedances will remain if the MSD ordinance is issued for the designated property.

Conclusions

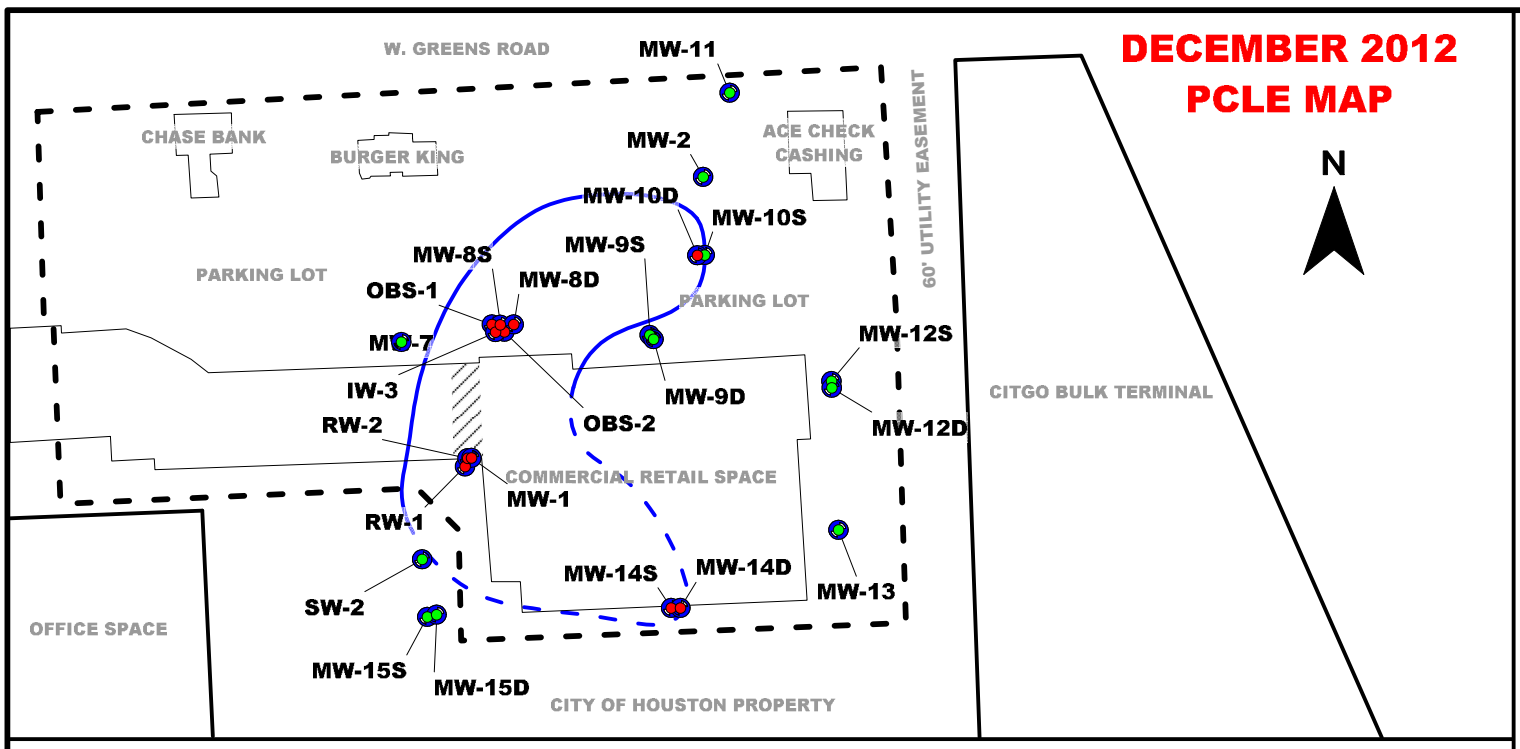

The designated property meets the stated eligibility criteria stated in this section due to the following:

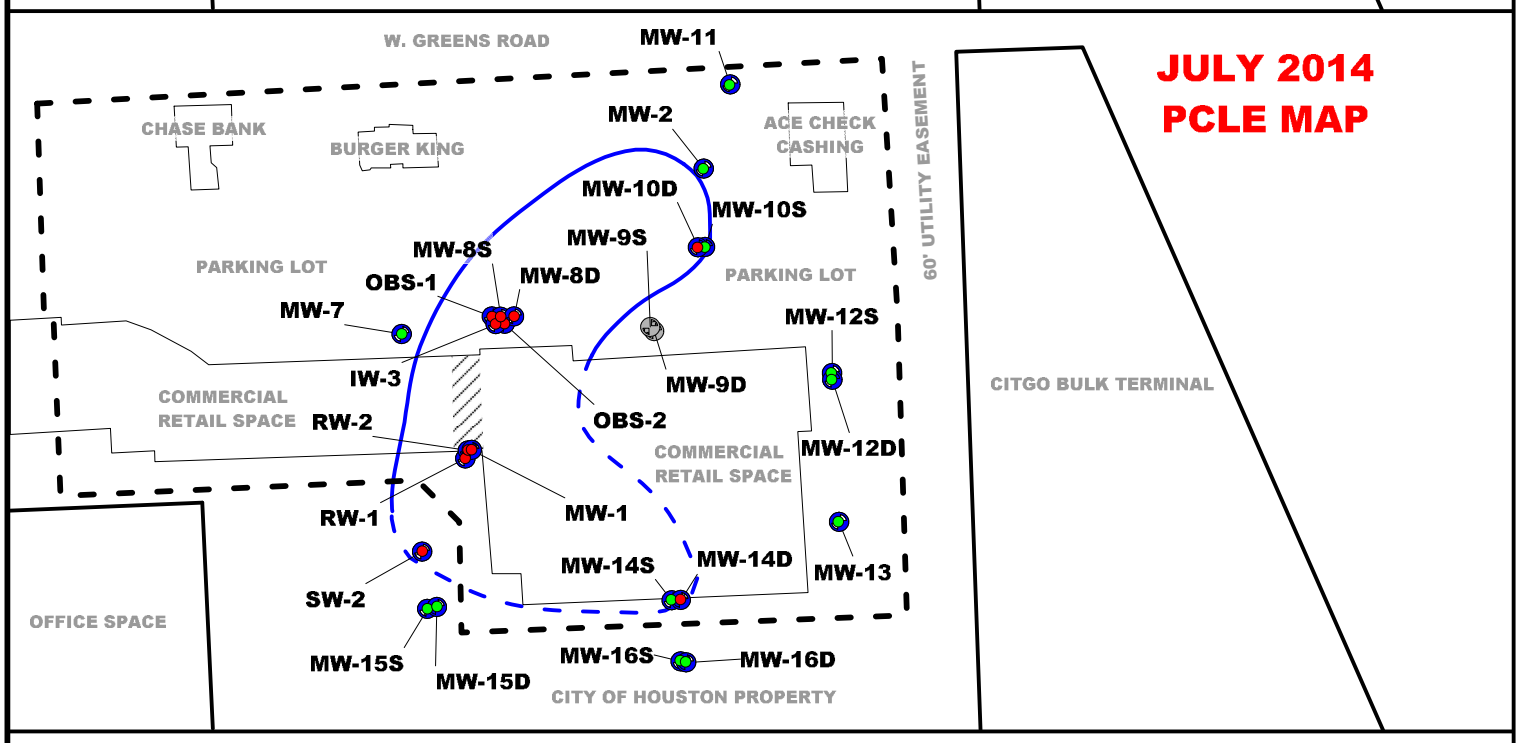

- No ongoing primary source of chlorinated ethenes exists at the site because the dry cleaner closed in the mid-1990s;
- Several active source mass removal efforts have been undertaken at the Site from 1996-2013 – these include groundwater recovery and treatment, in-situ chemical oxidation, and in-situ chemical reduction;
- The PCLE zone in groundwater has decreased in total area by 47.9% and the PCLE zone in groundwater for PCE has decreased in total area by 90.9% - strong evidence for a decreasing plume;
- In-situ chemical reduction reagents (zero valent iron [ZVI] and slow-release carbon) that were introduced into the subsurface in 2013 appear to have augmented natural attenuation processes;
- As a result, individual monitoring wells generally show a decrease in PCE concentrations over time, and in many cases show temporary increases in the concentrations of PCE daughter products (TCE, cis-1,2-DCE, trans-1,2-DCE, 1,1-DCE, and VC) followed by decreases of those daughter product concentrations;
- The plume has been delineated to the residential assessment level since October 2016 and remains stable;
- No physical control (paving) will be needed to address soil exceedances if the MSD ordinance is issued for the Site.

NOTES:
(a) PCL represents the critical PCL for residential 0.5 acre soil from the TRRP tables applicable as of 2005
Bold result indicates that reported result exceeded PCL.
NA - Not analyzed.
The MQL (Minimum Quantification Limit) and SQL (Sample Quantification Limit) were not provided by laboratory. The LOQ (Limit of Quantification) value was used for this report.

Notes:
< U - Not detected at or above the method detection limit, method detection limit included.
*- AAL exceedance
mg/L - millagrams per liter
Analytical methods: BTEX by EPA Method 8260, TPH by TX1005, and RCRA metals by EPA Method 6010.
FD - Indicates results are reported from analysis of a field duplicate.
J - Result is reported at an estimated concentration.
JH - Results is reported at an estimated concentration with a high bias.
JL - Results is reported at an estimated concentration with a low bias.
Shading - Reported concentration detected above the applicable standard(s) or guidance value(s)
UJL - Chemical not detected at an estimated value with a low bias.
NS - Not Sampled
~-not applicable to screening criteria
AAL - attenuation action level
AALs are listed on Table 3
** - This is the most recent data for this well, it has not been sampled since 2019, the TCE concentrations have shown a general decline and are typically below this PCL for the last five years.

APPENDIX H

A statement as to whether contamination on and off the designated property without a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.

Without an MSD, the PCLs for groundwater ingestion (^{GW}GWIng) would be used to evaluate Site contaminants. With the use of these PCLs, environmental sampling data indicate that concentrations of COCs in the GWBU exceed respective residential PCLs for the groundwater ingestion pathway on the designated property. The PCL Exceedance Zones (PCLE zones) for the chlorinated ethene constituents are contained entirely within the designated property. Additionally, delineating monitor wells are installed outside the PCLE zone in every direction, showing no exceedances since 2016. The extent of the plume is limited to the on-site designated property and does not extend to off-site properties.

The subsurface soil exceeds the residential PCL for soil leaching to groundwater ($^{GW}SOIL_{Ing}$) in a small area of the site behind the retail shops. This soil is currently covered in pavement as an engineering control. Its condition is assessed routinely to minimize the potential of sorbed-phase COCs entering the groundwater.

Detected contaminants of concern and residential ingestion-based PCLE zone for each respective COC is presented in ***Appendix C-4***. Tabulated groundwater data showing all sample results for each COC and corresponding ingestion and non-ingestion-based PCLs is presented in ***Appendix G-3*** and ***Appendix G-4***.

APPENDIX I

A statement as to whether contamination on and off the designated property with a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.

With an MSD, Site COCs in groundwater located within the bounds of the designated property will not exceed the residential non-ingestion residential PCLs ($^{Air}GW_{Inh\text{-}V}$) as shown in the table below.

Table I-1 Screening Max COC Concentrations in Groundwater to Residential PCLs

Chemical of Concern (COC)	**Residential $^{GW}GW_{Ing}$ Ingestion PCL**		**Residential $^{Air}GW_{Inh\text{-}V}$ Non-ingestion PCL[1]**		**Groundwater Maximum Concentration[2]** (year)
	(mg/L)	Tier	(mg/L)	Tier	(mg/L)
PCE	0.005	1	500	1	39 (2019)
TCE	0.005	1	24	1	4.8 (2019)
cis-1,2-DCE	0.070	1	1200	1	5.6 (2019)
trans-1,2-DCE	0.100	1	770	1	0.085 (2019)
1,1-DCE	0.007	1	1700	1	0.027 (2019)
VC	0.002	1	0.49	1	0.033 (2023)

Notes:

Bold text indicates an exceedance of the screening criteria **without MSD** ($^{GW}GW_{Ing}$) (no exceedances).

[1] Residential non-ingestion PCLs are based on 0.5-acre source for PCE, TCE, cis-1,2-DCE, trans-1,2-DCE, and 1,1-DCE. Residential non-ingestion PCL for vinyl chloride is based on 30-acre source to be conservative.

[2] For vinyl chloride, the maximum detection in groundwater from the 2019-2023 groundwater monitoring events was 1.1 mg/L at MW-8D in 2021. However, in 2023, the vinyl chloride concentration at MW-8D was 0.0019 mg/L. The maximum concentration of vinyl chloride detected in groundwater in November 2023 was 0.063 mg/L. See data table in Appendix G.

This Site's current use is commercial, and as stated in the deed notice on file with the county, its continued land use is expected to remain commercial.

The Site is delineated to residential PCLs in soil and groundwater on the property.

Tabulated soil data showing results compared to residential PCLs is provided in **Appendix G-3**.

Tabulated groundwater data showing all results for each COC and corresponding residential ingestion and non-ingestion-based PCLs is presented in ***Appendix G-4*.**

APPENDIX J

Identification and discussion of the points of origin of the contamination, to the extent known. Please list the Potentially Responsible Party (PRP), if unknown, state unknown. (applications without the PRP listed will be deemed incomplete)

The potentially responsible party (PRP) for reported groundwater impacts at the designated property is Clenet Cleaners, a former Site tenant and occupant/operator that provided dry cleaning services.

APPENDIX K

Environmental regulatory actions, litigation, and plume identification. ***Label & address each separately, i.e., a, b, c, d***

a. A description of any environmental regulatory actions that have been taken within the past five years in connection with the designated property, to the extent known.
b. A description of any litigation that has taken place within the past five years in connection with the designated property, to the extent known.
c. A statement as to whether there are any other remediation activities by the applicant, or any other party or agency, which are not listed in the application.
d. A statement as to which contamination plume and groundwater zone the applicant is including in the MSD.

a. There have been no known environmental regulatory actions taken within the past five years in connection with the designated property. Groundwater monitoring and reporting to the TCEQ has continued in accordance with the applicable Texas Risk Reduction Program (TRRP) rules.
b. There has been no known litigation within the past five years in connection with the designated property.
c. There is a passive permeable reactive barrier (PRB) in place at the Site (under the parking lot). Natural attenuation processes continue to reduce the COC concentrations. There are no other current remediation activities in connection with the designated property. Previous remediation activities included injection of potassium permanganate and pump and treat of affected groundwater at the source area.
d. The contaminant plume at this Site (PCE and degradation products) is present in the Upper Groundwater Bearing Unit (Upper GWBU, also referred to as Upper Transmissive Zone – UTZ), from approximately 15 to 50 feet below ground surface (bgs). Note that the UTZ's thickness varies widely, from 2 feet thick to over 30 feet thick.

APPENDIX L

A listing of all existing state or EPA registrations, permits, and identification numbers that applies to the designated property.

The designated property (Greens Crossroads Shopping Center 205 and 215 W. Greens Rd., Houston, Texas) has been assigned the following TCEQ identification numbers. Note that another address, 217 W Greens Rd., was used when submitting documents to the TCEQ, but it is the same property.

Customer Reference Number - CN600387716 (Exxon Land Development, Inc.), CN603494386 (ExxonMobil Environmental and Property Solutions Company), CN603878919 (Clenet Cleaners)

Regulated Entity Reference Number – RN100680537 (ExxonMobil R0912 Greens Crossroads Shopping Center, f.k.a. Exxon Land Development Greens Crossroads Shopping Center, f.k.a. Greens Crossroads Shopping Center)

APPENDIX M

Provide evidence that the designated property is currently or has previously been under the oversight of the TCEQ or the United States Environmental Protection Agency, as required by the Texas Health & Safety Code section 361.8065 (c)(2)(A), and a description of the status of the designated property in the program (the program application number is sufficient evidence). Also, include the state or federal cleanup project manager's name. Please note, the City of Houston does not accept (consider?) sites enrolled in the Innocent Owner/Operator Program due to the lack of state/federal oversight.

The designated property was entered into the TCEQ's Industrial and Hazardous Waste (IHW) Corrective Action Program on November 22, 2002 and has been assigned Solid Waste Registration (SWR) ID No. 84495. The applicable program rules are Texas Risk Reduction Program (TRRP) rules. Results of multiple subsurface investigations and ongoing semi-annual groundwater monitoring events have been submitted for the designated property and have been reviewed by the TCEQ. The Corrective Action Program Project Manager assigned to the designated property is Mike Duffin, Ph.D., P.G.

The status of the designated property in the IHW Corrective Action Program is 'ongoing groundwater monitoring' following the establishment of a plume management zone (PMZ) at the designated property.

Addendums to the Affected Property Assessment Report (APAR) and the Response Action Plan (RAP) were submitted to the TCEQ in December 2020. The APAR Addendum included information regarding the installation of one additional monitoring well (MW-17) that was requested by the TCEQ. The RAP Addendum describes the proposed approach for response actions prior to and following approval of the MSD application.

Groundwater monitoring and reporting will be continued until the MSD is approved and the COC concentrations are below all applicable PCLs ($^{Air}GW_{Inh\text{-}V}$) in groundwater. After the COC concentrations are below all applicable PCLs, groundwater monitoring will be discontinued, and a Response Action Completion Report (RACR) will be submitted to the TCEQ.

Further information is attached, providing an overview of this regulated entity, along with the entity's regulatory correspondence tracker output.

June 14, 2013	Revised Response Action Plan (RAP) submitted to TCEQ outlining the following remedy: a reagent-enhanced groundwater recovery system consisting of two to four recovery wells plus an injected reagent with zero valent iron (ZVI) and slow release carbon substrate.
October 16, 2012	Execution Plan for Permeable Reactive Barrier (PRB) Installation submitted to TCEQ.
September 19, 2012	Class V Injection Well Inventory/Authorization submitted to TCEQ.
May 4, 2012	Deed Notice filed for the property that outlines the Plume Management Zone (PMZ) as well as the use of pavement as a physical control to prevent contact with impacted soils at the property (from 5 to 25 feet bgs).
November 17, 2011	RAP approved by TCEQ after response to comments completed June 15, 2011.
December 21, 2010	Revised RAP submitted to TCEQ.
June 3, 2010	Response Action Plan (RAP) submitted to TCEQ.
December 16, 2009	APAR approved by TCEQ.
October 14, 2009	Amended APAR submitted to TCEQ.
September 16, 2009	ExxonMobil installed soil boring B-8 along the northern boundary of the PCLE zone. No transmissive zone was encountered.
July 7, 2009	ExxonMobil installed soil boring B-7 along the northern boundary of the PCLE zone. No transmissive zone was encountered.
June 5, 2009	TCEQ requested additional delineation of the northern boundary of the PCLE zone.

December 10, 2008	TCEQ requested an addendum to the APAR to document changes in the ground water flow direction.
July 29, 2008	ExxonMobil performed a pilot test injection of a zero-valent iron liquid compound in the vicinity of MW-8S.
January 19, 2008	ExxonMobil performed a pilot test injection of a zero-valent iron slurry compound in the vicinity of MW-1.
December 16, 2006	ExxonMobil requested extension of RAP submittal date to February 22, 2008.
October 17 – 30, 2006	Installed ground water monitor wells MW-7, MW8S, MW-8D, MW-9S, MW-9D, MW-10S, MW-10D, MW-11, MW-12S, MW-12D,MW-13, MW-14S, MW-14D, MW-15S, and MW-15D.
May 26, 2006	The TCEQ approved the revised APAR.
January 16, 2006	Revised APAR submitted to TCEQ.
August 8-11, 2005	Installed borings B-4, B-5, and B-6. When installing B-6 a ground water bearing unit (GWBU) was encountered so a monitor well was installed and sampled.
May 3-9, 2005	Waste (drilling mud) removed from site. Drilled soil borings B-2, and B-3. Land survey conducted for all new borings/wells.
April 21, 2005	Conduct ground water sampling event at wells: MW-2, COW-3, COW-4, and COW-6.
February 7-21, 2005	Drilled soil borings (DW-1, SW-1, SW-2, and B-1). Installed monitor well SW-2. Groundwater sampling event at wells: CPT-6, CPT-5, CPT-4, MW-2, CPT-7, RW-1, MW-1, and SW-2. Conduct soil vapor sampling event.
August 9, 2004	ExxonMobil and TCEQ held meeting to discuss comment letter.
July 6, 2004	The TCEQ provided comments on the APAR.
May 25, 2004	Sample offsite water well at the Citgo Bulk Terminal (65-13-3).
December 2003	Demolished and removed inactive ground water treatment system and equipment compound.
December 2003	Plugged and abandoned wells CPT-1 and CPT-2 by grouting in place.
July 23, 2003	APAR was submitted to the TCEQ.
August 28, 2002	Groundwater sampling event at wells MW-2 and CPT-4.

March 27, 2002	Survey of site by registered professional surveyor. New base map prepared for site.
March 14, 2002	Ground water sampling event at nine (9) wells at site, wells included: MW-1, MW-2, RW-1, CPT-1, CPT-2, CPT-4, CPT-5, CPT-6, and CPT-7.
February 14, 2002	Check treated wells at site for potassium permanganate (KMnO4) coloration in ground water.
October 9, 2001	Check treated wells at site for potassium permanganate (KMnO4) coloration in ground water.
August 30, 2001	Check treated wells at site for potassium permanganate (KMnO4) coloration in ground water.
May 17, 2001	Second potassium permanganate (KMnO4) treatment at wells MW-1, RW-1, & CPT-5. Soil sample collected at boring S-1 using hand auger.
March 16, 2001	Third post-treatment sampling event at wells MW-1, MW-2, RW-1, CPT-1, CPT-2, CPT-3, CPT-4, CPT-5, CPT-6, & CPT-7.
January 23, 2001	Second post-treatment sampling event at wells MW-1, MW-2, CPT-1, CPT-3, CPT-4, CPT-5, & CPT-6.
January 19, 2001	Plugged and abandoned former injection wells IW-1 and IW-2 by overdrilling well and grouting borehole.
December 5, 2000	First post-treatment sampling event at wells MW-1, RW-1, CPT-3, and CPT-5.
October 3-5, 2000	First potassium permanganate (KMnO4) treatment at wells MW-1, RW-1, & CPT-5.
October 2-3, 2000	Groundwater sampled at wells MW-1, RW-1, CPT-3, & CPT-5.
July 27, 2000	Submit application to state for Class V Injection Well Permit for potassium permanganate (KMnO4) treatment of ground water.
July 2000	Shutdown of ground water recovery and treatment system.
May 25, 2000	Report entitled *Data Summary Report; Natural Attenuation/No Migration Demonstration* for Greens Crossing Dry Cleaners Site was issued to ExxonMobil to document Phases II and III of monitored natural attenuation (MNA) demonstration.
April 19-20, 2000	Phase III of MNA demonstration, included: (1) installation and development of well MW-2, (2) collection and analysis of two (2) soil samples and a ground water sample at MW-2.

February 11, 2000	Phase II of MNA demonstration: installation of two (2) CPT borings and temporary wells CPT-14 and CPT-15. Ground water sample collected at each CPT.
January 12, 2000	Report entitled *1999 Annual Report – Greens Crossing Shopping Center Ground Water Remediation System* was issued to ExxonMobil.
December 21, 1999	Phase II of MNA demonstration: installation of six (6) CPT borings and wells CPT-8, CPT-9, CPT-10, CPT-11, CPT-12, and CPT–13. Ground water sample collected at each CPT.
August 9, 1999	TNRCC letter to ExxonMobil approving July 2, 1999 response letter. July 2, 1999 ExxonMobil letter to Kenneth Davis of TNRCC providing response to comments letter dated June 18, 1999. Agreement to implement Phase II of MNA demonstration.
June 18, 1999	TNRCC letter to ExxonMobil requesting installation of monitor well(s) to determine downgradient extent of plume north and northeast of dry cleaner; Comments on MNA Demonstration work plan and March 26, 1999 status report letter. (Kenneth Davis is TNRCC Project Manager).
March 26, 1999	ExxonMobil letter to John Wilder of TNRCC providing Status Report of ground water treatment program at the Greens Crossroads site.
March 1, 1999	Report entitled *1998 Annual Report – Greens Crossing Shopping Center Ground Water Remediation System* was issued to ExxonMobil.
February 17, 1999	Ground water sampled at wells MW-1, CPT-5, & CPT-6 for constituents of potential concern (COPC) and MNA parameters; well CPT-7 sampled for MNA parameters only.
January 18, 1999	Ground water sampled at wells MW-1, CPT-4, & CPT-7 for MNA parameters only.
December 17, 1998	In accordance with work plan, collect ground water sample from well MW-1 thirty (30) days after recovery pump was shut-off; Restart Remediation System – discharging to Sanitary Sewer.
December 10, 1998	Report entitled *Status Summary for Natural Attenuation/No Migration Demonstration* for Greens Crossing Dry Cleaners Site was issued to ExxonMobil to document Phase I of MNA demonstration.
November 17, 1998	Phase I of Natural Attenuation/No Migration Demonstration started; Recovery pump shut off at recovery well MW-1; Ground water samples collected at wells MW-1, CPT-4, CPT-5, CPT-6, CPT-7.

November 12, 1998	Letter from ExxonMobil to TNRCC confirming approval of MNA Demonstration workplan.
November 9, 1998	Meeting between ExxonMobil and Richard Clark of the TNRCC to discuss MNA Demonstration for Greens Crossroads site.
November 4, 1998	*Natural Attenuation/No Migration Demonstration Workplan* for Greens Crossroads Dry Cleaner Site submitted to TNRCC.
August 14, 1998	Meeting between ExxonMobil and Richard Clark of the TNRCC.
February 16, 1998	Report entitled *1997 Annual Report – Greens Crossing Shopping Center Ground Water Remediation System* was issued to ExxonMobil.
December 1997	Environmental consultant for potential buyer of on-site property performs ground water sampling event at seven (7) CPT wells; consultant verbally reports all samples were below detection limits.
November 1997	Discharge of water treated by the remediation system is converted to the City of Houston POTW.
September 1997	ExxonMobil applies for City of Houston wastewater discharge permit.
February 25, 1997	Report entitled *Installation of Ground Water Recovery and Treatment System* was issued to ExxonMobil; Report entitled *Installation of a Class V Injection Well at 217 West Greens Road, Houston, Texas 77067* issued to TNRCC.
October 25, 1996	Ground water sample collected at RW-1; analyzed for PCE only.
July 1996	Ground water remediation system for the Greens Crossroads site is started; treated water is discharge to injection wells IW-1 & IW-2.
June 28, 1996	Ground water sample collected at MW-1.
June 14, 1996	Ground water samples collected at RW-1 and RW-2. Sample from well RW-2 is mislabeled MW-2 on chain-of-custody and logbook.
June 10, 1996	TNRCC letter to ExxonMobil acknowledging proposed closure/remediation plan for Greens Crossroads site in May 6, 1996 letter to agency.
June 5, 1996	TNRCC issues Notice of Registration (NOR) for Solid Waste Registration Number 84495 for the Greens Crossroads site.

June 1996	Ground water remediation system installed at Greens Crossroads site. The final system design includes: (1) a single recovery well equipped with an electric submersible pump; (2) an air stripper, mechanical filtration, and granular activated carbon polishing. Treated water will be re-injected into the Upper Transmissive Zone (UTZ) using two (2) injection wells.
May 6, 1996	ExxonMobil letter to TNRCC informing of “voluntary clean-up” at site and that site will eventually be evaluated under the Risk Reduction Rules.
April 24-26, 1996	Wells RW-1, RW-2 & MW-1 were installed (well MW-1 is actual recovery well and wells RW-1 & RW-2 are observation wells). Soil sample collected at MW-1 from 50-51 feet below ground surface (bgs). Installation of injection wells IW-1 & IW-2.
April 1996	ExxonMobil begins construction of a pump and treat ground water recovery system in an effort to minimize potential migration of the UTZ plume to the northeast.
March 15, 1996	Report entitled *Results of the Soil and Supplemental Ground Water Investigation Activities* was issued to ExxonMobil documenting the March 1996 investigation activities.
March 12, 1996	Ground water sampled at wells CPT-2, CPT-3, CPT-4, and CPT-7 and analyzed for COPCs.
March 7, 1996	Three (3) soil borings (GP-1, GP-2, and GP-3) were advanced using Geoprobe® direct push technology in driveway at south side of Dry Cleaner. Ten (10) soil samples from the vadose zone were collected.
February 21, 1996	Meeting between ExxonMobil and Richard Clark of the TNRCC.
February 13, 1996	Report entitled *Ground Water Investigation Report* was issued to ExxonMobil documenting the two-phased CPT investigation at the Greens Crossroads site.
February 2, 1996	Wells CPT-4, 5, 6 and 7 installed; ground water sampled and analyzed for COPCs.
January 18, 1996	ExxonMobil reports the discovery of ground water contamination to TNRCC, Harris County Pollution Control Dept., and National Response Center.
January 12, 1996	CPT-1, 2, and 3 installed; ground water sampled and analyzed for COPCs.
December 1995	Potential buyer for on-site property conducts environmental site assessment (ESA) using ATEC Associates (ATEC). One boring

	(SB-1) installed at south wall of dry cleaner located at the southeast corner of lease shops property. Soil and ground water sampled and reported results indicate detectable concentrations of the chlorinated volatile compounds: tetrachloroethene (PCE), trichloroethene (TCE), 1,2-dichloroethene (1,2-DCE), and vinyl chloride (VC). Dry Cleaners still in operation during December 1995.
1989	“Clenet Cleaners” dry cleaning operations opens in Suite 215 at Greens Crossroads Shopping Center. The facility is listed as a RCRA small quantity hazardous waste generator. PCE hazardous waste is stored on-site.

APPENDIX O

A statement as to whether any public drinking water supply system exists that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and property within one-half mile of the designated property and the identity of each supply system. Please include a map of available water lines within one-half mile found at https://geogimsprod.houstontx.gov/html5viewer/index.html?viewer=geolinpublic.

Water main lines are located along all roads and easements surrounding the property, including Greens Parkway (west of designated property), W. Greens Road (north of designated property), and in the 60 foot easement (east of designated property). The figure ***Appendix O-1*** shows all City of Houston water lines within a half-mile radius of the Site. The designated property, as well as properties within a one-half mile radius, are served or can be served by several sources of public drinking water (as defined by Chapter 341 of the Texas Health and Safety Code). Those public drinking water supply systems include the City of Houston Public Works Department, Harris County Fresh Water Supply District No. 45, and others. ***Appendix O-2*** is a collection of summary maps of public and private supply wells within a half-mile radius of the Site and ***Appendix O-3*** is a summary table of those wells.

Disclaimer

The Banks Environmental Data Water Well Report was prepared from existing state water well databases and/or additional file data/records research conducted at the state agency and the U.S. Geological Survey. Banks Environmental Data has performed a thorough and diligent search of all groundwater well information provided and recorded. All mapped locations are based on information obtained from the source. Although Banks performs quality assurance and quality control on all research projects, we recognize that any inaccuracies of the records and mapped well locations could possibly be traced to the appropriate regulatory authority or the actual driller. It may be possible that some water well schedules and logs have never been submitted to the regulatory authority by the water driller and, thus, may explain the possible unaccountability of privately drilled wells. It is uncertain if the above listing provides 100% of the existing wells within the area of review. Therefore, Banks Environmental Data cannot fully guarantee the accuracy of the data or well location(s) of those maps and records maintained by the regulatory authorities.

APPENDIX P

The name and address of each owner or operator of a water well registered or permitted by the state or the Houston-Galveston Subsidence District that is located within five miles of the boundary of the designated property, along with a map showing the location of each well and, to the extent known, a notation of whether each well is used for potable water. Well logs must be included in the electronic copy of the application but should not be included in the hard copies. (An accompanying electronic excel file with mailing information should be included with your application.) ***Add Super Neighborhoods & council members in the district to the mailing list.***

The owner name and address for each State-registered water well within five miles of the property is included in this Appendix (Appendix P-2). An electronic copy of this data set is also provided on a compact disk in ***Appendix Y***.

Included within this table is a column that designates whether each well is used for potable purposes. A map depicting registered water wells within five miles of the designated property is provided as ***Appendix P-1***. At the time of this application submittal, notices to water well owners had not yet been issued per Section 361.805 of the Texas Health and Safety Code.

APPENDIX S

A listing of each municipality, other than the city of Houston, that owns or operates a groundwater supply well within five miles of the boundary of the designated property.

All properties within 5 miles of the boundary of the designated property are located within the City of Houston City Limits and/or the City of Houston Extraterritorial Jurisdiction. A map, titled *Water Well Location Map – 5 Mile Radius*, showing the location of each public supply well within five-mile radius of the site is attached in ***Appendix Q***.

APPENDIX T

*A listing of owners of real property within 2,500 ft. of the boundary of the designated property as indicated by the most recent appraisal district records. Please Note: This requirement may include real property outside the City of Houston. Be sure to include **ALL** properties in the 2,500 ft. boundary. (An accompanying electronic excel file with mailing information should be included with your application.)*

A listing of each owner of real property per Harris County Appraisal District (HCAD) within 2,500 feet of the boundary of the designated property is included in the Table on the following pages. An Excel file is also provided on the enclosed flash drive.

APPENDIX U

Form U-2012-01 ***signed and sealed*** *by a licensed professional engineer or licensed professional geoscientist authorized to practice in the State of Texas with expertise in environmental remediation. (Form U-2012-01 can be found at www.houstonmsd.org under the "Forms" section on the homepage).*

Signing and sealing Form U-2012-01 certifies:

a. *The contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not [do exceed] OR [do not exceed] a non-ingestion protective concentration level on property beyond the boundaries of the designated property. (select the appropriate statement)*
b. *All requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size.*

Form U-2012-01 is provided on the following page.

Appendix U – Completeness of Information and On-Site and Off-Site Impact(s)

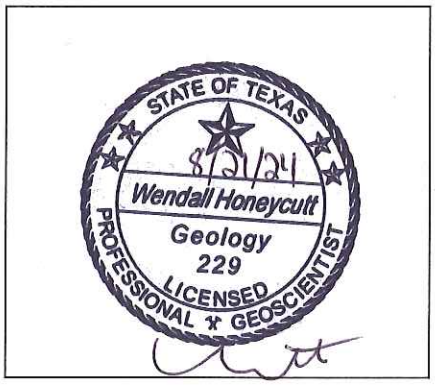

To the best of my knowledge and belief, based upon a review of all public and private records and other information sources available to me in the exercise of due diligence, the opinions stated and conclusions made in this application are supported by such information, and the technical and scientific information submitted with the application is true, accurate and complete. Based on such review, the contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not [do exceed] OR [do not exceed] a non-ingestion protective concentration level on property beyond the boundaries of the designated property. Further, I certify that all requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size.

APPENDIX V

If the licensed professional engineer or licensed professional geoscientist determines that contaminants of concern from sources on the designated property are migrating from or through the designated property more likely than not do exceed a non-ingestion protective concentration level on property beyond the boundary of the designated property, then the applicant must:

a. *Specify the name and address of the owner of each property.*
b. *Send a copy of the application to the owner of the property with the notice of the public meeting.*
c. *Provide documentation that the designated property has been included in a state or federal program that requires that the entire non-ingestion protective concentration level exceedance zone be addressed to the satisfaction of the agency administering the program, along with documentation of the estimated time period in which it is to be addressed. An example of such a program is the Texas Voluntary Cleanup Program (section 361.501 of the Texas Health and Safety Code, as may be amended from time to time).*
d. *Provide documentation upon completion of the state or federal program showing that the non-ingestion protective concentration level exceedances have been addressed to the satisfaction of the agency administering the program.*

No exceedances of ingestion or non-ingestion PCLs have been observed offsite in recent monitoring periods. Delineation monitoring points onsite suggest that the ingestion PCL exceedance zone (by definition, larger than any non-ingestion PCL exceedance areas) does not go outside of the property boundary. The last time any offsite monitoring points showed an ingestion PCL exceedance was in December of 2015 at monitoring well SW-2.

Documentation showing that the designated property is included in the TCEQ's IHW Corrective Action Program is provided in Appendix L in this application. Documentation of the Site's closure status will be provided once the Municipal Setting Designation has been approved by the City of Houston and the TCEQ and a No Further Action letter is issued.
