Municipal Setting Designation

Application Instructions

Pre-Application Meeting: While a pre-application meeting is not mandatory, it is strongly encouraged to discuss the specific details of the site. Please note: the City of Houston will not support a Municipal Settings Designation (MSD) application unless a Professional Geologist (P.G.) or Professional Engineer (P.E.) has certified that the groundwater plume is stable or decreasing, fully delineated, and the source has been removed. This statement should be supported with historical groundwater monitoring data showing the plume as stable or declining, and fully delineated.

Please contact Antoinette Warr at 832-394-8965, Antoinette.Warr@houston.tx.gov to schedule a pre-application meeting. Meetings will be held at 1002 Washington, Houston, TX 77002

Application Form: For the application to be complete please submit the following:

- 1) One (2) hard copy of the application (the well logs are not necessary for the hard copies but should be included in the electronic copy). Please separate the application appendices with divider sheets that are tabbed.
- 2) A completed Acknowledgement form must be included in packet.
- 3) An electronic portable digital file of the application including all supporting material
(SharePoint preferred)
- 4) An electronic Excel file with mailing addresses for water well owners and property owners. (Templates can be found on the MSD website, <https://www.houstonpublicworks.org/municipal-settings-designation>)

The MSD application process is governed by Chapter 47, Article XIII of the City of Houston's Code of Ordinances (ordinance number 2007-959 and amended by ordinance number 2010-556). Failure to use this application form may result in denial of the application.

Please note, the City ordinance requires the Professional Engineer (P.E.) or Professional Geologist (P.G.) who signed the application, or someone that is familiar with the application, and the applicant or their legal representative (attorney) to be present at public meeting and public hearing. Failure of the required parties in attendance at the public meeting and public hearing will result in having to schedule a new meeting or hearing.

The application should be clear, complete, concise, correct, contain only relevant information and be organized to facilitate analysis. Supporting documentation should be submitted as a separate appendix to the application, as noted (Label "Appendix") for each numbered item.

Submittal: Submit the application form and all supporting information, along with an application fee of \$3,000.00 (payable to City of Houston) to the address below. The applicant must pay for the cost of advertising (approximately \$500 per advertisement add for public meeting) and the cost of producing and mailing notices, (approximately \$6.50 per certified mail and \$1.50 per first-class mail), and any applicable venue costs (costs vary by location). Mailings are done through the U.S. Post Office's Click2Mail system. Applicant will set up a (Joint) Click2Mail account giving COH access to username and password. At the time of mail outs, the applicant will pay by credit card directly to the U. S. Post Office's Click2Mail for processing and mailing the notices. The applicant will provide receipt of payment to COH.

ITEM	COH Use Only
Executive Summary	
1. Provide a legal description of the boundaries of the designated property, including metes and bounds, and a copy of the deed for the property. <u>A professional surveyor currently registered with the Texas Board of Professional Surveying must certify that all property descriptions with metes and bounds are accurate.</u> <u>Label "Appendix A"</u>	
2. A description of the current use and, to the extent known, the anticipated use(s) of the designated property and properties within 500 feet of the boundary of the designated property. <u>Label "Appendix B"</u>	
3. A site map showing. Label & address each separately, i.e., a, b, c, d, e, f, g a. The location of the designated property. b. The topography of the designated property as indicated on publicly available sources, which must note the watershed <u>including the nearest surface water body</u> and whether the designated property is located in a floodplain or floodway, as those terms are defined in Chapter 19 of the Code of Ordinances. c. The detected area of groundwater contamination. d. The location of all soil sampling locations and all groundwater monitoring wells. e. Groundwater gradients, to the extent known, and direction of groundwater flow. f. The ingestion protective concentration level exceedence zone for each contaminant of concern, to the extent known. g. Depth to groundwater for each affected zone. <u>Label "Appendix C"</u>	
4. List each contaminant of concern within the designated groundwater then describe: a. A description of the ingestion protective concentration level exceedence zone and the non-ingestion protective concentration level exceedence zone, including a specification of the horizontal area and the minimum and maximum depth below ground surface. b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units. c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water). <u>Label "Appendix D"</u>	
5. A table and graph displaying the following information for each contaminant of concern, to the extent known: a. The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/kg for soils and mg/L for groundwater. b. The critical protective concentration level without the municipal setting designation, highlighting any exceedences. <u>Label "Appendix E"</u>	

ITEM	COH Use Only
6. If the plume extends beyond the limits of property owners listed in this application, list the owners of the additional property beneath which the plume(s) extend(s), and a summary of interactions with those property owners about the plume(s) and this MSD application. Please Note: You are not required under this item to notify affected property owners, only to provide a summary of who affected property owners are, and if there have been any communications. "No contact" can be an acceptable answer. <u>Label "Appendix F"</u>	
A statement that the plume of contamination is stable (i.e., no change) or contracting and delineated, with the basis for that statement. Please include historical sampling data and Graph. <u>Label "Appendix G"</u>	
7. A statement as to whether contamination on and off the designated property <u>without</u> a Municipal Setting Designation <u>will exceed</u> a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement. <u>Label "Appendix H"</u>	
8. A statement as to whether contamination on and off the designated property <u>with</u> a Municipal Setting Designation <u>will exceed</u> a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement. <u>Label "Appendix I"</u>	
Identification and discussion of the points of origin of the contamination, to the extent known. Please list the Potentially Responsible Party (PRP), if unknown, state unknown. (applications without the PRP listed will be deemed incomplete) <u>Label "Appendix J"</u>	
9. Environmental regulatory actions, litigation, and plume identification. Label & address each separately, i.e., a, b, c, d a. A description of any environmental regulatory actions that have been taken within the past five years in connection with the designated property, to the extent known. b. A description of any litigation that has taken place within the past five years in connection with the designated property, to the extent known. c. A statement as to whether there are any other remediation activities by the applicant, or any other party or agency, which are not listed in the application. d. A statement as to which contamination plume and groundwater zone the applicant is including in the MSD. <u>Label "Appendix K"</u>	
10. A listing of all existing state or EPA registrations, permits, and identification numbers that applies to the designated property. <u>Label "Appendix L"</u>	

ITEM	COH Use Only
Provide evidence that the designated property is currently or has previously been under the oversight of the TCEQ or the United States Environmental Protection Agency, as required by the Texas Health & Safety Code § 361.8065(c)(2)(A), and a description of the status of the designated property in the program (the program application number is sufficient evidence). Also, include the state or federal cleanup project manager's name. Please note, the City of Houston does not accept (consider?) sites enrolled in the Innocent Owner/Operator Program due to the lack of state/federal oversight. <u>Label "Appendix M"</u>	
11. A summary of any environmental site assessment reports filed with TCEQ regarding any site investigations or response actions that are planned, ongoing or completed related to the designated property. <u>Label "Appendix N"</u>	
A statement as to whether any public drinking water supply system exists that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and property within one-half mile of the designated property and the identity of each supply system. Please include a map of available water lines within one-half mile found at https://geogimsprod.houstontx.gov/html5viewer/index.html?viewer=geolin-public. <u>Label "Appendix O"</u>	
12. The name and address of each owner or operator of a water well registered or permitted by the state or the Houston-Galveston Subsidence District that is located within five miles of the boundary of the designated property, along with a map showing the location of each well and, to the extent known, a notation of whether each well is used for potable water. Well logs <u>must</u> be included in the electronic copy of the application but should not be included in the hard copies. (An accompanying electronic excel file with mailing information should be included with your application.) Add Super Neighborhoods & council members in the district to the mailing list. <u>Label "Appendix P"</u>	
13. The name and address of each retail public utility, as defined in section 13.002 of the Texas Water Code that owns or operates a groundwater supply well within five miles of the boundary of the designated property. <u>Label "Appendix Q"</u>	
14. A listing of each municipality, other than the city of Houston, with a corporate limit within one-half mile of the boundary of the designated property. <u>Label "Appendix R"</u>	
15. A listing of each municipality, other than the city of Houston, that owns or operates a groundwater supply well within five miles of the boundary of the designated property. <u>Label "Appendix S"</u>	
16. A listing of owners of real property within 2,500 ft. of the boundary of the designated property as indicated by the most recent appraisal district records. Please Note: This requirement may include real property outside the City of Houston. Be sure to include ALL properties in the 2,500 ft. boundary. (An accompanying electronic excel file with mailing information should be included with your application.) <u>Label "Appendix T"</u>	

ITEM	COH Use Only
17. Form U-2012-01 signed and sealed by a licensed professional engineer or licensed professional geoscientist authorized to practice in the State of Texas with expertise in environmental remediation. (Form U-2012-01 can be found at https://www.houstonpublicworks.org/municipal-settings-designation under the "Forms" section on the homepage.) Signing and sealing Form U-2012-01 certifies: - The contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not [do exceed] OR [do not exceed] a non-ingestion protective concentration level on property beyond the boundaries of the designated property. (select the appropriate statement) - All requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size. <u>Label "Appendix U"</u>	
18. If the licensed professional engineer or licensed professional geoscientist determines that contaminants of concern from sources on the designated property are migrating from or through the designated property more likely than not do exceed a non-ingestion protective concentration level on property beyond the boundary of the designated property, then the applicant must: - Specify the name and address of the owner of each property. - Send a copy of the application to the owner of the property with the notice of the public meeting. - Provide documentation that the designated property has been included in a state or federal program that requires that the entire non-ingestion protective concentration level exceedance zone be addressed to the satisfaction of the agency administering the program, along with documentation of the estimated time period in which it is to be addressed. An example of such a program is the Texas Voluntary Cleanup Program (section 361.501 of the Texas Health and Safety Code, as may be amended from time to time). - Provide documentation upon completion of the state or federal program showing that the non-ingestion protective concentration level exceedances have been addressed to the satisfaction of the agency administering the program. <u>Label "Appendix V"</u>	
19. Form W-2012-01 certified/signed by the applicant and any authorized representatives of the applicant(s) listed in the application. (Form W-2012-01 is attached to the end of this application and can also be found at https://www.houstonpublicworks.org/municipal-settings-designation under the "Forms" section on the homepage.) <u>Label "Appendix W"</u>	
20. Form X-2012-01 signed by the property owner or authorized agent (if an authorized agent, you must provide the legal authorization instrument). (Form W-2012-01 is attached to the end of this application and can also be found at https://www.houstonpublicworks.org/municipal-settings-designation under the "Forms" section on the homepage.) <u>Label "Appendix X"</u>	
21. A pdf file of the application, Excel spreadsheet of water well owners and property owners for mailing notices, and the pdf file of the well log report. <u>Label "Appendix Y"</u>	

CITY OF HOUSTON

HOUSTON PUBLIC WORKS
HOUSTON WATER DIVISION

EXECUTIVE SUMMARY

Executive Summary

SKA Consulting, L.P. (SKA), on behalf of RKI, Inc., has prepared this City of Houston (COH) Municipal Setting Designation (MSD) Application for approximately 24.144 acres of privately owned commercially developed land and adjacent public rights of way (ROWs) identified as the designated property. The designated property is located at 2301 Central Parkway in Houston, Harris County, Texas. Presently, the designated property is registered in the Texas Commission on Environmental Quality (TCEQ) Voluntary Cleanup Program (VCP) under VCP ID No. 3226.

The approximately 24.144-acre designated property comprises two tracts owned by RKI and enrolled in the TCEQ VCP under VCP ID No. 3226, and adjacent portions of the public ROWs for Central Parkway, Dacoma Street, and Hempstead Road. Tracts 1 and 2 are described below.

- Tract 1 comprises 13.4 acres of occupied industrial land developed with an approximately 179,689 square foot (sq-ft) commercial building (Building 1) on the central portion and an approximately 24,245 sq-ft industrial building (Building 2) on the northeast part. Building 1 is the main building and comprises of a shop and office that was built in 1968. Building 2 is a winch shop that was built in 1980. On-site industrial operations include commercial grade truck equipment manufacturing of truck boxes, service bodies, and winches. The remainder of Tract 1 comprises concrete- or asphalt-paved parking and driving areas, and landscaped areas.
- Tract 2 comprises 6.6587 acres of vacant land with a grassy area, a densely wooded area, an earthen drainage ditch, and an abandoned asphalt road (former Ora Street) adjacent to south of Tract 1.

Properties in the vicinity of the designated property are characterized as a mix of industrial and commercial land. The designated property is bounded to the north by multi-tenant commercial buildings (2501 Central Parkway); to the south by Hempstead Road and Dacoma Street followed by an active Union Pacific Railroad (UPRR) railroad track; to the east by American Eagle Auto Storage Drive and Central Parkway followed by multi-tenant commercial buildings (4930 Dacoma Street and 2200 to 2500 Central Parkway); and to the west by a former railroad spur followed by multi-tenant commercial buildings.

No municipalities other than the COH have corporate limits within 0.5 miles of the boundary of the designated property. In addition, public drinking water is currently available to the designated property and properties located within a 0.5-mile radius surrounding the designated property by the COH public water supply system.

According to records obtained from Environmental Risk Information Services (ERIS) approximately 1,466 registered/permitted water wells are reportedly located within a 5-mile radius of the designated property. Of these, 10 water well records identify 8 distinct water wells reportedly located within a 0.5-mile radius of the designated property. Of these 8 water wells, 5 are reportedly plugged, unused, or were never drilled. The remaining three water wells located within a 0.5-mile radius of the designated property are located hydrogeologically upgradient or crossgradient of the protective concentration level (PCL) Exceedance (PCLE) Zones. Based on

their distances from the designated property and the lateral delineation of the contaminant plume in all directions at the designated property, the three operating water wells within a 0.5-mile radius of the designated property are not affected or potentially affected by the documented groundwater impacts at the designated property.

The depth to the uppermost groundwater bearing unit (GWBU) ranges from 5 to 30 feet below ground surface (ft-bgs). The only chemical of concern (COC) concentrations detected in the uppermost GWBU currently exceeding their respective TCEQ Texas Risk Reduction Program (TRRP) Tier 1 Residential groundwater-ingestion [$^{GW}GW_{ing}$] PCLs are the chlorinated compounds cis,1,2-dichloroethene (cis-1,2-DCE), trichloroethene (TCE), and vinyl chloride (VC) and total petroleum hydrocarbon (TPH) in the carbon 6 to carbon 12 (C_6 to C_{12}) range. The PCLE Zones for the above-mentioned compounds are fully delineated in all directions.

The source(s) of the chlorinated compound and TPH C_6 - C_{12} plumes are likely attributed to historical use of chlorinated compounds in metal preparation and historical and/or current use of petroleum products in or around Building 2 (winch shop) on the northeast section of Tract 1 on the designated property. No significant chlorinated solvent sources are currently used on the designated property, and the groundwater concentrations for the COCs exceeding respective PCLs are either stable, decreasing, or exhibiting concentrations below historical maximums, and the chlorinated compound plume is expected to continue to decrease over time. The TPH C_6 - C_{12} plume is relatively smaller in size and is fully delineated by monitoring wells producing consistently non-detectable concentrations of TPH C_6 - C_{12} , signifying the contaminant plume is stable in size.

No COCs have currently been identified in soil and/or groundwater on the designated property at concentrations exceeding their applicable TRRP Tier 1 Residential Soil or Groundwater PCLs with an MSD in place. The groundwater VC concentrations exhibited in monitoring wells 1-MW-8 and 1-MW-7 during groundwater sampling events in January 2023 and January 2024, respectively, exceeded both its TRRP Tier 1 Residential $^{GW}GW_{ing}$ and groundwater-to-air inhalation ($^{Air}GW_{inh-v}$) PCLs; however, based on more recent sampling events in April 2024 and July 2024, VC concentrations no longer exceed its non-ingestion TCEQ TRRP Tier 1 Residential PCL ($^{Air}GW_{inh-v}$) with an MSD in place.

The following Appendices, "A" through "Y," provide the requested documentation corresponding to the items in the attached COH MSD Application checklist. Supporting documentation for certain items is attached and included with the item's corresponding appendix.

APPENDIX A

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

VCP ID No. 3226

Provide a legal description of the boundaries of the designated property, including metes and bounds, and a copy of the deed for the property. A professional surveyor currently registered with the Texas Board of Professional Engineers and Land Surveyors must certify that all property descriptions with metes and bounds are accurate.

Appendix A – Legal Property Description_____

A legal description and metes and bounds for the designated property are included in **Appendix A**. In addition, copies of the deeds for the privately owned parcels of the designated property are included in **Appendix A**.

County: Harris
Project: 2301 Central Parkway (MSD)
Job No. 245561
MBS No. 24-581

FIELD NOTES FOR 24.144 ACRES

Being a tract containing 24.144 acres of land located in the John Flowers 1/3 League, Abstract Number 269, in Harris County, Texas; said 24.144 acres being a call 13.400 acre tract and a call 6.6527 acre tract both recorded in the name of Rawson-Koenig, Inc. in Harris County Clerk's File (H.C.C.F.) Numbers L524903 and S808721 respectively; a portion of a call 0.0572 acre tract recorded in the name of Albert S. Weycer, Trustee in H.C.C.F. Number F933621; a portion of Central Parkway (60 feet wide) as recorded in Volume 286, Page 62 of the Harris County Map Records (H.C.M.R.); a portion of Dacoma Street (width varies) as recorded in Volume 5868, Page 65 of the Harris County Deed Records (H.C.D.R.) and a portion of Hempstead Road (width varies); said 24.144 acres being more particularly described by metes and bounds as follows (bearings being based on the Texas Coordinate System, South Central Zone, NAD 83, US Survey Feet):

Beginning at the northwesterly corner of said 13.400 acre tract, the southwesterly corner of Unrestricted Reserve "C", Central Park Northwest Section II, a subdivision recorded in Volume 286, Page 62 of the H.C.M.R. and being on the easterly line of Unrestricted Reserve "A", Fairway Park, a subdivision recorded in Volume 184, Page 135 of the H.C.M.R.;

Thence, with the southerly line of said Unrestricted Reserve "C", the northerly line of said 13.400 acre tract, the northerly line of aforesaid 0.0572 acre tract, then through and across aforesaid Central Parkway, South 68 degrees 26 minutes 59 seconds East, a distance of 635.47 feet to the easterly Right-of-Way (R.O.W.) line of said Central Parkway;

Thence, with said R.O.W. line, the following three (3) courses:

- 1) South 00 degrees 46 minutes 59 seconds East, 549.11 feet;
- 2) 94.45 feet along the arc of a curve to the right, said curve having a radius of 332.00 feet, a central angle of 16 degrees 18 minutes 00 seconds and a chord that bears South 07 degrees 22 minutes 01 second West, a distance of 94.13 feet;
- 3) South 15 degrees 31 minutes 01 second West, a distance of 116.96 feet;

Thence, through and across said Central Parkway and said 0.0572 acre tract, then with the southerly line of said 13.400 acre tract and with the northerly line of Reserve "A", Cherosel Subdivision, a subdivision recorded in Film Code Number 355044 of the H.C.M.R., North 51 degrees 50 minutes 16 seconds West, a distance of 210.91 feet to the northeasterly corner of aforesaid 6.6527 acre tract;

Thence, with the easterly line of said 6.6527 acre tract, the westerly line of said Cherosel Subdivision, then through and across aforesaid Dacoma Street, South 13 degrees 50 minutes 07 seconds West, a distance of 749.82 feet;

Thence, through and across said Dacoma Street and aforesaid Hempstead Road, 575.44 feet along the arc of a curve to the right, said curve having a radius of 1,532.50 feet, a central angle of 21 degrees 30 minutes 51 seconds and a chord that bears North 68 degrees 17 minutes 51 seconds West, a distance of 572.07 feet to the southwesterly R.O.W. line of said Hempstead Road;

Thence, with said R.O.W. line, North 51 degrees 49 minutes 59 seconds West, a distance of 213.55 feet;

Thence, through and across said Hempstead Road, then with the westerly R.O.W. line of said Dacoma Street, the westerly line of said 6.6527 acre tract, the westerly line of aforesaid 13.400 acre tract and the easterly line of aforesaid Fairway Park, North 21 degrees 29 minutes 33 seconds East, a distance of 1,335.65 feet to the **Point of Beginning** and containing 24.144 acres of land.

This document does not reflect the results of an on the ground survey and is not to be used to convey or establish interests in real property except those rights and interests implied or established by the creation or reconfiguration of the boundary of the Municipal Setting Designation for which it was prepared.

FIELD NOTE DESCRIPTION
FOR A 6.6527 ACRE TRACT IN THE
JOHN FLOWERS 1/3 LEAGUE, A-269
HOUSTON, HARRIS COUNTY, TEXAS

Being 6.6527 acres (289,791 square feet) in the John Flowers 1/3 League, Abstract No. 269, Houston, Harris County, Texas, being part of and out of those certain tracts as recorded in Harris County Clerk's File ("H.C.C.F.") Nos. F921425 and F921426 and being more particularly described as follows:

BEGINNING at a 1/2 inch iron rod with "Rawson" cap found in the easterly line of Fairway Park as recorded in Volume 184, Page 185 of the Harris County Map Records and at the southwesterly corner of a called 13.400 acre tract as recorded in H.C.C.F. No. L524903;

THENCE along the southerly line of said called 13.400 acre tract, the following courses and distances:

S 66° 24' 48" E, 479.05 feet to a found 5/8 inch iron rod,

N 16° 06' 00" E, 314.37 feet to a found fence corner,

S 74° 14' 34" E, 85.04 feet to a found iron rod with "Rawson" cap, and

S 49° 46' 17" E, 164.47 feet to a found 5/8 inch iron rod;

THENCE S 15° 54' 06" W, a distance of 574.57 feet to a 1/2 inch iron rod set in the northerly line of Dacoma Street (variable width), from said point a found 1/2 inch iron rod bears S 05° 00' 55" E, 6.37 feet;

THENCE along the northerly line of the Dacoma Street-Hempstead Highway (variable width) intersection and along a 1,357.50 feet radius curve to the right, having a central angle of 27° 42' 40" and a chord of N 63° 30' 20" W, 650.17 feet, an arc length distance of 656.55 feet to a set 1/2 inch iron rod;

THENCE N 49° 39' 00" W, along the northerly line of said Hempstead Highway, a distance of 110.00 feet (called 107.27 feet) to a 1/2 inch iron rod set in the easterly line of said Fairway Park;

THENCE N 23° 03' 47" E (called N 23° 37' 00" E), along the easterly line of said Fairway Park, a distance of 228.54 feet to the POINT OF BEGINNING and containing 6.6527 acres (289,791 square feet) of land.

EXHIBIT "A"

Being 13.400 acres out of the John Flowers 1/3 League, Abstract No. 269, Houston, Harris County, Texas; said 13.400 acre tract being part of and out of that certain tract described by instrument filed under County Clerk's File No. F921426, and recorded under Film Code No. 117-82-1030, of the Official Public Records of Real Property of Harris County, Texas, and being a portion of that certain tract described by instrument filed under Harris County Clerk's File No. F921425, and recorded under File Code No. 117-82-1027, of said property records; said 13.400 acre tract of land being more fully described as follows:

COMMENCING at a found 1 1/4 inch iron pipe marking the southeasterly corner of Central Park Northwest, Section Two, as recorded in Volume 286, Page 62 of the Harris County Map Records of Harris County, Texas; said 1 1/4 inch iron pipe also marking the northerly right of way line for Dacoma Street (width varies);

THENCE S 89 degrees 04' 00" W, a distance of 278.80 feet along said northerly right of way line for Dacoma street to a found 1 3/8 inch iron rod marking to beginning of a curve to the right;

THENCE along said curve to the right having a central angle of 13 degrees 34' 20" and a radius of 1357.50 feet, an arc distance of 321.57 feet, subtended by a chord bearing S 84 degrees 08' 50" E, 320.82 feet in length, to a found 5/8 inch iron rod in the northerly right of way line for Dacoma Street (width varies) said point also marking the southeast corner of the remainder of lot 4 out of the ZONANA Subdivision as recorded in Volume 25, Page 1 of the Harris County Map Records;

THENCE N 15 degrees 54' 06" E, along the easterly line of said ZONANA Subdivision, for total length of 574.57 feet to a found 1/2 inch iron rod; said point being the Point of Beginning;

THENCE S 49 degrees 45' 31" E, a distance of 143.98 feet to a found 5/8 inch iron rod found in the westerly line of a 21.9867 acre tract as described by instrument filed under County Clerk's File No. F808743, and recorded under Film Code No. 109-86-0193, of the Official Public Records of Real Property of Harris County, Texas;

THENCE N 17 degrees 35' 00" E, along westerly line of said 21.9867 acre tract a distance of 91.10 feet to a set 5/8 inch iron rod marking the beginning of a curve to the left;

THENCE along said curve to the left having a central angle of 16 degrees 18' 00", a radius of 270.00 feet, subtended by a chord bearing N 09 degrees 26' 00" E, 76.55 feet in length, and a total distance of 76.81 feet to a found 5/8 inch iron rod, said rod being in the westerly line of said 21.9867 acre tract;

THENCE N 01 degrees 17' 00' E, along the westerly line of said 21.9867 acre tract a distance of 574.58 feet to a set 5/8 inch iron rod;

THENCE N 66 degrees 23' 00" W, a distance of 570.83 feet to a set 5/8 inch iron rod marking an interior corner of to said 21.9867 acre tract;

THENCE S 23 degrees 37' 00" W, with the easterly line for the Fairway Park Subdivision as recorded in Volume 184, Page 185, of the Harris County Map Records, a distance of 931.73 feet to a set 5/8 inch iron rod;

THENCE S 66 degrees 24' 48" E, a distance of 479.05 feet to a set 5/8 inch iron rod;

THENCE N 16 degrees 06' 00" E, a distance of 314.37 feet to a found cyclone fence corner;

THENCE S 74 degrees 14' 34" E, a distance of 85.04 feet to a found 1/2 inch iron rod;

THENCE S 49 degrees 46' 17" E, a distance of 164.47 feet to the Place of Beginning and containing 13.400 acres (583704 square feet) of land more or less.

EASEMENT TRACT:

Grantor's easement rights appurtenant to 13.400 acres out of the John Flowers 1/3 League, Abstract No. 269, Houston, Harris County, Texas, as such rights were created in that certain Easement Agreement by and between Albert S. Weycer, Trustee, etal, and Keystone International, Inc., as set forth under instrument filed under Clerk's File No. J851285.

APPENDIX B
City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

VCP ID No. 3226

A description of the current use and, to the extent known, the anticipated use(s) of the designated property and properties within 500 feet of the boundary of the designated property.

Appendix B – Property Use

The following is a description of the current land use and, to the extent known, the anticipated uses of the designated property and surrounding properties located within 500 feet of the designated property boundary.

Current and Anticipated Land Use of the Designated Property

The approximately 24.144-acre designated property comprises two tracts owned by RKI and enrolled in the Texas Commission on Environmental Quality (TCEQ) Voluntary Cleanup Program (VCP) under VCP ID No. 3226, and adjacent portions of the public rights of way (ROWs) for Central Parkway, Dacoma Street, and Hempstead Road. Tracts 1 and 2 which are described below.

- Tract 1 comprises 13.4 acres of occupied industrial land developed with an approximately 179,689 square foot (sq-ft) commercial building (Building 1) on the central portion and an approximately 24,245 sq-ft industrial building (Building 2) on the northeast part. Building 1 is the main building and comprises of a shop and office that was built in 1968. Building 2 is a winch shop that was built in 1980. On-site industrial operations include commercial grade truck equipment manufacturing of truck boxes, service bodies, and winches. The remainder of Tract 1 comprises concrete- or asphalt-paved parking and driving areas, and landscaped areas.
- Tract 2 comprises 6.6587 acres of vacant land with a grassy area, a densely wooded area, an earthen drainage ditch, and an abandoned asphalt road (former Ora Street) adjacent to south of Tract 1.

The long-term future use of the privately owned parcels within the designated property is planned to remain industrial. A boundary survey and metes and bounds descriptions of the designated property are included in **Appendix A**.

Using Houston Heights 7.5-minute topographic quadrangle map of the area, the approximate elevation of the designated property is 65 to 75 feet above mean sea level (AMSL) (see **Figure C.1**). The topography of the designated property is relatively flat (i.e., no significant slope direction or grade). Moreover, there are no significant topographic features located on or near the designated property that affect chemical of concern (COC) distribution on the designated property. The closest surface water body to the designated property is an unnamed tributary of White Oak Bayou. The unnamed tributary is a perennial, freshwater stream located approximately 260 feet east and 530 feet north of the designated property. The designated property is in the White Oak Bayou Watershed. According to the Federal Emergency Management Agency (FEMA) Federal Insurance Rate Map (FIRM) Nos. 48201C0665M and 48201C0655M (dated June 9, 2014), the designated property is classified as Zone X (unshaded) and is determined by FEMA to be outside the 0.2% annual chance floodplain. A watershed map and a FEMA floodplain map of the area containing the designated property are included as **Figures C.2** and **C.3**, respectively.

According to groundwater level measurements collected by SKA Consulting, L.P. (SKA) in

September and October 2022, February and October 2023, and January and July 2024, the groundwater flow direction beneath the northern portion of the designated property and the off-site monitoring wells is generally to the northeast, and the shallow groundwater flow direction beneath the southern portion of the designated property is to the southeast. The hydraulic gradient on the northern portion of the designated property ranges from approximately 0.0030 to 0.0048 feet per foot (ft/ft). Groundwater gradient maps for the designated property are included in **Figures C.6A through C.6F**.

Current and Anticipated Land Use of the Surrounding Properties

Properties in the vicinity of the designated property are characterized as a mix of industrial and commercial land. The designated property is bounded to the north by multi-tenant commercial buildings (2501 Central Parkway); to the south by Hempstead Road and Dacoma Street followed by an active Union Pacific Railroad (UPRR) railroad track; to the east by American Eagle Auto Storage Drive and Central Parkway followed by multi-tenant commercial buildings (4930 Dacoma Street and 2200 to 2500 Central Parkway); and to the west by a former railroad spur followed by multi-tenant commercial buildings.

A field receptor survey was performed by SKA on January 30, 2024, to identify potential sensitive receptors within 500 feet of the designated property. During the receptor survey, no hospitals, nursing homes, schools, or daycare centers were observed within 500 feet of the designated property. However, Gateway of Hope Church was observed within a multi-tenant commercial complex located approximately 285 feet east of Tract 2 at 2200 Central Parkway. As such, aside from the church, no sensitive receptors are located within 500 feet of the designated property. Nevertheless, Gateway of Hope Church is located hydrogeologically upgradient from the laterally delineated chlorinated compound groundwater plume. A map detailing the land use of the surrounding properties within 500 feet of the designated property is presented in **Figure C.4**. The future land use of the designated property's surrounding areas is anticipated to remain mixed industrial and commercial.

Water Wells

According to records obtained from Environmental Risk Information Services (ERIS), approximately 1,466 registered/permitted water wells are reportedly located within a 5-mile radius of the designated property. Of these, 10 water well records identify 8 distinct water wells reportedly located within a 0.5-mile radius of the designated property. Of these 8 water wells, 5 are reportedly plugged, unused, or were never drilled. The remaining three water wells located within a 0.5-mile radius of the designated property are located hydrogeologically upgradient or crossgradient of the protective concentration level (PCL) exceedance (PCLE) Zones. Based on their distances from the designated property and the lateral delineation of the contaminant plume in all directions at the designated property, the three operating water wells within a 0.5-mile radius of the designated property are not affected or potentially affected by the documented groundwater impacts at the designated property.

APPENDIX C

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

VCP ID No. 3226

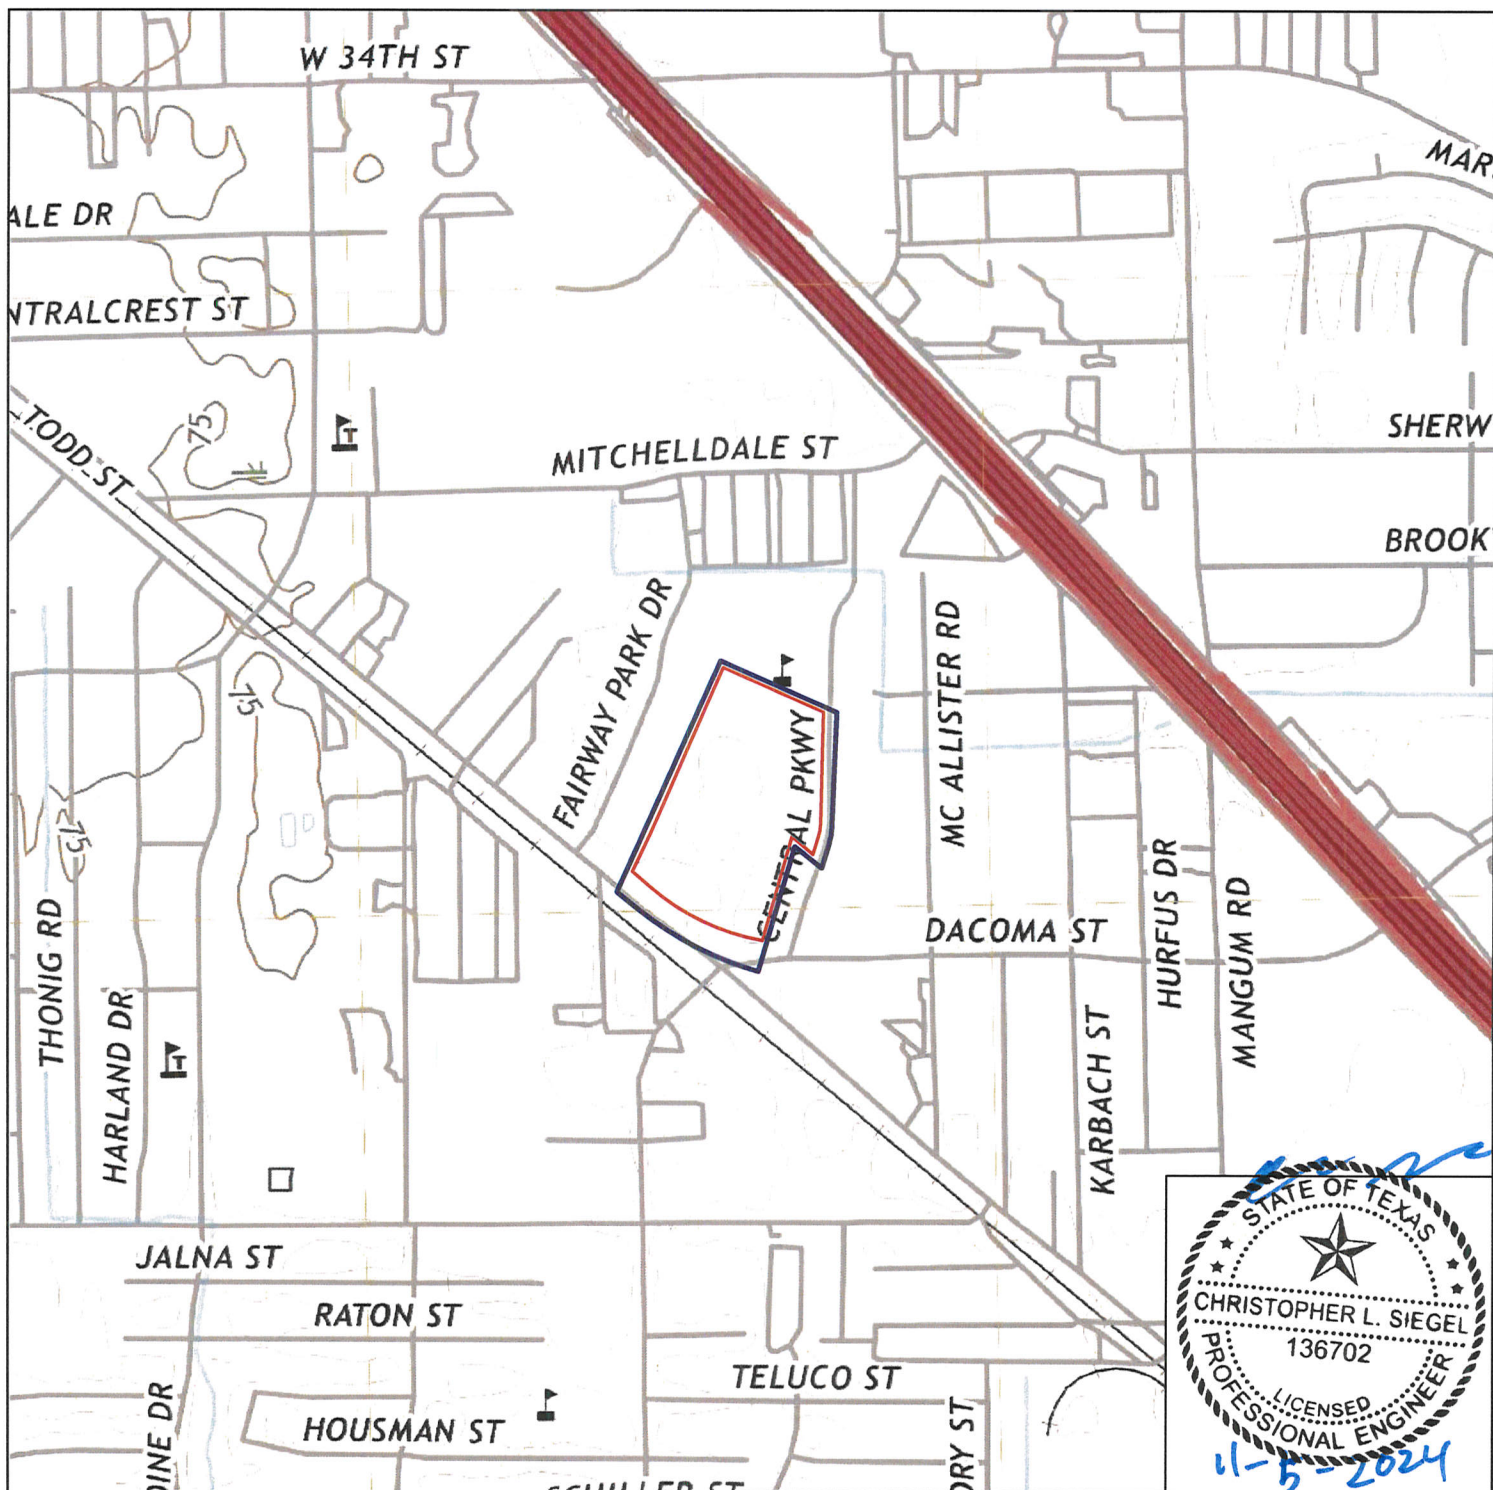

A site map showing.

- a. The location of the designated property.***
- b. The topography of the designated property as indicated on publicly available sources, which must note the watershed including the nearest surface water body and whether the designated property is located in a floodplain or floodway, as those terms are defined in Chapter 19 of the Code of Ordinances.***
- c. The detected area of groundwater contamination.***
- d. The location of all soil sampling locations and all groundwater monitoring wells.***
- e. Groundwater gradients, to the extent known, and direction of groundwater flow.***
- f. The ingestion protective concentration level exceedance zone for each contaminant of concern, to the extent known.***
- g. Depth to groundwater for each affected zone.***

LEGEND

- SUBJECT PROPERTY BOUNDARY
- DESIGNATED PROPERTY BOUNDARY

EXPLANATION:

Zone AE - Special flood hazard areas subject to inundation by the 1% annual chance flood. Base flood elevations determined.

Zone X (Shaded) - Areas determined to be within the 0.2% annual chance floodplain; areas of 1% annual chance flood with average depths of less than 1 foot or with drainage areas less than 1-square mile; and areas protected by levees from 1% annual chance flood.

Zone X (Unshaded) - Areas determined to be outside the 0.2% annual chance floodplain.

APPENDIX D

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

Provide for each contaminant of concern within the designated groundwater:

- a. A description of the ingestion protective concentration level exceedance zone and the non-ingestion protective concentration level exceedance zone, including a specification of the horizontal area and the minimum and maximum depth belowground surface.***
- b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.***
- c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water).***

Appendix D – COCs in Designated Groundwater

A summary of the COCs currently present in the groundwater of the designated property follows. Maps showing the current concentrations of COCs in the shallow groundwater-bearing unit (GWBU) are provided in **Appendix C**, and summary tables of all groundwater sampling and analysis results obtained for the designated property are provided as **Table G.2** in **Appendix G**.

Ingestion PCLE Zones in Designated Groundwater

COCs detected in the uppermost GWBU on the designated property include the following:

- Volatile Organic Compounds (VOCs) – acetone, benzene, chlorobenzene, chloromethane, 1,1-dichloroethene (1,1-DCE), cis-1,2-dichloroethene (cis-1,2-DCE), trans-1,2-dichloroethene (trans-1,2-DCE), naphthalene, tetrachloroethene (PCE), 1,1,2-trichloroethane (1,1,2-TCA), trichloroethene (TCE), and vinyl chloride (VC);
- Total Petroleum Hydrocarbons (TPH) – in the carbon 6 to carbon 12 (C₆ to C₁₂) carbon ranges; and

Of the COCs detected in groundwater, only chlorinated compound concentrations (specifically, cis-1,2-DCE, TCE, and VC) and TPH in the C₆ to C₁₂ carbon range currently exceed their respective Texas Risk Reduction Program (TRRP) Tier 1 Residential groundwater ingestion (^{GW}GW_{Ing}) PCLs.

Chlorinated compounds 1,1-DCE, trans-1,2-DCE, and PCE have historically exceeded their respective TRRP Tier 1 Residential ^{GW}GW_{Ing} PCLs. However, as of July 2024 sampling results, none of these COCs currently exceeded their respective TRRP Tier 1 Residential ^{GW}GW_{Ing} PCLs; as such, these COCs no longer have PCLE Zones. The occurrence of 1,1-DCE, trans-1,2-DCE, and PCE coincided with the current chlorinated compound PCLE Zone as shown on **Figure C.7** in **Appendix C**.

Further discussions regarding the TRRP groundwater ingestion PCLE Zones follow. The extent of the groundwater PCLE Zones are shown in **Figure C.7** in **Appendix C**.

Chlorinated Compound PCLE Zone

The chlorinated compound PCLE Zone in the uppermost GWBU comprises only cis-1,2-DCE, TCE, and VC and currently encompasses monitoring wells 1-MW-7, 1-MW-8, and 1-MW-10. The maximum concentration of cis-1,2-DCE identified in groundwater on the designated property as of August 2022 was detected in a groundwater sample collected from monitoring well 1-MW-7 in December 2022, which exhibited a cis-1,2-DCE concentration of 21.4 mg/L. The maximum concentration of TCE identified in groundwater on the designated property as of August 2022 was detected in a groundwater sample collected from monitoring well 1-MW-8 in January 2023, which exhibited a TCE concentration of 2.42 mg/L. The maximum concentration of VC identified in groundwater on the designated property as of August 2022 was detected in a groundwater sample collected from monitoring well 1-MW-8 in January 2023, which exhibited a VC concentration of 5.47 mg/L. The Chlorinated Compound PCLE Zone encompasses approximately 130,000 square feet according to July 2024 groundwater sampling data and interpolation assuming first order decay rates (see **Figure C.7**).

TPH C₆-C₁₂ PCLE Zone

The TPH C₆-C₁₂ PCLE zone in the uppermost GWBU currently encompasses monitoring wells 1-MW-7 and 1-MW-8 only. The maximum concentration of TPH C₆-C₁₂ identified in groundwater on the designated property as of August 2022 was detected in a groundwater sample collected from monitoring well 1-MW-7 in December 2022, which exhibited a TPH C₆-C₁₂ concentration of 3.11 J mg/L. The TPH C₆-C₁₂ PCLE Zone encompasses approximately 26,000 square feet according to July 2024 groundwater sampling data.

COC Chemical Properties

The chlorinated compounds (specifically, 1,1-DCE, cis-1,2-DCE, trans-1,2-DCE, PCE, TCE, and VC) detected in the uppermost GWBU at the designated property are based on the ethene molecular structure (two doubled-bounded carbon atoms). The specified chlorinated compounds are present in the groundwater in the dissolved-phase, and no direct evidence of non-aqueous phase liquid (NAPL) has been observed or detected. Due to its high density, chlorinated compound NAPL is considered a dense non-aqueous phase liquid (DNAPL). Typically, dissolved-phase COCs preferentially migrate with groundwater flow. However, DNAPL-phase COCs tend to migrate vertically and “sink” in GWBUs and can migrate along the dip of geologic contacts, possibly counter to groundwater flow. Thirteen permanent monitoring wells were installed at the designated property, out of which twelve fully penetrate the uppermost GWBU. DNAPL has not been observed in any of the monitoring wells located on the designated property, and DNAPL does not appear to be present on the designated property.

As previously discussed, these chlorinated compounds (cis-1,2-DCE, TCE, and VC) PCLE Zones in the uppermost GWBU are delineated laterally by off-site monitoring wells to the north and northeast and are delineated vertically by a high plasticity clay layer measured to be at least two feet thick in monitoring well 1-MW-8 at the bottom of the borehole, which serves as an aquitard between the uppermost GWBU and other, deeper GWBUs. Concentrations of PCE and TCE (if present, the likely compounds within a DNAPL from a PCE and TCE release) are two or more orders of magnitude less than their respective solubility limits indicating DNAPL is not likely present. A clay layer, even if only 2 feet in thickness, likely will retard vertical mobility of groundwater to prevent vertical migration of dissolved phase contaminants within the groundwater from adversely impacting deeper GWBUs.

Non-Ingestion PCLE Zone in Designated Groundwater

As previously discussed, the only COCs detected in the shallow GWBU that currently exceed their applicable TRRP Tier 1 Residential ^{GW}GW_{ing} PCLs are cis-1,2-DCE, TCE, VC, and TPH in the C₆ to C₁₂ carbon range. These COCs have not further exceeded their applicable TRRP non-ingestion groundwater PCL (i.e., TRRP Tier 1 Residential inhalation of volatiles from groundwater [^{Air}GW_{inh-v}] PCL for a 0.5-acre source area), except for the following:

- VC concentrations identified in groundwater at the designated property exceeded its applicable non-ingestion PCL of 3.8 mg/L in permanent monitoring well 1-MW-7 in January 2024 and permanent monitoring well 1-MW-8 in January 2023. These exceedances ranged from 4.39 to 5.47 mg/L; however, based on more recent sampling events in April and July 2024, VC concentrations now only exceed their TCEQ TRRP Tier 1 Residential ^{GW}GW_{ing} PCL.

As such, a non-ingestion PCLE zone for VC is not currently present on the designated property.

APPENDIX E

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A table displaying the following information for each contaminant of concern, to the extent known:

- a. The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/kg for soils and mg/L for groundwater.***
- b. The critical protective concentration level without the municipal setting designation, highlighting any exceedances.***

Appendix E – Summary of Soil and Groundwater Data

This appendix summarizes the results of the affected property assessment conducted at the designated property.

Summary of Soil Analytical Results

From August 2022 to 2024, twenty soil borings and permanent monitoring wells were installed by SKA as part of the assessment activities at the designated property. A total of 37 soil samples have been collected from the designated property and analyzed in the testing laboratory for various COCs, including VOCs, PAHs, TPH, and Resource Conservation and Recovery Act (RCRA) 8 metals.

The results of soil assessment activities indicated that soil COC concentrations did not exceed TRRP Tier 1 residential soil PCLs, based on a 0.5-acre source area without an MSD in place, except for the following:

Surface Soil (0 to 15 ft-bgs)

- cis-1,2-DCE concentrations measured in surface soil samples collected between 7 and 14 ft-bgs exceeded its soil-to-groundwater ingestion [^{GW}Soil_{ing}] PCL of 0.25 mg/kg at monitoring wells 1-MW-7 and 1-MW-8.
- VC concentrations measured in surface soil samples collected between 7 and 14 ft-bgs exceeded its ^{GW}Soil_{ing} PCL of 0.022 mg/kg at monitoring wells 1-MW-7 and 1-MW-8.
- Lead concentrations measured in surface soil samples collected between 0 and 0.5 ft-bgs exceed its ^{GW}Soil_{ing} PCL of 3.1 mg/kg at soil borings SB-14 through SB-19. These results also exceeded the TRRP Texas-Specific Soil Background Concentration of 15 mg/kg. Per TCEQ Regulatory Guidance RG-366/TRRP-22 dated April 2013, SKA calculated a site-specific Tier 2 Residential ^{GW}Soil_{ing} PCL for lead to assess if its concentrations were protective of groundwater. The calculation of a Tier 2 PCL is a risk-based analysis that provides more consideration for site-specific soil parameters and thus was calculated for soils unique to the designated property. The calculated TRRP Tier 2 Residential ^{GW}Soil_{ing} PCL for lead is 550 mg/kg. As such, lead concentrations on the designated property did not exceed its respective TRRP Tier 2 PCL.

Subsurface Soil (>15 ft-bgs)

- cis-1,2-DCE concentrations measured in subsurface soil samples collected between 16 and 30 ft-bgs exceeded its ^{GW}Soil_{ing} PCL of 0.25 mg/kg at monitoring wells 1-MW-7 and 1-MW-8.
- A PCE concentration measured in subsurface soil sample 1-MW-8 (29-30 ft-bgs) exceeded its ^{GW}Soil_{ing} PCL of 0.050 mg/kg.
- TCE concentrations measured in subsurface soil samples between 22 and 30 ft-bgs exceeded its ^{GW}Soil_{ing} PCL of 0.034 mg/kg at monitoring well 1-MW-8.
- VC concentrations measured in subsurface soil samples collected between 18 and 30 ft-bgs exceeded its ^{GW}Soil_{ing} PCL of 0.022 mg/kg at monitoring wells 1-MW-7 and 1-MW-8.

For non-ingestion pathways (i.e., total soil combined pathway for surface soils and soil-to-air inhalation pathway for subsurface soils), COC concentrations did not exceed Tier 1 residential soil PCLs based on a 0.5-acre source area without an MSD in place.

A summary of maximum COC concentrations identified in surface soil on the designated property compared to both their TRRP Tier 1 $^{GW}Soil_{Ing}$ and total soil combined ($^{Tot}Soil_{Comb}$) PCLs is included in **Table E.1**. Similarly, a summary of maximum COC concentrations found in the property's subsurface soil and respective PCLs can be found in **Table E.2**.

Summary of Groundwater Analytical Results

Between August 2022 and October 2023, a total of thirteen on-site and off-site permanent monitoring wells (1-MW-1 through 1-MW-13) were installed as part of groundwater assessment activities for the designated property. Multiple groundwater monitoring events have been conducted for the designated property, and a total of 48 groundwater samples have been analyzed in the testing laboratory for various COCs, including VOCs and TPH.

The results of groundwater assessment activities indicate that COC concentrations did not exceed TRRP Tier 1 residential groundwater PCLs, based on a 0.5-acre source area without an MSD in place, except for the following:

- 1,1-Dichloroethene concentrations exceeded its groundwater ingestion [$^{GW}GW_{Ing}$] PCL of 0.0070 mg/L at monitoring wells 1-MW-7 and 1-MW-8.
- cis-1,2-DCE concentrations exceeded its TRRP $^{GW}GW_{Ing}$ PCL of 0.070 mg/L at monitoring wells 1-MW-7, 1-MW-8, and 1-MW-10.
- trans-1,2-DCE concentrations exceeded its TRRP $^{GW}GW_{Ing}$ PCL of 0.10 mg/L at monitoring wells 1-MW-7 and 1-MW-8.
- PCE concentrations exceeded its TRRP $^{GW}GW_{Ing}$ PCL of 0.0050 mg/L at monitoring well 1-MW-8.
- TCE concentrations exceeded its TRRP $^{GW}GW_{Ing}$ PCL of 0.0050 mg/L at monitoring wells 1-MW-7, 1-MW-8, and 1-MW-10.
- VC concentrations exceeded its TRRP $^{GW}GW_{Ing}$ PCL of 0.0020 mg/L at monitoring wells 1-MW-7, 1-MW-8, and 1-MW-10.
- TPH (C₆-C₁₂) concentrations exceeded its TRRP $^{GW}GW_{Ing}$ PCL of 0.98 mg/L at monitoring wells 1-MW-7 and 1-MW-8.

For non-ingestion pathways (i.e., the groundwater-to-air inhalation pathway), COC concentrations did not exceed TRRP Tier 1 residential groundwater PCLs, based on a 0.5-acre source area without an MSD in place, except for the following:

- VC concentrations exceeded its groundwater-to-air inhalation [$^{Air}GW_{Inh-V}$] PCL of 3.8 mg/L at monitoring wells 1-MW-7 and 1-MW-8. These exceedances ranged from 4.39 to 5.47 mg/L; however, based on more recent sampling events in April and July 2024, VC concentrations no longer exceed its $^{Air}GW_{Inh-V}$ PCL.

A summary of maximum COC concentrations identified in groundwater on the designated property compared to both their $^{GW}GW_{Ing}$ and $^{Air}GW_{Inh-V}$ PCLs is included in **Table E.3**.

APPENDIX G

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A statement as to whether the source of the plume has been removed, the plume of contamination is stable (i.e. no change) or contracting, and the plume is delineated, with the basis for that statement. Please include historical sampling data.

Appendix G – Plume Stability

The following sections provide discussions regarding the extent of any soil plumes and the extent and stability of the groundwater contaminant plumes within the designated property.

Soil Plumes

Based on the soil assessment results, only concentrations of the chlorinated compounds cis-1,2-DCE, PCE, TCE, and VC exceed their applicable TRRP Tier 1 or Tier 2 Residential^{PCLs} without an MSD.

The elevated concentrations of chlorinated compounds in soil on the designated property were measured at monitoring wells 1-MW-7 and 1-MW-8. These exceedances in the soil of the designated property align geographically with the elevated concentrations of chlorinated compounds found in the uppermost GWBU on the designated property.

A summary of all soil analytical results for the designated property is included in **Table G.1**.

Groundwater Plumes – Delineation and Sources

Based on the groundwater assessment results, only concentrations of the chlorinated compounds cis-1,2-DCE, TCE, and VC and TPH in the C₆-C₁₂ range exceed their applicable TRRP Tier 1 Residential^{GW}GW_{Ing} PCLs. The groundwater contaminant plumes identified at the designated property are described in detail below.

Chlorinated Compound Plume

As previously discussed in **Appendix D**, the PCLE Zones for cis-1,2-DCE, TCE, and VC and previously existing PCLE Zones for 1,1-DCE, trans-1,2-DCE, and PCE in the uppermost GWBU encompass monitoring wells 1-MW-7, 1-MW-8, and 1-MW-10 on Tract 1 and into the multi-tenant commercial buildings (2501 Central Parkway) and Central Parkway adjoining Tract 1 to the northeast. The source of the chlorinated compound plume is attributed to the former use of chlorinated solvents containing PCE and/or TCE in or around Building 2 (winch shop) on the northeast section of Tract 1 on the designated property. As such, the source(s) of the chlorinated compound contaminant plume is no longer active.

The groundwater chlorinated compound plume is fully delineated as depicted in **Figure C.7**, including in the hydrogeologically crossgradient to downgradient directions, by on-site and off-site permanent monitoring wells installed at the designated property and adjoining properties to the north and northeast, located approximately 210 to 480 feet from the designated property. The groundwater analytical data for permanent monitoring wells surrounding the chlorinated compound plumes (see **Table G.2**) indicates concentrations of cis-1,2-DCE, PCE, TCE, and VC have been either non-detectable or below their applicable TRRP Tier 1 Residential^{GW}GW_{Ing} PCLs during all groundwater monitoring events conducted between 2022 and 2024.

The vertical extent of the chlorinated ethene groundwater plume is delineated by the bottom of the upper GWBU.

TPH C₆-C₁₂ Plume

As previously discussed in **Appendix D**, the TPH C₆-C₁₂ PCLE zone in the uppermost GWBU encompasses monitoring wells 1-MW-7 and 1-MW-8 on Tract 1. The source of the TPH C₆-C₁₂

in groundwater is attributed to a historical and/or current release(s) of petroleum products in or around Building 2 (winch shop) on the northeast section of Tract 1 on the designated property.

The TPH C₆-C₁₂ plume is fully delineated, including in the hydrogeologically crossgradient to downgradient directions, by on-site and off-site permanent monitoring wells installed at the designated property and adjoining properties to the north and northeast, located approximately 210-480 feet from the designated property. The groundwater analytical data for permanent monitoring wells surrounding the TPH C₆-C₁₂ plume (see **Table G.2**) indicates concentrations of TPH in the C₆-C₁₂ range have been either non-detectable or below their applicable TRRP Tier 1 Residential ^{GW}GW_{ing} PCLs during all groundwater monitoring events conducted between 2022 and 2024.

The vertical extent of the TPH C₆-C₁₂ groundwater plume is delineated by the bottom of the upper GWBU.

All other COCs in groundwater were detected at concentrations below their respective TRRP Residential Assessment Levels (RALs) without an MSD. A summary of all groundwater analytical results for the designated property is included in **Table G.2**.

Groundwater Plumes – Stability

A stable and/or reducing groundwater plume provides evidence that natural conditions are effectively controlling the extent of COCs and that expansion of the groundwater plume over time is unlikely to occur. The natural processes that are primarily responsible for achieving a stable groundwater plume involve biodegradation by native microorganisms, adsorption of COCs to soil particles, and dispersion of the COCs through groundwater flow. Collectively, these processes are referred to as natural attenuation.

TCEQ regulatory guidance recommends demonstrating a stable and/or reducing groundwater plume using a lines-of-evidence approach (RG-366/TRRP-33, revised September 2010). The lines-of-evidence approach is employed to document that natural attenuation is occurring at a rate that is sufficient to effectively control the migration of COCs in groundwater, resulting in protective conditions once the institutional control (i.e., the COH MSD Ordinance and TCEQ MSD Certificate) is in place. The lines of evidence which can be used include:

1. **Primary lines of evidence (PLOE)**: Relies on historical groundwater data to demonstrate a stable or decreasing trend of COC concentrations over time and with distance away from the source area.
2. **Secondary lines of evidence (SLOE)**: Uses hydrogeologic or chemical indicators to document the occurrence of natural attenuation processes. Examples include the presence of daughter products to indicate active degradation of the parent compound, ratios of parent compounds to daughter products to evaluate the extent of degradation, geochemistry data to demonstrate that appropriate subsurface conditions exist, and groundwater flow rate calculations for assessing plume migration potential.
3. **Other lines of evidence (OLOE)**: Most often consist of predictive modeling studies and laboratory or field studies to further demonstrate an understanding of the natural attenuation processes occurring at the designated property and their effectiveness at controlling PCLE zone migration and decreasing COC concentrations.

The extent to which the various lines of evidence are evaluated at a site, or whether the analysis proceeds beyond the primary lines of evidence, depends on the project objectives and the extent of available data. For the groundwater plumes beneath the designated property, SKA evaluated primary and/or secondary lines of evidence using the groundwater monitoring data generated from 2022 to 2024.

PLOE

Trends in groundwater concentrations over time were analyzed using the Mann-Kendall test for 1,1-DCE, cis-1,2-DCE, trans-1,2-DCE, PCE, TCE, VC, as well as total chlorinated ethenes (sum of the concentrations of all related compounds), and TPH (C₆-C₁₂) concentrations in monitoring wells 1-MW-7, 1-MW-8, and 1-MW-10. When samples were non-detectable, a concentration less than the lowest detected concentration was used for the statistical analysis. The Mann-Kendall analyses were only performed for the COCs detected in monitoring wells that have exceeded their respective RAL without an MSD in place. The Mann-Kendall analyses for the above-mentioned COCs are included in **Attachment G.1 through Attachment G.8**, and a summary of the resulting trends are listed in **Table G.3**.

The analysis concluded that all chlorinated compound concentrations on the designated property are generally stable or decreasing in trend. Of the 17 Mann-Kendall analyses conducted for total chlorinated ethenes and the individual chlorinated compound constituents, 9 analyses indicated that the total chlorinated ethenes and the individual chlorinated compound constituents were stable. Five analyses indicated decreasing concentrations. Three analyses indicated no trend. None of the analyses indicated increasing concentrations. Therefore, the net trend for total chlorinated ethenes and the individual chlorinated compound constituent concentrations are concluded to be stable and decreasing. 1,1-DCE, trans-1,2-DCE, and PCE concentrations have attenuated such that there is no longer PCLE Zones present for these COCs. Based on the Mann-Kendall analyses, the cis-1,2-DCE, TCE, and VC PCLE Zones are concluded to be stable and/or decreasing.

Since the source of the chlorinated compound release on the designated property is no longer active and the chlorinated compound release is from historical on-site activities, the chlorinated compound concentrations are expected to further decrease over time through natural attenuation as indicated by the Mann-Kendall analyses.

The TPH C₆-C₁₂ concentrations on the designated site have “no trend” according to the Mann-Kendall test shown in **Attachment G.8**. However, it is important to note that the TPH C₆-C₁₂ concentrations from the sampling events since November 2023 have all been lower than the historical maximum concentration of TPH C₆-C₁₂ taken at permanent monitoring wells 1-MW-7 in December 2022 and 1-MW-8 in January 2023. Petroleum compounds (TPH) are still utilized on site, but no existing source areas were identified in soils. As such, the TPH C₆-C₁₂ concentrations measured over time indicate natural, random fluctuations that do not indicate concentrations will increase over time. In addition, TPH C₆-C₁₂ has only been detected in the permanent monitoring wells 1-MW-7 and 1-MW-8 since the permanent monitoring wells were installed in 2022. As such, the TPH C₆-C₁₂ PCLE zone is not moving, and therefore, the PLOEs generally indicate that the TPH C₆-C₁₂ PCLE zone is stable in size.

As of August 2022, groundwater sampling data from the designated property and adjoining properties to the north and northeast of Tract 1 demonstrate that the chlorinated compound and

TPH C₆-C₁₂ plumes are fully delineated and not expanding laterally. The permanent monitoring wells surrounding 1-MW-7, 1-MW-8, and 1-MW-10 have consistently tested below applicable TRRP Tier 1 PCLs or under sample detection limits; as such, the chlorinated ethene and TPH plumes are stable and expected to remain stable or decrease over time based on the PLOEs.

SLOE

A summary of average pH and temperature over time in groundwater samples from permanent monitoring wells 1-MW-1 through 1-MW-13 is included in **Table G.4**.

A pH between 6.0 and 8.5 is generally required for the complete reductive dechlorination of chlorinated compounds to innocuous products (such as ethane, ethene, or carbon dioxide) to occur. Groundwater with a pH outside of these parameters allows for only slow or incomplete dechlorination, with no reductive dechlorination occurring when pH is less than 5.0 or greater than 10.0. Groundwater sampling data for pH indicates that the pH levels are well within the required pH range of 6.0 to 8.5 for complete reductive dechlorination to occur within the area of the plume, as shown in **Table G.4**.

At temperatures greater than 20 degrees Celsius (°C), biochemical processes are accelerated, including reductive dechlorination. Groundwater sampling temperature data from permanent monitoring wells 1-MW-1 through 1-MW-13 indicates that the average groundwater temperature on the designated property is greater than 20 °C. Therefore, the groundwater temperature within the area of the plume is above the necessary temperature for accelerated reductive dechlorination to occur (**Table G.4**).

Dissolved oxygen concentrations below 0.5 mg/L and Oxidation Reduction Potential below +50 mV favor dichlorination. The data collected from the designated property appears to be random and fluctuate above and below these limits with no clear trends.

The presence of degradation products of PCE and TCE are also indicative that natural attenuation is occurring for the chlorinated compound plume. In nature, chlorinated compounds like PCE and TCE degrade to cis-1,2-DCE, trans-1,2-DCE, and 1,1-DCE, and in turn, these compounds degrade to VC and then ethenes. The detection of these daughter products in the groundwater suggests that the contamination plume is actively undergoing natural attenuation.

Based on the presented SLOEs, the observed biodegradation processes are expected to continue to reduce COC concentrations in groundwater over time.

Based on the PLOEs and the SLOEs, the PCLE zones present in groundwater are generally either stable and/or decreasing in size and concentration.

Notes:

"-" represents not analyzed.

"--" represents not applicable.

"mg/kg" represents milligrams per kilogram.

"PCL" represents Protective Concentration Level.

"TCEQ" represents Texas Commission on Environmental Quality.

"TRRP" represents Texas Risk Reduction Program.

"<" indicates the analyte was not detected at or above the laboratory sample detection limit (SDL).

"J" indicates that the analyte is an estimated value between the laboratory SDL and method quantitation limit (MQL) or is estimated based on the Data Usability Summary (DUS).

"L" indicates that the sample result is bias low.

"R" indicated that the data is unusable based on the DUS.

"U" indicates that the analyte was not detected above the SDL based on the DUS.

Bold values indicate detected concentrations at or above the laboratory SDL.

Only VOC analytes with at least one sample with a concentration at or above the laboratory SDL or with data qualifiers are shown on this table.

Concentrations highlighted yellow exceed their critical TCEQ TRRP Tier 1 Residential Soil Protective Concentration Levels (PCLs) for a 0.5-acre source area.

TCEQ TRRP Tier 1 Residential Soil-to-Groundwater Ingestion (^{GW}Soil_{Ing}), Total-Soil-Combined (^{Tot}Soil_{Comb}), and Soil-to-Air Inhalation (^{Air}Soil_{Inh-V}) PCLs (30 TAC Chapter 350: Table 1, May 10, 2023).

Notes:

"°C" represents degrees Celsius.

"mg/L" represents milligrams per liter.

"mV" represents millivolts.

"NM" represents not measured.

"S.U." represents Standard Units.

"VCP" represents Voluntary Cleanup Program.

Groundwater geochemical parameters shown are from the last reading collected during low-flow groundwater sampling after collecting the groundwater sample.

APPENDIX H

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A statement as to whether contamination on and off the designated property without a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.

Appendix H – Contamination Exceedance Without MSD

The RALs for COCs in soil are generally the TRRP Tier 1 or (calculated, site-specific) Tier 2 Residential $^{GW}Soil_{Ing}$ PCLs for a 0.5-acre source area unless a TRRP Tier 2 Residential $^{GW}Soil_{Ing}$ PCL was calculated and is greater than its applicable TRRP Tier 1 Residential $^{Tot}Soil_{Comb}$ PCL for a 0.5-acre source area. The lower (i.e., more conservative) of the TRRP Tier 1 or Tier 2 Residential $^{GW}Soil_{Ing}$ PCLs and the TRRP Tier 1 Residential $^{Tot}Soil_{Comb}$ PCLs for a 0.5-acre source area are considered the RALs without an MSD for surface soil. The lower of the TRRP Tier 1 or Tier 2 Residential $^{GW}Soil_{Ing}$ PCLs and the TRRP Tier 1 Residential soil-to-air inhalation PCLs for a 0.5-acre source area are considered the RALs without an MSD for subsurface soil. If a Texas-Specific Soil Background Concentration is higher than the RALs without an MSD for surface and/or subsurface soils, the Texas-Specific Soil Background Concentration is utilized as the RAL without an MSD.

The RALs without an MSD for COCs in groundwater are the TRRP Tier 1 Residential $^{GW}GW_{Ing}$ PCLs.

Based on soil and groundwater assessment activities conducted to date for the designated property, exceedances of the applicable RALs without an MSD are limited to the following:

- Surface soils (0-15 ft-bgs): cis-1,2-DCE and VC;
- Subsurface soils (>15 ft-bgs): PCE and TCE; and
- Uppermost GWBU: cis-1,2-DCE, TCE, VC and TPH in the C₆-C₁₂ range.

APPENDIX I
City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A statement as to whether contamination on and off the designated property with a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.

Appendix I – Contamination Exceedance With MSD

With an MSD in place, the RALs for surface soils (0-15 ft-bgs) and subsurface soils (>15 ft-bgs) will be their respective TRRP Tier 1 Residential $^{Tot}Soil_{Comb}$ and $^{Air}Soil_{Inh-V}$ PCLs for a 0.5-acre source area. Based on the soil assessment activities conducted to date at the designated property, no COCs have been identified in soil that will exceed their applicable RALs with an MSD in place.

Moreover, the RALs for groundwater with an MSD in place will be the TRRP Tier 1 Residential $^{Air}GW_{Inh-V}$ for a 0.5-acre source area. Based on the groundwater assessment activities conducted to date at the designated property, no COCs have been identified in groundwater that currently exceed their applicable RALs with an MSD in place.

APPENDIX J

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

***Identification of the points of origin of the contamination, to the extent known.
Please list the Potentially Responsible Party (PRP), if unknown, state unknown.
(applications without the PRP listed will be deemed incomplete)***

Appendix J – Origin of Contamination

On-site industrial operations at the designated property include commercial grade truck equipment manufacturing of truck boxes, service bodies, and winches.

The source(s) of the chlorinated compound and groundwater plumes that encompass monitoring wells 1-MW-7, 1-MW-8, and 1-MW-10 are likely attributed to historical use of chlorinated compounds in or around Building 2 (the winch shop). For example, Building 2 historically housed a TCE vapor degreaser, and although no detections were found in this area, TCE waste from this source may have entered the sanitary sewer system via floor drains. Leaks from the sanitary sewer line could have occurred further down near monitoring wells 1-MW-7 and 1-MW-8, explaining the high concentrations detected in this area.

Building 2 on the designated property currently utilizes products such as mineral spirits and acetone as degreasers instead of chlorinated compounds. Products containing PCE have been observed and documented in the laboratory of the designated property during Stantec's Phase I Environmental Site Assessment inspection in 2021, however these were limited to small volumes (an aerosol degreaser). No current or historical sources of chlorinated compounds have been identified on Tract 2.

The TPH C₆-C₁₂ groundwater plume that encompasses monitoring wells 1-MW-7 and 1-MW-8 is likely attributed to historical and/or current use of petroleum products in or around Building 2 (winch shop). Petroleum products (TPH) are still utilized on site due to the nature of the facility's operations; however no specific source was identified. As such, the TPH C₆-C₁₂ concentrations measured over time indicate natural, random fluctuations and are not expected to increase over time.

Monitoring wells 1-MW-7 and 1-MW-8 are located directly adjacent to Building 2 and have detected the highest and most consistent concentrations of chlorinated compounds and TPH C₆-C₁₂ in the groundwater and soil samples. Monitoring well 1-MW-10 has no detections for chlorinated compounds or TPH C₆-C₁₂ concentrations in soil but has detected chlorinated compound concentrations in groundwater. Monitoring well 1-MW-10 is placed approximately 240 feet northwest of the designated property and is hydrogeologically downgradient of Building 2, suggesting COC migration via groundwater from the initial source location towards the northeast direction. Consequently, Building 2 (winch shop) on the designated property is likely the source location of the chlorinated compound and TPH C₆-C₁₂ release.

No source has been identified that is currently contributing to the release of the identified COCs in groundwater.

APPENDIX K

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

Environmental regulatory actions, litigation, and plume identification.

- a. A description of any environmental regulatory actions that have been taken with in the past five years in connection with the designated property, to the extent known.***
- b. A description of any litigation that has taken place within the past five years in connection with the designated property, to the extent known.***
- c. A statement as to whether there are any other remediation activities by the applicant, or any other party or agency, which are not listed in the application.***
- d. A statement as to which contamination plume and groundwater zone the applicant is including in the MSD.***

Appendix K – Regulatory Actions

In 2022, the privately owned portion of the designated property was enrolled into the TCEQ VCP under VCP ID No. 3226 to address releases that occurred within the designated property. Regulatory actions taken as part of the TCEQ VCP are summarized in **Table K.1**.

No litigation has taken place within the past five years in connection with the designated property.

No remediation activities, except monitored natural attenuation activities already described in this application, are ongoing on the designated property.

The applicant is applying for an MSD for the chlorinated compound and TPH (C₆-C₁₂) contaminant plumes in the upper GWBU.

Table K.1 Chronology of Regulatory Activity

Date:	Event:
May 23, 2022	SKA submitted a VCP application and agreement to the TCEQ.
June 15, 2022	The TCEQ accepted the VCP application and agreement.
February 3, 2023	SKA submitted a Drinking Water Survey Report (DWSR) to the TCEQ.
February 12, 2024	SKA submitted a Drinking Water Survey Report (DWSR) Update to the TCEQ.

APPENDIX L

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A listing of all existing state or EPA registrations, permits, and identification numbers that applies to the designated property.

Appendix L – Registrations, Permits, Identification Numbers_____

The state and EPA registrations listed below relate to the designated property (specifically, the designated property).

Regulated Entity (RN)	RN Number	Registration ID
RKI	RN101996783	IHW SWR No. 30882
		EPA ID No. TXD988006342
		Air New Source Permits Acct No. HG1164B
		Air New Source Permits Registration Nos. 10838 and 173269
		Stormwater Permit ID No. TXRENEP566
		Pollution Prevention Planning ID No. P07498
		VCP ID No. 3226

APPENDIX M

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

Provide evidence that the designated property is currently or has previously been under the oversight of the TCEQ or the United States Environmental Protection Agency, as required by the Texas Health & Safety Code § 361.8065(c)(2)(A), and a description of the status of the designated property in the program (the program application number is sufficient evidence). Also, include the state or federal cleanup project manager's name.

Appendix M – Enrollment in TCEQ Program

The designated property for the MSD application is approximately 24.144 acres of occupied industrial land. As previously discussed, the privately owned portion of the designated property is enrolled in the TCEQ VCP under VCP ID No. 3226. The TCEQ Project Manager for VCP ID No. 3226 is Mr. Joseph Norem.

APPENDIX N

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A summary of any environmental site assessment reports filed with TCEQ regarding any site investigations or response actions that are planned, ongoing or completed related to the designated property.

Appendix N – TCEQ Submittals

The following is a list of submittals to the TCEQ for the VCP property:

TCEQ VCP ID No. 3226

- VCP Application – May 2022
- VCP Agreement – May 2022
- Drinking Water Survey Report – February 2023
- Drinking Water Survey Report Update – February 2024

APPENDIX O
City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092
IHW SWR No. 38591

A statement as to whether any public drinking water supply system exists that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and property within one-half mile of the designated property and the identity of each supply system.

Appendix O – Public Drinking Water Supply System_____

Public drinking water is currently available to the designated property and the properties located within a 0.5-mile radius surrounding the designated property by the COH public water supply system. The COH water supply system satisfies the requirements of Chapter 341 of the Texas Health and Safety Code.

APPENDIX P
City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092
IHW SWR No. 38591

The name and address of each owner or operator of a water well registered or permitted by the state or the Houston-Galveston Subsidence District that is located within five miles of the boundary of the designated property, along with a map showing the location of each well and, to the extent known, a notation of whether each well is used for potable water. Well logs must be included in the electronic copy of the application but should not be included in the hard copies. (An accompanying electronic excel file with mailing information should be included with your application.)

Appendix P – Owners and Operators of Water Wells_____

A list of all names and addresses of water well owners and operators within a five-mile radius of the designated property is included in **Table P.1** in **Appendix P**. A mailing list of owners of potable water wells is included in **Table P.2** in **Appendix P**. Potable water well owners that own multiple wells are only listed once in **Table P.2**. Water well owners that do not own a potable water well (e.g., geothermal loop wells) are not included in **Table P.2**. **Table P.2** and the completed ERIS MSD Report are included as electronic files in **Appendix Y**.

APPENDIX Q

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

The name and address of each retail public utility, as defined in section 13.002 of the Texas Water Code that owns or operates a groundwater supply well within five miles of the boundary of the designated property.

Appendix Q – Retail Public Utilities

The following is a list of the retail public utilities, as defined in Section 13.002 of the Texas Water Code, that reportedly own or operate a groundwater supply well within a 5-mile radius of the designated property:

- City of Bunker Hill Village
- City of Houston
- City of Spring Valley Village
- Memorial Villages Water Authority

A list of the contact names and addresses for these utilities is included in **Table Q.1** in **Appendix Q**. The Water Utility Database (WUD) Report from ERIS is also included in **Appendix Q**.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update.

Federal

State

Water Utility Database:

[WUD](#)

The Water Utility Database is defined as a collection of data from Texas Water Districts, Public Drinking Water Systems and Water and Sewer Utilities who submit information to the TCEQ. This database is an integrated database designed and developed to replace over 160 stand alone legacy systems representing over 5 million records of the former Texas Water Commission and the Texas Department of Health.

Government Publication Date: Oct 1, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

APPENDIX R
City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A listing of each municipality, other than the city of Houston, with a corporate limit within one-half mile of the boundary of the designated property.

Appendix R – Municipalities

There are no municipalities other than the COH, with corporate limits within 0.5 miles of the boundary of the designated property.

APPENDIX S

City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A listing of each municipality, other than the city of Houston, that owns or operates a groundwater supply well within five miles of the boundary of the designated property.

Appendix S – Municipalities with Groundwater Supply_____

Other than the COH, the following cities own and operate groundwater supply wells within five miles of the boundary of the designated property:

- City of Bunker Hill Village
- City of Spring Valley Village

APPENDIX T
City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

A listing of owners of real property within 2,500 ft. of the boundary of the designated property as indicated by the most recent appraisal district records. Please Note: This requirement may include real property outside the City of Houston. Be sure to include ALL properties in the 2,500 ft. boundary. (An accompanying electronic excel file with mailing information should be included with your application.)

Appendix T – Real Property Owners

A listing of the owners of real property within 2,500 feet of the boundary of the designated property is provided in **Table T.1**. The listing is based on information obtained from the Harris Central Appraisal District (HCAD). An electronic file of **Table T.1** is included in **Appendix Y**.

APPENDIX U
City of Houston Municipal Setting Designation Application

RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092
IHW SWR No. 38591

Form U-2012-01 signed and sealed by a licensed professional engineer or licensed professional geoscientist authorized to practice in the State of Texas with expertise in environmental remediation. (Form U-2012-01 can be found at www.houstonmsd.org under the "Forms" section on the homepage.)

Signing and sealing Form U-2012-01 certifies:

- a. The contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not [do exceed] OR [do not exceed] a non-ingestion protective concentration level on property beyond the boundaries of the designated property. (select the appropriate statement)***
- b. All requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size.***

Appendix U – Completeness of Information and Off-Site Impact__

Form U-2012-01 is attached, which has been signed and sealed by a licensed professional engineer authorized to practice in the State of Texas.

Appendix U – Completeness of Information and On-Site and Off-Site Impact(s)

To the best of my knowledge and belief, based upon a review of all public and private records and other information sources available to me in the exercise of due diligence, the opinions stated and conclusions made in this application are supported by such information, and the technical and scientific information submitted with the application is true, accurate and complete. Based on such review, the contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not do exceed a non-ingestion protective concentration level on property beyond the boundaries of the designated property. Further, I certify that all requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size.

APPENDIX V
City of Houston Municipal Setting Designation Application
RKI, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092
IHW SWR No. 38591

If the licensed professional engineer or licensed professional geoscientist determines that contaminants of concern from sources on the designated property are migrating from or through the designated property more likely than not do exceed a non-ingestion protective concentration level on property beyond the boundary of the designated property, then the applicant must:

- a. Specify the name and address of the owner of each property.***
- b. Send a copy of the application to the owner of the property with the notice of the public meeting.***
- c. Provide documentation that the designated property has been included in a state or federal program that requires that the entire non-ingestion protective concentration level exceedance zone be addressed to the satisfaction of the agency administering the program, along with documentation of the estimated time period in which it is to be addressed. An example of such a program is the Texas Voluntary Cleanup Program (section 361.501 of the Texas Health and Safety Code, as may be amended from time to time).***
- d. Provide documentation upon completion of the state or federal program showing That the non-ingestion protective concentration level exceedances have been addressed to the satisfaction of the agency administering the program.***

Appendix V – Determination of Off-Site Impact_____

This section is not applicable as no COCs are migrating from or through the designated property that exceeds TRRP non-ingestion PCLs.

APPENDIX W
City of Houston Municipal Setting Designation Application

RKL, Inc. Facility, 2301 Central Parkway, Houston, Harris County, Texas 77092

IHW SWR No. 38591

Form W-2012-01 certified/signed by the applicant and any authorized representatives of the applicant(s) listed in the application. (Form W-2012-01 is attached to the end of this application and can also be found at www.houstonmsd.org under the "Forms" section on the homepage.)

Appendix W – Accuracy of Information

Form W-2012-01, which has been signed by the MSD applicant, is attached.

Appendix W – Accuracy of Information

I certify under penalty of law that this application and all attachments were prepared under my direction or supervision in a manner designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the persons responsible for gathering and evaluating the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violation.
