

Appendix I

A statement as to whether contamination on and off the designated property with a Municipal Setting Designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.

Recent groundwater monitoring data from February 2024 indicate that the area of groundwater impact is delineated to most practical extent possible. Groundwater samples collected from the existing groundwater monitoring wells reported COC concentrations less than the Texas Risk Reduction Program (TRRP) residential ingestion exceedance level with a municipal setting designation ($^{Air}GW_{Inh-v}$) in all groundwater monitoring wells. Therefore, there is no future contamination exceedance anticipated with the municipal designation for the subject property.

Appendix J

Identification of the points of origin of the contamination, to the extent known. Please list the Potentially Responsible Party (RPR), if unknown, state unknown. **(applications without the RPR listed will be deemed incomplete)**

The likely source of the onsite contamination is the former Pilgrim Cleaners. NSC Partners Ltd is assuming all financial liability for the cleanup of this site.

Appendix K

Environmental regulatory actions, litigation, and plume identification. **Label & address each separately, i.e., a, b, c, d**

- a. A description of any environmental regulatory actions that have been taken within the past five years in connection with the designated property, to the extent known.
- b. A description of any litigation that has taken place within the past five years in connection with the designated property, to the extent known.
- c. A statement as to whether there are any other remediation activities by the applicant, or any other party or agency, which are not listed in the application.
- d. A statement as to which contamination plume and groundwater zone the applicant is including in the MSD.

To the best of our knowledge:

- a. No environmental regulatory actions have been taken in the last five years in connection with the designated property.
- b. No litigation has taken place within the past five years in connection with the designated property.
- c. There are no other known remediation activities by the applicant or any other party not listed in this application.
- d. The proposed MSD includes a VOC plume in the first and second groundwater bearing units (GWBU's). The first groundwater bearing unit is comprised of sand and is encountered at a depth of approximately 12-feet below ground surface (ft bgs) during drilling. The base of the first groundwater bearing unit is encountered at a depth of approximately 20-ft bgs and is underlain by a clay.

The second groundwater bearing unit is comprised of clayey sand and is encountered at a depth of approximately 40-feet below ground surface (ft bgs) during drilling. The base of the second groundwater bearing unit is encountered at a depth of approximately 50-ft bgs and is underlain by a clay.

Appendix L

A listing of all existing state or EPA registrations, permits, and identification numbers that applies to the designated property.

TCEQ Voluntary Cleanup Program

- Voluntary Cleanup Program – No. 1788

Texas State Customer Number

- Texas State Customer Number – CN602787145

Texas State Registration Number

- Texas State Registration Number – RN102306586

Industrial and Hazardous Waste Corrective Action

- IHW ID No. T1723 (Inactive)

Industrial and Hazardous Waste Solid Waste Registration (#SWR)

- Solid Waste Registration Number 90522 (Inactive)

Appendix M

Provide evidence that the designated property is currently or has previously been under the oversight of the TCEQ or the United States Environmental Protection Agency, as required by the Texas Health & Safety Code §361.8065(c)(2)(A), and a description of the status of the designated property in the program (the program application number is sufficient evidence). Also, include the state or federal cleanup project manager's name. Please note, the City of Houston does not accept (consider?) sites enrolled in the Innocent Owner/Operator Program due to the lack of state/federal oversight.

The former Pilgrim Cleaners facility, located at 5210 N. Shepherd Drive, was enrolled in the Texas Commission on Environmental Quality (TCEQ) Voluntary Cleanup Program (VCP) in February 2005. The site was assigned VCP No. 1788 and is active in the program. At the time of this report, the project manager assigned to this site is Mr. Robert Anderson.

Appendix N

A summary of any environmental site assessment reports filed with the TCEQ regarding any site investigations or response actions that are planned, ongoing or completed related to the designated property.

The following are a list of reports filed with the TCEQ as listed in the TCEQ Central Registry.

Affected Property Assessment Report (APAR), May 2005: The APAR summarized all field activities conducted between 1997 and 2005 and discussed the delineation of COCs present on the subject property.

Investigation Plan, January 2006: This report was not available for InControl to review but was listed in the TCEQ Central Registry.

APAR Revisions, April 2006: This report was not available for InControl to review but was listed in the TCEQ Central Registry.

Technical Report, July 2009: This report was not available for InControl to review but was listed in the TCEQ Central Registry

Groundwater Monitoring Report, December 2023: This report summarized the November 2023 site-wide groundwater monitoring event conducted by InControl Technologies. Chlorinated VOCs were detected in five of the eleven groundwater monitoring wells installed on the subject property, extending into both GWBUs. PCE exceeded the Tier 1 ^{GW}GW_{Ing} PCL (0.005 mg/L) in one monitoring well in the 1st GWBU and three monitoring wells in the 2nd GWBU. TCE exceeded the Tier 1 ^{GW}GW_{Ing} PCL (0.005 mg/L) three monitoring wells in the 2nd GWBU.

Response Action Plan, February 2024: This reported summarized the February 2024 site-wide groundwater monitoring event conducted by InControl Technologies and outlined the response actions proposed for both soil and groundwater. The Municipal Setting Designation Certificate will eliminate all onsite PCLE zones.

Appendix O

A statement as to whether any public drinking water supply system exists that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and property within one-half mile of the designated property and the identity of each supply system. Please include a map of available water lines within one-half mile found at <https://geogimsprod.houstontx.gov/Html5Viewer/index.html?viewer=geolink-public>

Drinking water for the subject property is provided by the City of Houston. Enclosed is a statement from the City of Houston regarding the requirements of Chapter 341 of the Texas Health and Safety Code. Properties within one-half mile of the designated property are supplied public drinking water by the City of Houston. Also enclosed is a figure illustrating the public water supply network in the vicinity of the designated property (**Figure O**).

CITY OF HOUSTON

Department of Public Works and Engineering

Policy Statement

To: Michael S. Marcotte, P.E., D.WRE, BCEE,
Director

From: Carol Ellinger Haddock, P.E.
Senior Assistant Director *CEH*
Planning & Development Services Division

Mark L. Loethen, P.E.
Acting Deputy Director
Planning & Development Services Division

Date: March 9, 2010
Subject: MSD applications in areas where the city
does not currently supply drinking water
but is capable of supplying drinking water

Policy

State regulations and City ordinances do not require that all properties within one-half mile of an MSD applicant's property be supplied with drinking water from the City, only that the City is capable of supplying drinking water to the area. Supporting an application for a Municipal Setting Designation (MSD) does not imply or commit the City to providing drinking water to the non-served properties within one-half mile of the site as a result of supporting the application. In addition, the MSD applicant must demonstrate that the area of contamination does not and will not impact any nearby water well(s), otherwise the applicant is responsible for connecting the well owner(s) to the City drinking water system at the applicant's expense.

Concurrence:

4/2/2010

Mark L. Loethen, P.E.
Acting Deputy Director
Planning & Development Services Division

Michael S. Marcotte, P.E., D.WRE, BCEE,
Director
Public Works & Engineering Department

Background

In 2003, the Texas Legislature authorized the creation of Municipal Setting Designations (MSDs), which is an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is prohibited for use as drinking water. The law is administered by Texas Commission on Environmental Quality (TCEQ) and requires local city support to designate an MSD. The intent of the legislation is to encourage redevelopment of vacant or abandoned properties while protecting the public health, by providing a less expensive and faster alternative to the existing state environmental regulations governing the investigation and cleanup of contaminated groundwater. On August 22, 2007, City Council approved an Ordinance amending Chapter 47 of the Code of Ordinances by adding Article XIII "Municipal Setting Designations" relating to groundwater, which provides a process to support or not support a MSD application to the State.

Opportunity

It is anticipated that MSD applications will be submitted where all properties within one-half mile of the proposed MSD boundary are not currently supplied with City drinking water but the City is capable of supplying drinking water in the area. The applicant must technically demonstrate that the area of contamination does not and will not impact any well(s) within one-half mile of the MSD boundary or the applicant is responsible for connecting the well owner(s) to the City drinking water system at the applicant's expense. Supporting MSD applications encourage redevelopment of vacant or abandoned properties and make timely completion of cleanup action achievable while still protecting public health.

Requirements

The TCEQ requires an MSD applicant to be located within the corporate limits or extraterritorial jurisdiction of a municipality that supplies or is capable of supplying drinking water to the applicant's property and properties within ½ mile of the applicant's property (§ 361.803¹). TCEQ does not require the municipality to supply drinking water to the area only that the municipality has the capacity to supply drinking water to the area. Also, Chapter 47 Section 765² of the City's Code of Ordinances only requires that a public drinking water supply system supply or is capable of supplying drinking water to the designated property and property within ½ mile of the proposed MSD boundary.

In addition, the TCEQ has established requirements (§ 361.808³) for the applicant if there are drinking water wells within ½ mile of the proposed MSD boundary. The applicant must determine if groundwater contamination on the site has caused or is likely to cause human health or ecological standards to be exceeded in the area located within ½ mile beyond the MSD boundary. If the investigation shows that the groundwater has not impacted any receptors in the area then the executive director will approve the MSD application. However if the investigation shows that the groundwater contamination has caused human health or ecological standards to be exceeded then the executive director will require the applicant to complete mandatory groundwater response actions including providing owners of impacted potable water wells a reliable alternate water supply. This puts the responsibility of connecting an impacted well owner to the City's potable water system firmly onto the applicant.

Conclusions

TCEQ does not require a municipality to supply drinking water to an MSD applicant's property and the properties within ½ mile of a proposed boundary, only that the municipality has the capacity to supply drinking water to the area.

While there is no regulation or ordinance that prevents the City from supporting an MSD application in an area where some of the surrounding properties are not supplied with drinking water from the City, PWE staff will evaluate support for these application on a site by site basis.

TCEQ requires the MSD applicant to determine if groundwater contamination from the applicant's property has or is likely to exceed human health or ecological standards. If the standards are exceeded the applicant will have to complete groundwater response actions to reduce the human health or ecological risks. These actions include providing owners of impacted potable water wells a reliable alternate water supply.

Regulations and Ordinances

¹ § 361.803. ELIGIBILITY FOR A MUNICIPAL SETTING DESIGNATION.

A person, including a local government, may submit a request to the executive director for a municipal setting designation for property if:

- (1) the property is within the corporate limits or extraterritorial jurisdiction of a municipality authorized by statute that has a population of at least 20,000; and
- (2) a public drinking water supply system exists that satisfies the requirements of Chapter 341 and that supplies or is capable of supplying drinking water to:
 - (A) the property for which designation is sought; and
 - (B) property within one-half mile of the property for which designation is sought.

² Sec. 47-765. City council public hearing.

(e) The city council shall deny the application if it finds that:

- (1) It does not meet the eligibility criteria of section 361.803 of the Texas Health and Safety Code;
- (2) The municipal setting designation will have an adverse effect on the current or future water resource needs or obligations of the city; or

-
- (3) There is not a public drinking water supply system that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and property within one-half mile of the boundary of the designated property.

³ § 361.808. INVESTIGATION AND RESPONSE ACTION REQUIREMENTS.

- (a) If no potable water wells are located within one-half mile beyond the boundary of a municipal setting designation, the executive director shall not require a person addressing environmental impacts for a property located in the municipal setting designation to:
- (1) investigate the nature and extent of contamination in groundwater except to satisfy the requirements of Subsection (b); or
 - (2) conduct response actions to remove, decontaminate, or control environmental impacts to groundwater based solely on potential potable water use.
- (b) Notwithstanding Subsection (a), the executive director shall require a responsible person to complete a response action to address environmental impacts to groundwater in a certified municipal setting designation if action is necessary to ensure:
- (1) the protection of humans from exposures to environmental impacts to groundwater that are not related to a potable water use, including exposures from nonconsumptive uses and exposures resulting from inadvertent contact with contaminated groundwater; or
 - (2) the protection of ecological resources.
- (c) If potable water wells are located within one-half mile beyond the boundary of a municipal setting designation, the executive director shall require a person addressing environmental impacts for a property located in the municipal setting designation to complete an investigation to determine whether groundwater contamination emanating from the property has caused or is reasonably anticipated to cause applicable human health or ecological standards to be exceeded in the area located within one-half mile beyond the boundary of the certified municipal setting designation.
- (d) If an investigation described in Subsection (c) confirms that groundwater emanating from the property has not caused and is not reasonably anticipated to cause applicable human health or ecological standards to be exceeded in the area located within one-half mile beyond the boundary of the certified municipal setting designation, the executive director shall approve the completion of groundwater response actions at the property except to the extent that response actions are necessary to satisfy Subsection (b).
- (e) If an investigation described in Subsection (c) confirms that groundwater emanating from the property has caused or is reasonably anticipated to cause applicable human health or ecological standards to be exceeded in the area located within one-half mile beyond the boundary of the certified municipal setting designation, the executive director shall approve the completion of groundwater response action at the source property if the person addressing environmental impacts:
- (1) completes response actions at the source property to remove, decontaminate, or control environmental impacts to groundwater to meet applicable human health or ecological standards; or
 - (2) completes response actions at the source property to remove, decontaminate, or control environmental impacts to groundwater that are not related to a potable water use, including actions to protect humans from exposures from nonconsumptive uses and exposures resulting from inadvertent contact with contaminated groundwater and actions to protect ecological resources, and:
 - (A) provides to owners of impacted potable water wells described in Subsection (c) a reliable alternate water supply that will provide a volume of water sufficient for the intended use for a period not shorter than the period that the impacted wells exceed the human health or ecological standards and, after obtaining permission from such owners, files a restrictive covenant that prohibits the use of groundwater from those wells as potable water and restricts other uses of groundwater in a manner consistent with groundwater quality; or
 - (B) expands the municipal setting designation in accordance with the procedures under this subchapter relating to the initial application for a municipal setting designation to include the properties with impacted potable water wells described in Subsection (c).
- (f) Notwithstanding any other provision of this section, the executive director may require a person responsible for property within a certified municipal setting designation to complete a response action to address environmental impacts to groundwater emanating from the property that has caused or is reasonably anticipated to cause applicable human health or ecological standards to be exceeded in an area located more than one-half mile beyond the boundary of the certified municipal setting designation, provided such action is necessary to ensure:
- (1) the protection of humans from exposures to environmental impacts to groundwater; or
 - (2) the protection of ecological resources.
- (g) This subchapter relates to the scope of the response action that can be required by the executive director in municipal settings designated under this subchapter. Nothing in this subchapter shall be construed to alter or affect the private rights of action of any person under any statute or common law for personal injury or property damage caused by the release of contaminants. Nothing in this subchapter is meant to alter or supersede any requirement of a federally authorized environmental program administered by the State of Texas.

Appendix P

The name and address of each owner or operator of a water well registered or permitted by the state or the Houston-Galveston Subsidence District that is located within five miles of the boundary of the designated property, along with a map showing the location of each well and, to the extent known, a notation of whether each well is used for potable water. Well logs must be included in the electronic copy of the application but should not be included in the hard copies. (An accompanying electronic excel file with mailing information should be included with your application.)

Add Super Neighborhoods & council members in the district to the mailing list.

Included are the names and address of identified water well owners located within five miles of the proposed MDS boundary. A copy of the water well search is included in this section.

Below is a list of the Super Neighborhoods and Council Members within five miles of the proposed MDS boundary.

Super Neighborhoods

Greater Greenspoint	Lazybrook/Timbergrove (no address available)

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update.

Federal

State

Water Utility Database:

[WUD](#)

The Water Utility Database is defined as a collection of data from Texas Water Districts, Public Drinking Water Systems and Water and Sewer Utilities who submit information to the TCEQ. This database is an integrated database designed and developed to replace over 160 stand alone legacy systems representing over 5 million records of the former Texas Water Commission and the Texas Department of Health.

Government Publication Date: Oct 1, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Appendix R

A listing of each municipality, other than the City of Houston, with a corporate limit within one-half mile of the boundary of the designated property.

No other municipalities have a corporate limit within one-half mile of the boundary of the designated property.

Appendix S

A listing of each municipality, other than the City of Houston, that owns or operates a groundwater supply well within five miles of the boundary of the designated property.

No other municipalities, other than the City of Houston, operate a groundwater supply well within five miles of the subject property:

The above mentioned entities will be provided notice as required by section 361.805 of the Texas Health and Safety Code approximately 30 days prior to the public meeting.

Appendix T

A listing of owners of real property within 2,500 ft. of the boundary of the designated property as indicated by the most recent appraisal district records. Please Note: This requirement may include real property outside the City of Houston. Be sure to include ALL properties in the 2,500 ft. boundary. (An accompanying electronic excel file with mailing information should be included with your application).

Attached is a listing of real property owners within 2,500 feet of designated property boundary. This list is also included on the USB as part of Appendix Y.

Appendix U

Form U-2012-01 **signed and sealed** by a licensed professional engineer or licensed professional geoscientist authorized to practice in the State of Texas with expertise in environmental remediation. (Form U-2012-01 can be found at <https://www.houstonpublicworks.org/municipal-settings-designation> under the "Forms" section on the homepage.)

Signing and sealing Form U-2012-01 certifies:

- a. The contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than no [do exceed] OR [do not exceed] a non-ingestion protective concentration level on the property beyond the boundaries of the designated property. (select the appropriate statement)
- b. All requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size.

To the best of my knowledge and belief, based upon a review of all public and private records and other information sources available to me in the exercise of due diligence, the opinions stated and conclusions made in this application are supported by such information, and the technical and scientific information submitted with the application is true, accurate, and complete. Based on such review, the contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not **do not exceed** a non-ingestion protective concentration level on property beyond the boundaries of the designated property. Further, I certify that all requirements of Section 47-762 of the Houston Code of Ordinances have been met, including demonstration that the groundwater contamination plume has been fully delineated and is stable or contracting in size.

Appendix V

If the licensed professional engineer or professional geoscientist determines that contaminants of concern from sources on the designated property are migrating from or through the designated property more than likely do not exceed a non-ingestion protective concentration level on property beyond the boundary of the designated property, then the applicant must:

- a. Specify the name and address of the owner of each property.
- b. Send a copy of the application to the owner of the property with the notice of the public meeting.
- c. Provide documentation that the designated property has been included in a state or federal program that requires that the entire non-ingestion protective concentration level exceedance zone be addressed to the satisfaction of the agency administering the program, along with documentation of the estimated time period in which it is to be addressed. An example of such a program is the Texas Voluntary Cleanup Program (section 361.501 of the Texas Health and Safety Code, as may be amended from time to time).
- d. Provide documentation upon completion of the state or federal program showing that the non-ingestion protective concentration level exceedances have been addressed to the satisfaction of the agency administering the program.

Not Applicable. The contaminants of concern from sources on the designated property do not exceed a non-ingestion protective concentration level beyond the boundary of the designated property.

Appendix W

Form W-2012-01 **certified/signed** by the applicant and any authorized representatives of the applicant(s) listed in the application. (Form W-2012-01 is attached to the end of this application and can also be found at <https://www.houstonpublicworks.org/municipal-settings-designation> under the "Forms" section on the homepage.)

Enclosed in this section is Form W-2012-01 certified and signed from the following party(ies):

Applicant: NSC Partners, Ltd.

Appendix W – Accuracy of Information

I certify under penalty of law that this application and all attachments were prepared under my direction or supervision in a manner designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the persons responsible for gathering and evaluating the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violation.
